Dear Sirs:

In this letter I am requesting that the Arizona Board of Technical Registration grant special consideration to my application for registration as a geologist because of my disability (Dyslexia) and that my examination be postponed so that the board may rule on this request. In considering this request the board should consider two issues:

- 1) Whether classical testing is appropriate for an individual with Dyslexia.
- 2) What form and type of accommodation would constitute appropriate compensation.

Typically, dyslexic individuals such as myself do not "learn well" in classical terms. Consequently, their grades reflect the effect of the disability rather than the degree of knowledge of the subject. Certain situations increase dyslexia errors such as:

- 1) stress, tension or anxiety associated with examinations.
- 2) Fatigue associated with extended periods of testing.
- 3) Timed examinations.
- 4) Mathematical calculations.

Perceptual errors exemplified by numerical reversal in arithmetic calculation are common. For example, when the number 14 is dyslexically reversed to become 41 the answer is wrong. Consequently, for arithmetic questions requiring numerical calculation credit should be given for the correct method rather than solely base on the numerical answer.

It was my understanding that the exam is to be an essay or short answer type which would be in part graded on written ability as an example of my professionalization. Since my disability directly affects my written ability, the exam should be graded on content only rather than spelling, weakness, poor grammar and sentence structure and clarity.

I am not able to write a book discussing and exemplifying the effect of Dyslexia on examination results. I suggest that if the Board is not familiar with such situations that a professional skilled in assessment of dyslexia be consulted and employed for the testing.

Dear Sir:

In this letter I am requesting that the Arizona Board of Technical Registration grant special consideration to my application for registration as a geologist because of my disability (Dyslexia) and that my examination be postponed so that the board may rule on this request. In considering this request the board should consider two issues:

- 1) Whether classical testing is appropriate for an individual with Dyslexia.
- 2) What form and type of accommodation would constitute appropriate compensation.

Typically, dyslectic individual such as myself do not "test well" in classical terms. Consequently, their grades reflect the effect of the disability rather than the degree of knowledge of the subject. Certain situation increase dyslexia errors such as;

- 1) Stress, tension or anxiety associated with examinations.
- 2) Fatigue associated with extended periods of testing.
- 3) Timed examinations.
- 4) Mathematical calculations.

Perceptual errors exemplified by numerical reversal in mathematic calculation are common. For example, when the number 14 is dyslectically reversed to become 41 the answer is wrong. Consequently, for mathematic question requiring numerical calculation credit should be given for the correct method rather than solely base on the numerical answer.

It was my understanding that the exam is to be an essay or short answer type which would be in part graded on written ability as an example of my professionalism. Since my disability directly affects my written ability, the exams should be graded on content only rather than spelling, neatness, good grammar and sentence structure and clarity.

I am not able to write a book discussing and exemplifying the effect of Dyslexia on examination results. I suggest that if the Board is not familiar with such situations that a professional skilled in examination of dyslexia be consulted and employed for the testing.

Arizona State of Board Registration  
Phoenix, Arizona.

Some examples and suggested methods of compensation for Dyslexia are but not limited too:

- 1) Extended time periods for examination
- 2) Pre-recorded test
- 3) Multiple choice exams
- 4) Oral exams insted of essays
- 5) Grader skilled in interpreting result of Dyslexia exams
- 6) Credit be given for proper methods instead of numerical answers
- 7) Exams be graded on content only not written ability.

Final, in closing I suggest testing is not appropriate in this situation due to my disability and that any form of testing would result in discrimination unless compensation for my disability is made. Furthermore, I suggest the Board consider my application under R430 207B Registration without examination since I have been: 1) Gainfully employed geologist for over 10 years; 2) I have met the educational requirements; 3) I am a certified Professional Geologist CPPG #7170 issued by the American Institute of Professional Geologists; 4) As an example of my professionalism I have authored a professional publication and presented a seminar at a conference.

Please credit my exam fee to 1988 so the Board my consider this request. Thank you for your consideration in this matter.

Sincerely,

*Mark R. Schuknecht*

To Whom It May Concern:

MARK SCHUKNECHT

Recently Mr. Schuknecht contacted me for the purpose of a personal assessment of psychoeducational abilities and aptitudes. It is his intention to begin graduate study and he had heard of our evaluation which yields information on strengths and weaknesses in learning styles and achievement levels which is particularly pertinent to someone approaching such study.

In viewing the results, one is immediately struck by the unusually high level of achievement already gained by this gentleman. Tests administered measured achievement levels and specific learning abilities and aptitudes yielding comparative data on expectation/achievement relationships. Overall achievement levels were high with scores reaching near-maximum figures. On this test expected scores for college-educated adults, reported in grade-level equivalents, are in a range from 7-2 to 12-999. (7-2 referring to 7th grade, 2nd month and 12-999 to post-secondary range) Mark's scores in sub-test clusters ranged from 11-4 to 12-985. Thus overall achievement ranks at 12-960, a more than satisfactory level.

