MEMORANDUM FOR: Member Board
National Council of Examiners for Engineering
and Surveying

SUBJECT: Summary Performance Data and the Subject Matter Report
for the Fundamentals of Engineering Examination -
October 1992 Administration

FROM: Judy Green, Associate Program Director

SUMMARY PERFORMANCE DATA

Enclosed is one set of reports based on examinees tested at the October 1992 administration. These reports provide information concerning the performance of examinees in the different content areas of the Fundamentals of Engineering Examination; one report includes only those examinees tested for your Board and the other includes all examinees tested at the administration (All Examinees Combined). Questions (items) in the morning test are classified into 10 different content areas; questions in the afternoon test are classified into 5 content areas.

Only examinees who indicated one engineering discipline in response to the question:

"If you are a graduate of or enrolled in an engineering curriculum, please fill in ONE of the following circles to indicate your major undergraduate curriculum."

are included in these statistics; those who indicated more than one discipline or who did not respond to the question are not included.

The two reports are organized by content area. They show, first, the name of the content area and the number of items in that area. Then they present, for all examinees combined and for each of the 16 different disciplines, the three statistics described below:

- 1. **AVG P VALUE:** This is the arithmetic average of the percent of correct responses (P) for each of the items in the content area. Essentially, this figure is a measure of the relative difficulty of the content area for the examinee group shown.

SUMMARY PERFORMANCE DATA

Enclosed is one set of reports based on examinees tested at the October 1992 administration. These reports provide information concerning the performance of examinees in the different content areas of the Fundamentals of Engineering Examination; one report includes only those examinees tested for your Board and the other includes all examinees tested at the administration (All Boards Combined). "If you are a graduate of or enrolled in an engineering curriculum, please fill in ONE of the following circles to indicate your major undergraduate curriculum:"

are included in these statistics; those who indicated more than one discipline or who did not respond to the question are not included.

The two reports are organized by content area. They show, first, the name of the content area and the number of items in that area. Then they present, for all examinees combined and for each of the 18 different disciplines, the three statistics described below:

1. AVE P VALUE: This is the arithmetic average of the percent of correct responses (P) for each of the items in the content area. Essentially, this figure is a measure of the relative difficulty of the content area for the examinee group shown.

- 2. **STAND DEV:** This is the standard deviation of the distribution of P values for all items in the content area computed for the examinees in the discipline shown. It gives an indication of how widely the various items in the content area vary in difficulty for this group of examinees; smaller SD's indicate all P values within the content area are very similar; larger SD's indicate that the P values vary for each item.
- 3. **# EXAMINEES:** This is the number of examinees upon which the above values are based; that is, the number of examinees in the discipline shown answering the items in the content area.

SUBJECT MATTER REPORT

If candidates entered the two-digit code for their institution in Item 13 on their Morning Session answer sheets, then the Subject Matter Report is enclosed. Note that the major may be blank because some candidates did not indicate their majors on their answer sheets. Special code 99 designates those examinees who did not enter a special code.

Please let us know if you have any questions.

INTRODUCTION

The charge given a Building Official is very similar to that of the Board of Technical Registration. Both are charged by law with safeguarding the life, health and welfare of Arizona citizens by assuring the adequacy of buildings constructed in this State.

Although the charge is similar, the approach must differ. Building Officials review construction documents, issue building permits, inspect construction of new buildings and monitor existing structures for code compliance. The Board of Technical Registration assures the public that only those who have met minimum standards may plan, design and provide construction observation services for nonexempt structures and related improvements. We rely on you, the Building official, to help enforce the laws governing the practice of architecture, engineering, landscape architecture and land surveying in Arizona. Building Officials may, in turn, rely on the Board of Technical Registration as a source of information and support.

This reference manual is intended as a source of ready information for Building Officials.

THE PRACTICE OF ARCHITECTURE, ENGINEERING, LANDSCAPE ARCHITECTURE, AND LAND SURVEYING

ARCHITECTURE:

A.R.S § 32-101.B(3) states: In this chapter, unless the context otherwise requires:

3. "Architectural practice" means any service or creative work requiring architectural education, training and experience, and the application of the mathematical and physical sciences and the

principles of architecture and architectural engineering to such professional services or creative work as consultation, evaluation, design and review of construction for conformance with contract documents and design, in connection with any building, planning or site development. A person shall be deemed to practice or offer to practice architecture who in any manner represents himself to be an architect, or holds himself out as able to perform any architectural service or other services recognized by educational authorities as architecture."