Other portions of the test seek to isolate specific learning aptitudes to give information on strengths and weaknesses. Again data indicates solid strengths in most areas. However, there is a significant weakness in the subtest sections dealing with analysis/synthesis skills as well as concept formation skills. Grade-level score for this subtest is 3.5. This means that, in isolation the level of function for these specific skills reaches only this level. Our input-output of information moves through successive sequences -- reception, perception, association, integration and expression. Weakness in perceptual areas tends, for Mark, to distort data being received and thus create inaccuracies in the following sequences. Given a high native intelligence, Mark has developed compensatory strengths in his associative and integrative sequences so that he is able to discriminate distortions and discrepancies in perceptions and move the data through the process accurately. The cost to Mark of the need to sort in this fashion is a need for extra time to do the processing. The contrast between this revealed weakness and Mark's

November 13, 1981

page 2

levels of achievement is dramatic to say the very least. The levels of achievement contrasted with the weakness indicate significant and extremely successful compensations have been developed. The normal prediction in the face of such weakness would be significantly below average achievement potential.

Beyond our early learning stages no one learning aptitude functions totally independently. Mark has involved and integrated other learning aptitudes into a powerfully successful compensation which subjugates and circumvents the weakness. This has allowed him to reach the levels of achievement seen in this test. Remaining as deterrents to complete compensation are a slowness in processing and such things as spelling weakness and poor sentence structure. It must be remembered that this weakness has been present throughout Mark's educational programs and has cost him considerably throughout, particularly in expressive skills -- organizing composition, spelling and handwriting. Fortunately, in today's world, there are many mechanical devices to help overcome or circumvent this weakness. Tape recorders, secretarial assistance, word processors, calculators, etc. are all aides which can virtually make this weakness inconsequential. It is only in recent years that teachers have been able to recognize and accommodate atypical learning styles, thus Mark came through the systems with no one really aware of his problems.

An important aspect of such a weakness is its effect on the personality. Persons suffering under this handicap in their very early years have an inability to accurately appraise themselves, their problems, needs or handicap. They view others, situations, and information with gross inaccuracy and may fix on a detail or generalize improperly. Their behavior is ill conceived, illogical and self defeating. They make inappropriate connections, lack perspective, have problems in planning ahead and in communication and are easily stressed. The adult having experienced these shortcomings as a child often develops a very short-fused, controlling type of personality with great difficulty in interpersonal relationships. Self awareness, perspective and communication, all vital factors in interpersonal life, are scarred and dysfunctional. Such is the case with Mark. However, as in academic achievement, he has made good progress toward change, largely on his own, and is now seeking help to alleviate any problems still existing.

Remediation of such basic weakness is extremely long-term as well as unpredictable in terms of success. For this reason, effort is rather bent in the direction of reinforcing and refining strengths and developing reasonable accommodations. Counseling including the teaching of interpersonal skills helps to overcome personality disfunction and because it is largely an informative learning process is generally short term.

Specifically our recommendations are that:

1. Mark become fully aware of his abilities, potential, strengths and weaknesses, and compensations so as to continually reinforce and operate from the positive.
2. Seek out and/or organize accommodations and support service in the employment areas such as secretarial assistance, word processors, tape-recorders, calculators etc. to facilitate and circumvent remaining shortcomings and interference with obvious potential for performance.
3. Investigate the possibilities of participation in computer skills programs. The acquisition of their inherent organizational skills (analysis/synthesis) would constitute a form of remediation for Mark.
4. Engage in short term counseling to gain enlarged self awareness, increased perspective, broader communication skills to help in bettering interpersonal relationships. Participation in personnel/management seminars/workshops would be helpful.
5. Give positive consideration to further study having accomplished the first four.

Mark is a remarkable young man who has made outstanding strides while accommodating what could have been devastating perceptual weakness. He clearly is gifted with fine intelligence, a high level of perseverance and strong motivation to achieve and perform. I am personally much impressed with his remarkably perceptive attitude toward self. It is my very strong conviction that anyone willing to make accommodations (such as tape recorders, secretarial assistance, time to complete assignments) for Mark's atypical expressive abilities, will be rewarded with a most contributive and superior co-worker or employee.

Mr. Kesler moved and Mr. Cella seconded that the minutes from the December 4, 1987 meeting of the Board of Technical Registration be accepted after making correction on page nine. MOTION CARRIED UNANIMOUSLY.

#### IV. Public Comment

Professor Rudy Jimenez welcomed the Board on behalf of the Dean. He stated it was a pleasure having the Board in Tucson once again. Professor Jimenez stated he wanted to voice his objection on the NCEE multiple choice exam. He encouraged anybody who had any questions on his report on the Performance of the EIT Exam to discuss them with him.

#### V. Recognition of Board Service Awards

John Riggs - Mr. Mlnarik presented Mr. Riggs with a seven-year service award in appreciation for his work and efforts on the Board.

#### VI. Other Business

##### A. Discussion and Action on Fire Sprinkler and Fire Prevention Systems

Present to hear outcome of this subject were: Dick Adams of Adams Fire Protection, Tony Grantham of Grantham Fire Protection, Nel Grantham of A&N Fire Protection, Brian D. Lindsay of Frontier Fire Protection, Donald K. Neal of Fire Protection Engineering Services, Leroy A. Sayre of Pima County Building Codes, Greg Victor of Glendale Fire Department, David Mann of City of Tucson, Burton W. Wright of City of Tucson, Jim Kazal of Kazal Fire Protection, Inc., Michael J. Madden of Arizona Chapter Society of Fire Protection Engineers, Scott Grainger of Grainger Consulting Engineers and Fred Belman, Attorney for Fire Sprinklers Association.

Mr. Mlnarik called the Board's attention to the correspondence from Mr. Belman, attorney representing fire protection contractors, Mr. Furt Wright, City of Tucson Fire Department and Mr. Greg Harris, Assistant Attorney General (requiring requests for legal advice in writing).

Mr. Cella requested that arguments on this subject heard before not be repeated; the Board was aware of those opinions and would like to hear any new comments.

Mr. Wright wondered if there was an official position taken by the Board with respect to the implementation of the law. Mr. Dalrymple answered that the Board had adopted the policy at the June 1987 meeting and had subsequently changed the implementation date from January 1, 1988 to April 1, 1988.

Mr. Cella stated he and Mr. Palmer had met with Mr. Belman. He stated he had spoken to the Assistant Attorney General, who disagreed with Mr. Belman in that he thought that the first action taken by the Board should be a rule. Mr. Cella stated he had also had a discussion with the State Fire Marshal, who said the only fire sprinkler plans that needed review by the Fire Marshal are those of state and county public buildings and schools. The larger jurisdictions are reviewed by the local building code agency and the smaller jurisdictions do not require a review. Mr. Cella stated he had prepared the following suggested list of duties for the registrant in the design of water extinguishing systems:

1. Determine the type of water extinguishing system required for a particular facility. Determine the hazard classification of the occupancy, including any consideration of special hazards.
2. Determine that an adequate water supply is available for the water extinguishing system and provide appropriate information on the contract documents for the contractor.
3. If the system is to be a "Calculated System," establish the required "Design Density" and "Area of Operation."

Mr. David Mann, City of Tucson, stated he was opposed to referring to the NFPA-13 pamphlet specifically; some jurisdictions use UBC-38. Mr. Palmer stated that NFPA-13 was being used as a standard to determine the hazard classification of the occupancy.

Mr. Scott Grainger, Grainger Consulting and Fire Protection Engineering, stated by referring only to NFPA-13, a large portion of the market was being left out. He also mentioned that every time there was a change in a code the Rules would also need changing.

Mr. Don Neal, Fire Protection Engineering Services, suggested stating "equivalent" to recognized standards instead of one in particular. Mr. Palmer agreed.

Mr. Brian Lindsay, President Fire Protection Association, stated NFPA-13 referred to "other" standards as well.

Mr. Dalrymple referred to what Mr. Cella said when the issue of building permits for alterations to nonexempt structures was discussed--"any alteration to a non-exempt structure involving the practice of engineering or architecture had to have stamped plans."

Mr. Grainger stated that if the Board said this is what registrants have to do, building officials would have to ask registrants to provide this information.

Mr. Kesler wondered if this was a "checklist" for staff to measure a professional registrant who's done something wrong or to advise a building official of what type of action to be taken by registrants or to adopt a way for contractors and nonregistrants to get involved in circumventing what the Board considers engineering practice.

Mr. Cella stated that this "checklist" was to define for staff a point in water extinguishing systems where engineering stops and shop drawing starts.

Mr. Palmer wondered about the fire protection systems, i.e., halon, Co2, fire alarm systems, and smoke detection systems.

Mr. Cella stated that was his intent; everything was covered. Mr. Cella moved and Mr. Allen seconded to adopt this "checklist" as direction to staff on the Board's feeling of the amount of engineering in fire extinguishing systems. Staff to notify building officials before April 1. 4 ayes, 2 nays. MOTION CARRIED.

XI. Other Business

A. Discussion and Action on Public Hearing for Rules

Mr. Palmer moved and Mr. Cella seconded to set June 2 at 9:30 a.m. for a public hearing in Phoenix on the rules. MOTION CARRIED UNANIMOUSLY.

Mr. Tony Schwan, Structural Engineer, referred to R4-30-101 2. "Branch"; he suggested adding "in which the registrant has demonstrated proficiency." This would enhance the definition, as the individual is examined for the specific proficiency. He also referred to 3. "Building"; he stated A.R.S. 32-101(B)(9) referred to the practice of engineering and not architecture. He suggested changing the word "occupancy" to "habitation." Mr. Cella stated that "habitation" had been replaced with "occupancy" because it was the Board's opinion that engineers should not design, e.g., movie theaters, which would be occupied but not inhabited.

Mr. Schwan then referred to 6. "Direct supervision"; he suggested adding "of a design professional," to eliminate the contractor-type. He referred to 8.(f) "Good moral character and repute"; he wondered why "been convicted of practicing" was dropped. Mr. Dalrymple stated that ordinarily practicing without a required license is an administrative charge and not a conviction unless he has been charged with a felony crime. Mr. Dalrymple suggested asking the Attorney General's Office about the proper terminology for handling of administrative charges.

Mr. Larry Monrad, President, Arizona Consulting Engineers Association, stated that on February 9, 1988 the Association sent the Board a two-page list of comments; he would appreciate an item-by-item response from the Board. He also wondered about the deletion of R4-30-104 Registration advisory committees. Mr. Mlnarik stated this was in the Codes. Mr. Dalrymple stated they were administrative matters and not appropriate for rules according to the Attorney General's Office. Mr. Monrad thought that if it was taken out and put into an Administrative Manual, registrants would not know of this availability. Mr. Cella suggested that enough be put in the rules so registrants know that there are advisory committees.