Approximately 61% of the nearly 4,300 registered architects in Arizona do not live in Arizona, although they may practice here. Out-of-state architects must hold Arizona registration to legally practice in this State.

ENGINEERING:

A.R.S § 32-101.B(9) states: In this chapter, unless the context otherwise requires:

- 9. "Engineering practice" means any professional service or creative work requiring engineering education, training and experience and the application of special knowledge of the mathematical, physical and engineering sciences to such professional services or creative work as consultation, research investigation, evaluation, planning, surveying, as defined in paragraph 19, subdivisions (d) and (e), design, location, development and review of construction for conformance with contract documents and design, in connection with any public or private utility, structure, building, machine, equipment, process, work or project. Such services and work include plans and design relating to the location, development, mining and treatment of ore and other minerals. A person shall be deemed to be practicing or offering to practice engineering if he practices any branch of the profession of engineering, or by verbal claim, sign, advertisement, letterhead, card or any other manner represents himself

to be a professional engineer, or holds himself out as able to perform or does perform any engineering service or other service or recognized by educational authorities as engineering. A person employed on a full-time basis as an engineer by an employer engaged in the business of developing, mining and treating ores and other minerals shall not be deemed to be practicing engineering for the purposes of this chapter if he engages in the practice of engineering exclusively for and as an employee of such employer and does not hold himself out and is not held out as available to perform any engineering services for persons other than his employer."

LAND SURVEYING:

There are approximately 11,000 registered professional engineers in Arizona. Nearly 56% live outside this State, but may practice here. Out-of-state engineers must hold registration in Arizona to legally practice in this State.

LANDSCAPE ARCHITECTURE:

A.R.S. § 32-101.B(16) states: In this chapter, unless the context otherwise requires:

- 16. "Landscape architectural practice" means the performance of professional services such as consultations, investigation, reconnaissance, research, planning, design, or responsible supervision in connection with the development of land and incidental water areas where, and to the extent that the dominant purpose of such services is the preservation, enhancement or determination of proper land uses, natural land features, ground cover and planting, naturalistic and esthetic values, the settings and approaches to buildings, structures, facilities, or other improvements, natural drainage and the consideration and the determination of inherent problems of the land relating to erosion, wear and tear, light or other hazards. This practice shall include the location and arrangement of such tangible objects and features as are

incidental and necessary to the purposes outlined in this paragraph, but shall not include the making of cadastral surveys or final land plats for official recording or approval, nor mandatorily include planning for governmental subdivisions."

There are approximately 500 registered landscape architects in Arizona. Nearly 46% live outside this State, but may practice here. Out-of-state landscape architects must hold registration in Arizona to legally practice in this State.

LAND SURVEYING:

A.R.S. § 32-101.B(17) states: In this chapter, unless the context otherwise requires:

- 17. "Land surveyor" means a person who by reason of his knowledge of the mathematical and physical sciences, principles of land surveying and evidence gathering acquired by professional education or practical experience, or both, is qualified to practice land surveying as attested by his registration as a land surveyor. A person employed on a full-time basis as a land surveyor by an employer engaged in the business of developing, mining or treating ores or other minerals shall not be deemed to be engaged in land surveying practice for purposes of this chapter if he engages in land surveying practice exclusively for and as an employee of such employer and does not hold himself out and is not held out as available to perform any land surveying services for persons other than his employer.

There are approximately 2300 registered land surveyors in Arizona. Nearly 60% live outside this State, but may practice here. Out-of-state land surveyors must hold registration in Arizona to legally practice in this State.

DEFINITIONS

EXEMPT BUILDINGS: The Technical Registration Act provides an exemption from the requirement of registration for the design, alteration or enlargement of some buildings; their engineering systems and related site design. The exemption Statute is A.R.S. § 32-144.

A.R.S. § 32-144.