Mr. Benny Young, President, Arizona Society of Professional Engineers, stated that the February 9 letter was a joint letter from ASPE also. He reiterated what Mr. Monrad said on the advisory committees. Mr. Young wondered what the next step would be after the rules hearing in June. Mr. Dalrymple stated the next step to the adoption of the rules would be to submit the rules to the Governor's Regulatory Review Council followed by a 190-day procedure, which includes hearings before the Council, approval by the Attorney General and Secretary of State Offices and finally by the Council.

Ms. Eleanor McNamara, Executive Director, American Institute of Architects, stated they had the same concerns that the engineers do about the rules adoption procedures. She referred to the Institute's letter of January 27 and requested response on their comments and opinions--why weren't some incorporated into the rules. She stated they also had concern on the deletion of the Registration advisory committees rule.

Mr. Cella stated that at the time they reviewed all comments and suggestions from the different associations, they decided to incorporate some and not others for good reasons, however, it would take some extra time and effort to go back and try to remember what action was taken on each and why.

Mr. Schwan suggested that the associations review the latest revision and then comment to the Board any differences.

B. Discussion of Rules Definition of Construction Observation

Mr. Dalrymple stated this item was before the Attorney General and had hoped Mr. Harris would attend the meeting with a response.

Mr. Schwan stated he was on a committee that is studying the definition of construction observation as it relates to structural engineering. He stated he would report back on the results.

XII. Request for Hearing

Tom Killip (June 1986 Landscape Architect Examination-Section 4)

Mr. Mlnarik stated that Mr. Killip was requesting that the Board consider a regrade of his 1986 Landscape Architect Examination-Section 4 (design implementation which involves construction)

Mr. Killip argued that he was not given the opportunity to have Section 4 regraded.

Mr. Mlnarik stated that as a result of Mr. Killip's request of a review of Sections 3 and 4 those sections were reviewed locally; the recommendation being that Section 3 be regraded but not Section 4. Section 3 was then sent back for regrade, however, Mr. Killip was not satisfied with result and requested a formal hearing, which was held and from which resulted a passing grade for Section 3.

Mr. Cella recommended that Mr. Killip's file be reviewed for a request for formal hearing on Section 4 within the allotted time and notify Mr. Killip and Mr. Mlnarik of any findings.

XIII. Standing Committee Reports

A. Education and Examination

Mr. Palmer stated that Mr. Schwan had submitted evaluations of some of the examinations given by NCEE in engineering; there is a primary concern with the structural--it is very poor. The test is included along with the civil and sanitary. There is an additional 4-part 2-day examination on Principle and Practice. The applicant then takes a local exam on lateral forces, however, only a portion of this exam is actually on lateral forces. The Committee was recommending that one of these two parts be offered as a Structural Engineering Examination in lieu of what was being offered now and that the local examination be rewritten and upgraded to lateral forces only with the elimination of multiple choice. There have been attempts at reviewing California's examination to no avail. The Committee does not recommend it in lieu of a local exam until it has had a chance to review it.

Mr. Schwan stated that NCEE's examinations did not contain anything that reflects lateral force analysis and design as it relates to seismic forces. An Ad Hoc Committee met with Mr. Jack Warner, Psychometrician, and discussed the importance of Parts 5 and 6 of the examination. The Committee hopes to have a new exam for Parts 5 and 6 for the October 1988 examination.

Mr. Palmer moved and Dr. O'Bannon seconded to write CLARB a letter regarding their examination as presently given and that the Board is strongly dissatisfied with it.

Mr. Mlnarik stated he had attended the CLARB Board Meeting where the discussion was that the examination should be a practice exam and was to be taken into consideration by the UNE Committee. The Committee will discuss this in greater detail at the Regional Meeting in April.

Mr. Palmer moved and Dr. O'Bannon seconded that the Board review the design problems of the architectural exams after being graded and give particular attention to the failing grades using the passing grades as a criteria, and then determine whether some of those that failed should have passed and then regrade as necessary. There is definitely something wrong with an examination when there is only a 25% passing rate.

Mr. Allen stated that at the WCARB Meeting he and Mr. Dalrymple attended, the changes in the way they are doing the exam were discussed. This is the first step in the process. He stated that part of what steps NCARB was taking this year was to inform the candidates what their grading criteria is based on prior to them taking the exam. After the exams have been graded, the candidate will receive a two-page grading paper stating where his weaknesses were.

Dr. O'Bannon moved and Mr. Allen seconded to table this motion and have Mr. Allen report back on how the Board is to handle the candidates who fail their exam and request regrade. 5 ayes, 1 nay. MOTION CARRIED.

Dr. O'Bannon moved and Mr. Palmer seconded to have Mr. Allen prepare a letter to NCARB expressing the Board's concern and frustration with their grading process and suggesting definite relief. MOTION CARRIED UNANIMOUSLY.

B. Legislative and Rules

The rules were discussed under XI.A.

C. Budget

Mr. Dalrymple reported that he went to the House Budget Committee Meeting with a request for a \$692,000 budget and a recommendation from the Joint Legislative Budget Committee Analyst of \$632,000 for next year. Prior to the meeting he gave the Committee additional information on the computer program changes that the Board was proposing to make and the problem with the amount that they were allocating for next year's examinations, which caused them to raise their budget recommendation to \$662,000. A budget projection has been done for this year based on the extra number of people that have taken the examination in October and on the money spent the first six months resulting in being under the budget, however, \$6,700 over the budget in the "Other Expense" category. He stated he had asked the Legislature to approve transferring funds from other accounts to stay under the budget.

XIV. Request for Board Consideration - Edward E. Knesl (Waiver of in-training exam)

Dr. O'Bannon stated he had evaluated Mr. Knesl's file a year ago and recommended he be held for the fundamental, practice and seismic exams. Dr. O'Bannon moved and Mr. Palmer seconded to hold Mr. Knesl for the EIT exam. MOTION CARRIED UNANIMOUSLY.

XV. Other Business

A. Discussion and Action on Public Records

EXHIBIT B-1

Mr. Minarik stated that the Attorney General had informed the Board that applicant files should remain readily available for review in the office; evaluations by Board members should be done at the Board office or a copy made of the file.

Dr. O'Bannon recommended tabling and continue the evaluation process as being done now until the Assistant Attorney General can make himself available to discuss this matter.

B. Discussion of Proposed Change in NCEE By-Laws

## V. June 1987 Landscape Architect Examination Regrades

- A. Joy Garrot #0308088
- B. Nick Blake #0308087
- C. Janet Waibel #0308029

Ms. Waibel was present. Mr. Mlnarik stated that the letter exhibited was as a result of a request by three individuals to have their exams regraded by a grader who had been involved in the grading process for CLARB, asking him to review the items being questioned.

Mr. Palmer moved and Mr. Kesler seconded to accept the regrading by the master grader, giving one additional point to #0308087, and #0308088 and #0308029 to remain the same--all three a nonpassing score--and that they be notified of such action. MOTION CARRIED UNANIMOUSLY. Ms. Waibel wondered if the Board had the authority to reverse the grader's decision. Mr. Mlnarik stated it did before a formal hearing. Mr. Dalrymple asked Ms. Waibel to contact Ms. Douglas for the appeal procedures.

Mr. Palmer asked Mr. Dalrymple about the proper terminology for handling of administrative charges he was asked to get from the Attorney General office. Mr. Dalrymple stated he had not had a chance to ask Mr. Harris about this particular item. Mr. Harris stated he would prefer to put the answer in writing when he had had the chance to look at the rule change proposal.

Mr. Mlnarik asked Mr. Harris if there was any way he could attend the Board meetings; the Board needed legal advice from time to time throughout the meetings. Mr. Harris stated he could always be reached on the telephone. He also stated that if staff would let him know which issues the Board could foresee needing legal advice on ahead of the meeting, it would benefit the Board as well as himself--researched advice as opposed to spontaneous advice. Mr. Dalrymple suggested the Board write the Attorney General's office to request Mr. Harris' presence at Board meetings.

changes were made and these rules were taken out of the internal management area, they might be approved by the Attorney General's Office.

Mr. Harris defined "internal management" with: a statement which has no direct effect on a substance of a procedural right of the public.

VI. Other Business

Discussion and Action on Public Records

Mr. Harris stated that portions of applicants' files for registration were confidential, therefore, should remain in the Board office (transcripts, examination grading and performance records, letters of inquiry concerning applicants, Board inquiry forms concerning applicants). He stated that a copy of the original file should be sent for evaluation and the original retained in the office.

Mr. Mlnarik stated that it was burdensome for Board members from Tucson and Kingman to come to the Board office to evaluate files. He suggested continuing the procedure of evaluating files as it was now and retrieve applicants' files who wished to review them.

Mr. Harris stated he was just giving the Board legal advice.

Staff was directed to provide the Board with a method to facilitate handling of applicant's files for registration for evaluation without original leaving the office.

VII. Standing Committee Report

Legislative and Rules

Mr. Kesler stated that he and Mr. Dalrymple had met with Mr. Bill White of the Attorney General's Office and he had advised that R4-30-102 thru 105 were administrative functions and should not be in the rules. The option was to incorporate them.

Mr. Dalrymple elaborated by saying that he spoke to Mrs. Janice Rizer of the Arizona Society of Professional Engineers because she had suggested that they had been in contact with the Attorney General's Office and they were told that there was no move to take these rules out. From ASPE meeting minutes Mr. Dalrymple gathered that Mr. Harris was asked if he had initiated the move to which he replied no and that before he spoke any further he would have to talk to his client. Mr. White reviewed the rules. If changes were made and these rules were taken out of the internal management area, they might be approved by the Attorney General's Office.

Mr. Harris defined "internal management" with: a statement which has no direct effect on a substance of a procedural right of the public.

Mr. Mlnarik stated that the one rule of the most concern was R4-30-105 - Advisory Committees. The concern was that it might "get lost in the shuffle." Even though it exists in the codes it should remain in the rules so that it is perpetuated.

Mr. Harris suggested it be included as a policy statement in an appendix to the rules.

Mr. Mlnarik asked that Messrs. Harris, Dalrymple and Cella meet and see about incorporating this into the rules.