A. Architecture, engineering, geology, assaying, landscape architecture or land surveying may be practiced without compliance with the requirements of this chapter by:

1. An officer or employee of the United States, practicing as such.
2. An employee of a registrant or of a person exempt from registration, if such employment does not involve direct responsibility for design, inspection or supervision.
3. A nonregistrant who designs, alters or adds to a detached single family dwelling.
4. A nonregistrant who designs a one or two story building or structure in which the square footage of floor area measured to the outside surface of the exterior walls does not exceed three thousand square feet and not intended for occupancy by more than twenty persons on a continuous basis and in which the maximum span of any structural member does not exceed twenty feet unless a greater span is achieved by the use of wood or steel roof or floor trusses or lintels approved by an engineer registered by the Board.

- 5. A nonregistrant who designs additions or alterations to a one or two story building or structure subject to the limitations set forth in paragraph 4. A nonregistrant may exceed the maximum three thousand square foot limitation set forth in paragraph 4 for a one-time single addition not exceeding one thousand five hundred square feet as measured to the outside surface of the exterior walls designed, for the purpose of storage of chattels.
- 6. A nonregistrant who designs a water or wastewater treatment plant, or extensions, additions, modifications or revisions, or extensions to water distribution or collection systems, if the total cost of such construction does not exceed five thousand five hundred dollars.
- 7. A nonregistrant who designs buildings or structures to be erected on property owned or leased by him or by a person, firm or corporation, including a utility, telephone, mining or railroad company, which employs such nonregistrant on a full-time basis, if the buildings or structures are intended solely for the use of the owner or lessee of the property, are not ordinarily occupied by more than twenty people, are not for sale to, rental to or use by the public and conform to the building code adopted by the city, town or county in which the building is to be erected or altered.
- 8. A nonregistrant who provides horticultural consultations or prepares planting plans for plant installations.

B. The requirements of this chapter shall not apply to work done by any communications

common carrier or its affiliates or any public service corporation or manufacturing industry or by full-time employees of any of them, provided such work is in connection with or incidental to the products, systems or non-engineering services of such communications common carrier or its affiliates or public service corporation or manufacturing industry, and provided that the engineering service is not offered directly to the public.

NONEXEMPT All structures, other than those specifically identified in A.R.S. § 32-144, are considered NONEXEMPT structures.

The preparation of construction documents for nonexempt structures is considered the practice of architecture or engineering and may be undertaken only by Arizona registered architects or professional engineers or an Arizona registered landscape architect in accordance with A.R.S. § 32-143 (Necessary and Incidental Practice).

The preparation of landscape architecture design documents associated with nonexempt structures is considered the practice of landscape architecture and may be undertaken only by Arizona registered landscape architects or registered architects or professional engineers in accordance with A.R.S. § 32-143 (Necessary and Incidental Practice).

NOTE: A Municipality may utilize requirements more stringent than the State law in determining what a "nonexempt" structure is or when a registrant must be used on a project. Any dispute relating to the use of more stringent criteria would be handled at the local level.

STRUCTURE As used in the act, means any constructed or designed improvement or improvements to real property including all on-site improvements, fixed equipment and landscaping, pursuant to an engagement or project.

SQUARE FOOTAGE LIMITATION When determining if a structure exceeds the 3,000 square feet of floor area limitation, the total amount of floor area is utilized. As an example, a two story structure with 2,000 square feet of floor area on each floor would have a total amount of floor area of 4,000 square feet and would be nonexempt. Measurements are taken from outside wall to outside wall.

OCCUPANCY LIMITATION: As identified in A.R.S. § 32-144.

CONTINUOUS BASIS: The phrase "on a continuous basis" as used in A.R.S. § 32-144.A.(4) is interpreted to mean whenever the structure is being used for its primary purpose.

CONSTRUCTION DOCUMENTS: Construction documents are usually composed of plans, drawings, details, specifications and occasionally other contract documents. Construction documents must bear the stamp of a registered architect or a registered professional engineer when the project involves a nonexempt structure. Construction documents for landscape architecture plans must bear the stamp of a properly registered professional landscape architect or architect or engineer in accordance with A.R.S. § 32-143 (Necessary and Incidental Practice).

SHOP DRAWINGS: Drawings and descriptions of components or systems supplied by subcontractors or manufacturers for inclusion in the project or structure are considered shop

drawings. UNSTAMPED SHOP DRAWINGS SHOULD NOT BE ACCEPTED IN LIEU OF CONSTRUCTION DOCUMENTS, they are only support documents used to clarify the construction documents.