Mr. Mlnarik asked that Mr. Dalrymple furnish Mr. Cella the rules proposed changes and comments.

XI. Standing Committee Reports

A. Education and Examination

Mr. Palmer wondered whether letters to NCARB and CLARB had been sent with respect to their examinations as discussed at meeting of March 18. Mr. Mlnarik stated he misunderstood and thought Mr. Dalrymple was to write CLARB, however, he attended the CLARB regional meeting and the subject was discussed; it was not only Arizona's concern, but other states' as well. Mr. Allen stated he had not yet written NCARB, however, he had been in contact with Mr. Sam Balen and made him aware of the Board's concern. Mr. Mlnarik directed Mr. Dalrymple to write CLARB and Mr. Allen write NCARB within the next 30 days.

Mr. Palmer stated that he had met with the chairman of the structural examination writing committee. Nevada and Arizona were both concerned with lateral forces. He stated he would like to see the four-part structural examination given. He offered to contact Mr. Roger Benson to help with the writing of said examination.

Mr. Dalrymple was asked to contact the associations to see if they were interested in distributing certificates.

B. Budget

Mr. Dalrymple reported that there was \$8,500 surplus in Outside Professional Services area; \$2,300 deficit in Other Operating Expense area; \$300 deficit in In-State Travel and \$300 deficit in Out-State Travel. He was requesting a transfer of funds to balance out.

Mr. Palmer was requesting a written comparison of expenditures vs. budgeted figures. Mr. Dalrymple agreed to furnish the Board with updates.

## XVI. Other Business

## A. Discussion of Rules Definition of Construction Observation

Mr. Dalrymple stated he was working with some engineers to provide the Attorney General's office with a clear cut definition for a formal opinion on the need for construction observation on non-exempt projects. He stated he wanted the Attorney General's office to answer the question whether or not there is a requirement that construction observation be performed on non-exempt projects.

## B. Discussion and Action on Requests for Regrading of NCARB Exam

Mr. Allen stated that the examination review with the NCARB grader was a success.

## C. Discussion and Action on Travel Authorization for Executive Director to NCARB Meeting in June and CLEAR Conference in September

Mr. Kesler moved and Mr. Palmer seconded to authorize Mr. Dalrymple to attend the NCARB meeting in June and the CLEAR Conference in September and budget permitting, allow Mr. Motomatsu to attend CLEAR Conference also.  
MOTION CARRIED UNANIMOUSLY.

## D. Discussion and Action on Locations for Board Meetings

Mr. Kesler suggested that all Board meetings be held in Phoenix for staff's and Attorney General's convenience.

Mr. Jacobs thought it was important for the Board to go to the different locations of the state in order that the Board be seen. Mr. Allen agreed.

## E. Discussion and Action on Sanctions Adopted by the Board

Mr. Kesler stated that he had discovered that staff had a very comprehensive list of sanctions for disciplinary actions. He asked that copies be made available at next Board meeting.

Mr. Jacobs referred to C87-129 and thought that \$250 was too steep for lapsed registration and use of seal. Mr. Dalrymple stated that if the Board found that they had a valid excuse for not renewing their registration, it would not go to Enforcement.

F. Discussion of Registration of Nonactive Registrants

Mr. Jacobs stated that in past years the Board waived nonactive registrants' fees. He suggested that this practice be reinstated with provisions that the registrant must be 65 years of age with 25 years of consecutive registration in the state.

Mr. Mlnarik stated that the Board's concern was how to determine whether an individual earned more than \$10,000.

Mr. Jacobs felt registrants who practiced for that long earned his fee-free registration.

Mr. Dalrymple referred to A.R.S. 32-127.E.

Tabled til further information; on next meeting agenda.

G. Discussion of CLARB Region V Meeting Report

Mr. Mlnarik stated he and Mr. Dalrymple attended the meeting in Phoenix. There was a lengthy discussion on the contents of the exam. One state assigns proctors to individuals who are not in the direct supervision of a registrant. Mr. Dalrymple felt this should be kept in mind to take to the Legislature.

H. Discussion of NCEE Western Zone Meeting Report

Mr. Kesler stated that ACSM was petitioning for their own meeting within the Western Zone Meeting.

I. Discussion and Action of Acceptable Discussion During Telephone Conferences

Mr. Palmer stated that this was originated from Mr. Ludwig's case that neither Mr. Dalrymple or Mr. Motomatsu were present at the meeting where this action was taken. He felt that the only items to be discussed during telephone conferences are exam grades, registrations, evaluations, grant lists and meeting dates.

XXI. Lapsed Registrations - EXHIBIT F

Mr. Kesler moved and Mr. Palmer seconded to lapse registrations on the list. MOTION CARRIED UNANIMOUSLY.

Dear Mr. Douglas:

Expressed thanks to you and the Technical Board for arranging a Master Grader Order to come to Arizona. I would encourage this event to be annual and accessible to all failed division C candidates.

However, my conversations with the Master Grader on 5/13/88, has encouraged me to further pursue a formal appeal hearing before the Technical Board. A request for hearing has previously been filed.

Thank you for your time and consideration.