SUPERVISION: (Design) In accordance with A.R.S § 32-125 and R4-30-101 all work bearing the stamp and signature of an architect, engineer, landscape architect or land surveyor must have been prepared by or under the architect, engineer, landscape architect's or land surveyor's direct supervision--which means, a registrant's critical examination, and evaluation, of the work product for purposes of compliance with applicable laws, codes, ordinances and regulations pertaining to the registrant's professional practice.

OBSERVATION: (Construction) The observation of construction, as related to the practice of architecture, engineering and landscape architecture in Arizona, is to insure conformance with contract documents and design.

Construction Observation of nonexempt projects is the practice of architecture, engineering or landscape architecture and may be provided only by Arizona registered professionals, or their bona fide employees.

Review of construction for conformance with construction documents bearing the stamp and signature of an Arizona registered architect, engineer or landscape architect is the practice of architecture, engineering or landscape architecture and may only be performed by a qualified

registrant or a bona fide employee working under the direct supervision of a qualified registrant. If a building official or inspector believes that construction observation is being performed by any person not authorized to do so, the Board would appreciate immediate notification.

NOTE: Currently, there is no wording in the law which requires compliance with professionally prepared construction documents or even requires a level or standard of quality in construction methods. The only way of monitoring compliance with construction documents is through adequate observation during the construction phase by a design professional.

If an architect, engineer or landscape architect's professional judgment is overruled under circumstances where the life, health and welfare of the public may be endangered, he or she must inform the responsible party of the possible consequences and if remedial action is not taken within a reasonable time, notify the appropriate Building Officials and the Board of Technical Registration. (R4-30-301.A(14))

PROFESSIONAL STAMP: Every registered architect, engineer or landscape architect is required by Arizona law to obtain a stamp bearing his or her name and complying with the requirements of R4-30-303. Following is the stamp criteria.

SECURING SEALS

R4-30-303

- A. Each registrant shall secure and use a rubber stamp one and one-half inches in diameter

identical in style, size and appearance to the sample shown in Appendix F. (Sample of the seal is attached to this manual) The upper portion of the annular space between the second and third circles shall bear whichever of the following phrases is applicable to the registrant:

"Registered Architect"; "Registered Professional Engineer" together with the branch of engineering in which registered; "Registered Geologist"; "Registered Landscape Architect"; "Registered Land Surveyor"; or "Registered Assayer".

At the bottom of the annular space between the second and third circles shall appear the inscription "Arizona, U.S.A."; the inner circle shall contain the name of the registrant, registration number and the words "date signed".

- B. The registrant may order the seal through any vendor and shall pay the cost of its manufacture. Immediately upon receipt of the seal and prior to using the seal for any purpose, the registrant shall file with the Board, for its records, on a form provided by the Board, an imprint of the seal with an original signature superimposed over it and an affidavit regarding the use of the seal. The Board, within ten working days of receipt of the form from the registrant, shall disapprove any seal not meeting the exact specifications of Subsection A. of this Rule and shall require the registrant to obtain and pay for another seal meeting those specifications prior to sealing any work. Engineers registered in more than one branch shall secure and use a seal for each branch of engineering in which registration has been granted. No additional or replacement seal shall be ordered or obtained by a registrant without first providing the Board, for its records, a sworn statement attesting to the need and purpose and following the procedures set forth in this Subsection for securing seals.

NOTE: Most stamps today are made of plastic and even though the current rule specifies the seal as rubber, the Board recognizes that it may actually be made of plastic. The rule is being reviewed and will probably be revised to recognize the reality of plastic seals.

USE OF SEALS

R4-30-304.

A. A permanently legible imprint of the registrant's seal and signature shall appear on each sheet of drawings or maps or on one sheet of several master sheets used for reproduction into a single sheet of finished drawings or maps; on the cover or title page or index page of each set of specifications; on the cover and index page of details bound in book form and prepared specifically to supplement project drawings or maps; and on the cover or index page or table of contents of reports, specifications and other professional documents prepared by a registrant or his bona fide employee. A label shall be applied to all video cassettes containing copies of professional documents which shall contain the name of the project, project identification, and an original imprint of the registrant's seal and signature. All such materials shall be sealed prior to submittal to the client, unless specifically marked as "Preliminary - Not for Construction or Recording " and, in all cases, shall be sealed prior to submittal to any regulatory or review body. Shop drawings requiring professional services or work as described in the Act shall require the seal and signature of an appropriate Arizona registrant. Examples of shop drawings not requiring seals are those showing only:

- 1. Sizing and dimensioning information for fabrication purposes; or

- 2. Construction techniques or sequences; or
- 3. Components with previous approvals or designed by the registrant of record; or
- 4. Modifications to existing installations not affecting the original design parameters and which do not require additional computations.

B. The original of the documents described in Subsection A. of this Section shall include an original seal imprint, an original signature and the date the document was sealed. The signature shall cross the seal in a manner that does not obscure the registrant's name or registration number. No other material such as a "stick-on" will be permitted.

NOTE: CAD generated seals are not permitted.

NOTE: SOME OLD STYLE STAMPS ARE STILL BEING USED. IF THERE IS A QUESTION, BOARD STAFF WILL BE PLEASED TO ASSIST THE BUILDING OFFICIAL IN DETERMINING IF A STAMP IS VALID.

Registered architects, engineers and landscape architects are required to place their stamp and signature on all construction documents they prepare whether the project or structure is exempt or nonexempt.

CHECK LIST FOR ISSUANCE OF BUILDING PERMIT

To assure construction documents meet the requirements of the laws governing the practice of architecture, engineering or landscape architecture it may be helpful to develop a check list similar to the following:

1. **ARE THE PLANS PROPERLY IDENTIFIED?**

The title block of all plans and specifications should contain:

- a. The project name and location, and
- b. The name and address of the person responsible for the preparation of the documents.

2. **DO THE PLANS AND SPECIFICATIONS REQUIRE PREPARATION BY A REGISTERED PROFESSIONAL (ARCHITECT/ENGINEER/LANDSCAPE ARCHITECT)?**

In most instances, plans and specifications for **EXEMPT** structures may, under the law be prepared by anyone. Building officials may want to use a declaration of exemption that the applicant completes to assist in determining whether the services of a registrant are needed see **(????)** for an example of such a form. However, under certain circumstances a Building Official may feel the need for, and require, the services of a registered architect, registered professional engineer or landscape architect even for exempt structures, or landscape architecture projects.

Plans and specifications for **NONEXEMPT** structures may be prepared **only** by Arizona registered architects, registered professional engineers or registered landscape architects in

accordance with A.R.S. § 32-143 (Necessary and Incidental).

3. **IF THE PLANS ARE FOR A NONEXEMPT PROJECT, DO THEY BEAR THE STAMP(S) AND SIGNATURE(S) OF ARIZONA REGISTRANTS?**

It is common for construction documents to contain drawings prepared by several professionals (i.e., architect, structural engineer, mechanical engineer, landscape architect, etc.). Drawings will be stamped by the professional responsible for their preparation. Therefore, one set of construction documents may contain several drawings each bearing the stamp and signature of the appropriate Arizona registered professional.

NOTE: Unstamped shop drawings that do not contain design information not covered in the design drawings may be inserted into the plan set and the shop drawings do not have to be stamped or signed.

MOST COMMONLY ASKED QUESTIONS

4. **ARE THE PLANS AND SPECIFICATIONS ADEQUATE?**

Plans and specifications must comply with the State, municipal and county laws, codes, ordinances and regulations. Suggested minimum construction documents should include:

- a. PLOT PLAN, showing proposed building and/or additions, dimensioned location of all property lines and any existing buildings on the property, locations of all street frontages and dimensions of property lines;

- b. FLOOR PLAN of each floor, including basement and foundations, showing use of all rooms or areas and the size and locations of all wall openings and stairs;
- c. EXTERIOR ELEVATIONS of at least three views, showing all pertinent vertical dimensions;
- d. CROSS SECTION, showing covering materials for all surfaces, such as roofing, ceilings, interior and exterior walls and projections, such as eaves; and
- e. Additional DRAWINGS AND DETAILS as needed to clarify site drainage, structural, mechanical, plumbing, electrical, etc.
- f. SPECIFICATIONS on the drawings or separate sheets, covering materials and methods of construction, wall finishes and all pertinent equipment.

MOST COMMONLY ASKED QUESTIONS

The following questions are representative of those received from Arizona Building Officials. The responses are based on Board interpretations and Arizona Attorney General Opinions.