Sincerely,

*Terry C. Worcester*

VII. Other Business

A. Discussion and Action of Rule Changes

Mr. Mark Krieski and Dr. Ian Farmer, of the University of Arizona, were present to discuss geological engineering. Mr. Cella stated that all engineering branches definitions had been rewritten. Mr. Krieski stated there was a misconception that geological engineers are no longer involved in the design, location and development of specifications for railroads, highways, dams and building foundations. He went on to say that the City of Phoenix recognizes geological engineers as practicing soils engineers. Mr. Cella suggested Mr. Krieski submit his proposed wording for the definition of geological engineer and the Board would consider it.

B. Discussion and Action of Intern Architect Development Program

Mr. Ed Marley, Architect from Tucson, was present and stated he and Mr. Allen were to meet to develop language for the IDP. Mr. Allen stated both NCARB and AIA were very supportive of the program. ## D. Discussion and Action on Complaint Against APS

Mr. Palmer stated that his interpretation was that someone wrote an energy study report on how to reduce energy and then the client went to APS to get another version which did not coincide. Are the engineers who prepared this report offering engineering services to the public outside of the exemption granted to the utility companies and therefore be registered? Mr. Harris was asked to evaluate whether the report prepared by these engineers is exempt practice, what about the impact of the federal law requiring utility companies, and assuming registration is required, what about the obligation of the registrant to disclose what appears to be the conflict. ## 3. Formal Education:

My formal geological education considerably exceeds the requirements for registration, including MS and PhD degrees and several industry, professional society, and university short courses in geology. The preparation for, and teaching of, numerous geology courses at both undergraduate and graduate level in three universities has been an additional teaching experience.

## 4. Research and Publications:

I have authored or co-authored 38 technical papers, authored two books, and co-edited two other books, all of which were on subjects in Arizona geology.

JUSTIFICATION FOR REGISTRATION OF J.D. NATIONS AS A  
GEOLOGIST IN ARIZONA WITHOUT EXAMINATION

1. Compliance with Rule 4-30-207 (C) that defines evidence acceptable to the Board for registration without examination, including:
  - a. Completed application
  - b. Documentation of national certification forwarded directly by the Issuing bureau (AIPG)

2. Examination:

A score of 820 on the Advanced Geology Graduate Record Examination, which was at the top of the scale and in the 99th percentile during the year that it was taken. The GRE is a universally recognized, professional examination that is administered nationwide. I submit that this exam should be considered equivalent to those given by any state geologist registration board, especially since it is the only national examination available to evaluate the knowledge of graduate geologists.

I further submit that this meets the requirements of Board policy as stated in a letter dated April 3, 1987, by Ronald Dalrymple to Ted Eyde, then-President of the Arizona Section of AIPG, which states:

"If a holder of an AIPG certificate can demonstrate that examinations equivalent to the state geological registration examination have been passed, then the Board could waive the taking of the state examination."

Again, the word "could" is permissive and not mandatory, therefore I submit the additional following information as evidence of my qualifications for registration:

3. Formal Education:

My formal geological education considerably exceeds the requirements for registration, including MS and PhD degrees and several industry, professional society, and university short courses in geology. The preparation for, and teaching of, numerous geology courses at both undergraduate and graduate level in three universities has been an additional learning experience.

4. Research and Publication:

I have authored or co-authored 38 technical papers, authored two books, and co-edited two other books, all of which were on subjects in Arizona geology.

### 5. Professional Society Membership and Activities:

I have been a member and active participant in several professional geological societies, including the Geological Society of America, American Association of Professional Geologists, American Association of Petroleum Geologists, Society of Economic Paleontologists, Paleontological Society, International Paleontological Union, and the Arizona Geological Society. My activities include leading several geological field trips and responsibility for several technical symposia for meetings of these societies. I was co-chairman of the Technical Program Committee for the 1987 Annual Meeting of the Geological Society of America in Phoenix.

### 6. Professional Service:

I have served, as a geologist, on several state and national committees and commissions, the most notable of which are: the Arizona Oil and Gas Conservation Commission (1976-1991; Chairman, 1986-1990), and the Interstate Oil Compact Commission (1976-Present, Official Arizona Representative since 1979). I was recently invited by the Secretary of Energy to participate in a May, 1988 "Conference on International Energy Security" in Washington, D.C.

### 7. References:

Several letters of reference have been submitted by geologists registered in Arizona, who are aware of my professional experience and accomplishments that relate to my qualifications for registration.

### 8. Board of Regents Recognition:

I was recently selected by the Arizona Board of Regents as a "Regents Professor" of Geology, for my accomplishments and contributions to the science of geology during my professional career at Northern Arizona University.

IV. Public Comment

Mr. Gerald L. Michael stated his case was under Enforcement Matters and he chose to be present for its outcome. He mentioned that his case went before the Board once before at the August 26 meeting and at that time he was sent a Letter of Reprimand for answering "no" on his application under "Have you ever applied for registration

or had registration denied." He asked that the Board reconsider the matter because of the hindrance it had caused him and since of his own accord he had written the Arizona Board and told them that he thought he had filled out the application wrong.

C 87-179 BTR vs. Gerald L. Michael, L.S. #21077

Ms. Waxman moved and Mr. Palmer seconded to waive the disciplinary action previously taken by the Board and dismiss the case. 5 ayes, 1 nay. MOTION CARRIED.

VI. Other Business

A. Discussion and Action on Proposed Rule Changes

Mr. Mlnarik stated that the Rules Committee met November 22. The definition of "building" was discussed. It was decided to leave that definition as is. "Other similar structures" in that definition was now in question.

Claude Baker representing ACEA expressed their concern with the definition of "building." The word "building" as used in the definition of "practice of engineering" is general enough so that it is fully covered.

Charles Magadini, Structural/Civil Engineer, addressed the effect on the engineering profession that the definition of "building" would be; it would create friction.

Paul Scott with Caruso, Turley, Scott, stated that they wondered why the definition of "building" was only going to appear regarding engineers; they discussed applying it to architects and found it very difficult. Their conclusion was that trying to define "building" was too difficult to do.

Mr. Kesler spoke in support of taking the definition of "building" out.

Ms. Waxman stated she agreed with Mr. Scott in that she thought the intent of the definition was a generic one and not for engineers in particular.

Mr. Bernal asked why the definition was initiated.

Mr. Dalrymple stated he had originated the idea because there had been questions brought up in Enforcement Advisory Committees about what type of buildings engineers could design.

Mr. Bernal moved and Mr. Kesler seconded to remove the definition of "building" under R4-30-101 from the rules.

Mr. Kesler moved and Mr. Bernal seconded to allow the chairman to sign Letter of Concern. MOTION CARRIED UNANIMOUSLY.

Mr. Motomated stated these advertisements appeared in a booklet published by ASPE. The services on the first cards differ from the services offered in the advertisements. The Board felt that since current rule R4-30-301.A(10) permits engineers to practice in any branch of engineering in which they possess the education, technical knowledge and experience, that it would not be in the best interest of the public or the profession to restrict the engineer's ability to advertise services.

2. C 88-028 BTR vs. John J. Trummer, P.E. (Structural) #12528  
 Failure to apply the expected technical knowledge and skill by submitting deficient structural plans and calculations and affixing his seal and signature to plans not prepared by him or his bona fide employee - A.A.C. R4-30-301.A(3)(7)(10) and A.R.S. 32-125.C & A.R.S. 32-128.B(3)

#### B. Staff Actions

Mr. Motomatsu stated there were seven Letters of Concern sent out.

#### C. Advertising - Misrepresentation?

Mr. Motomatsu stated these advertisements appeared in a booklet published by ASPE. The services on the firm cards differ from the services offered in the advertisements. The Board felt that since current rule R4-30-301.A(10) permits engineers to practice in any branch of engineering in which they possess the education, technical knowledge and experience, that it would not be in the best interest of the public or the profession to restrict the engineer's ability to advertise services.

D. Suspension of Colorado License - Raymond E. Connin

Mr. Kesler stated that this was a similar case to the one presented earlier on Mr. Michael. Mr. Connin's license was suspended for six months in Colorado for being in the company of an applicant who was reviewing his exam and recorded some of the questions. Mr. Connin eventually reported this incident, however, not in a timely manner.

## X. Other Business

## A. Discussion and Action on Assistant Attorney General's Evaluation of Report by APS Engineer

Mr. Harris' stated that his review of the report lead him to conclude that it was in fact the practice of engineering. The report, however, was not exempt within the meaning of 32-144.B; the provision states that the work being done cannot be offered directly to the public. He did not find any facts that suggested that pre-emption might apply and the conflict of interest issue was not founded.

Mr. Palmer moved and Mr. Bernal seconded that a case be opened and be brought back to the Board for action. MOTION CARRIED UNANIMOUSLY.

XIX. Other Business

A. Discussion and Action on Board Guidelines on Disciplinary Sanctions

Mr. Kesler stated this item had originated from comments made at a meeting several years ago. Some of the Board members felt that the Board was not being fair or consistent in the application of sanctions. A "Decision Logic Table" was passed out for review and comments. These are the standard penalties for the various offenses assuming a first-time incident.

B. Discussion and Action on Proposed Rule Changes

1. Geological and Geophysical Engineer Definitions

Dr. O'Bannon stated that he recommended Mark Krieska's description of geological and geophysical engineering.

Mr. Kesler moved and Ms. Waxman seconded to accept the definitions of geological and geophysical engineer as presented. MOTION CARRIED UNANIMOUSLY.

Mr. Mlnarik moved and Mr. Kesler seconded to accept the wording as contained on page 51 of the AIDP. MOTION CARRIED UNANIMOUSLY.

### 5. NCEE Structural Exam Acceptance

Mr. Palmer stated he had proposed to the Board that it use the NCEE Structural Engineering Examination in lieu of what had been used and that certain seismic questions be required to be answered. It was recommended that the examination be reviewed by the Structural Engineering Committee. The Committee responded saying that it is an outstanding step forward for the Board and they highly recommend that this procedure be adopted.

Mr. Palmer moved and Mr. Bernal seconded to use the NCEE Structural Engineering Examination. MOTION CARRIED UNANIMOUSLY.

## 6. Possible Need for Other Modifications

Ms. Waxman moved and Mr. Bernal seconded to adopt a provision similar to the IDP on page 51 which would allow the Board to permit an applicant who has successfully satisfied the requirements of an intern program, when adopted by the Board, to qualify for the in-training and/or professional examinations.