1. HOW DO I MEASURE THE SQUARE FOOTAGE OF THE FLOOR AREA TO DETERMINE WHETHER THE STRUCTURE IS EXEMPT OR NONEXEMPT?

The floor area is determined by measuring from outside wall to outside wall. This, in

combination with the number of floors will give you the total floor area.

- 2. HOW DO I FIGURE THE FLOOR AREA FOOTAGE TO DETERMINE WHETHER A BUILDING IS EXEMPT OR NONEXEMPT IF THE BUILDING IS DIVIDED BY AN OPEN WALKWAY (BREEZEWAY), BUT HAS ONE CONTINUOUS ROOF?

The common roof creates the structural elements of a single building, and the square footage would be the sum of the two segments of the structure.

- 3. IF A BUILDING HAS A FLOOR AREA LESS THAN 3,000 SQUARE FEET BUT IS INTENDED FOR OCCUPANCY BY MORE THAN 20 PERSONS ON A CONTINUOUS BASIS, IS IT AN EXEMPT STRUCTURE?

No. Both limitations apply under the law, and a building may not exceed either the floor area limitation or the occupancy limitation. (A.R.S. § 32-144.A(4))

- 4. IF SINGLE ADDITION IS PROPOSED TO AN EXEMPT STRUCTURE BRINGING THE TOTAL FLOOR AREA TO GREATER THAN 3,000 SQUARE FEET, MUST THE PLANS FOR THE ADDITION BE PREPARED BY A REGISTERED PROFESSIONAL?

Not necessarily. The total floor area of the structure (the addition plus the existing building) and the purpose of the addition must be considered in determining whether the addition is exempt or nonexempt. (A.R.S. § 32-144.A(5))

- 5. DOES SEPARATION BY A FOUR-HOUR FIRE WALL MAKE ONE STRUCTURE INTO TWO SEPARATE BUILDINGS, AND THEREFORE AN EXEMPT STRUCTURE IF EACH SECTION IS LESS THAN 3,000 SQUARE FEET?

No. A four-hour fire wall, by itself, does not make two separate buildings. As long as the building is one continuous structure, it must be considered one building; and therefore, would be subject to the size limitations.

6. DO SHOP DRAWINGS HAVE TO BE STAMPED AND SIGNED?

Yes if: They contain design information not covered in the design drawings, i.e. structural design, fire sprinkler design, etc.

No if: They do not contain design information and are only included as supporting documents to the design drawings.

7. IF A DESIGNER OR OWNER PREPARES PLANS FOR A NONEXEMPT BUILDING AND APPLIES FOR A BUILDING PERMIT, SHOULD YOU, THE BUILDING OFFICIAL, SUGGEST THEY CONTACT AN ARCHITECT OR ENGINEER TO HAVE THE PLANS AND SPECIFICATIONS REVIEWED AND STAMPED?

No. Such action on the part of an architect or engineer would be contrary to law and would put the professional's license in jeopardy. An Arizona registered professional shall stamp and sign only that which was prepared under their direct supervision. The applicant would have to contract with a registered professional for full professional services rather than review and stamping.

8. IS AN ARCHITECT, ENGINEER OR LANDSCAPE ARCHITECT REQUIRED TO PROVIDE CONSTRUCTION OBSERVATION DURING THE CONSTRUCTION PHASE OF NONEXEMPT PROJECTS?

No, however, any person, other than a qualified registrant or the bona fide employee of a qualified registrant working under the direct supervision of the registrant, initiating changes to stamped architecture, engineering or landscape architecture plans would be practicing architecture, engineering or landscape architecture & committing a criminal act.

9. WHO MAY ISSUE CHANGE ORDERS AND ADDENDA TO CONSTRUCTION DOCUMENTS FOR NONEXEMPT PROJECTS?

Although nonregistered employees of architectural, engineering or landscape architectural firms may initiate change orders and addendum to construction documents, involving the practice of architecture, engineering or landscape architecture these must bear the signature of a registered architect, engineer or landscape architect who will be responsible for the subsequent changes. Change orders in the form of additional drawings must bear both the stamp and the signature of a registrant.

EXCEPTIONS will occur when the original architect, engineer or landscape architect has been removed from the project and replaced by the owner, where the original registrant has left the firm or where another registrant has been retained to observe construction and initiate and sign change orders.

In no instance should a change order or addenda involving the practice of architecture, engineering or landscape architecture be issued and signed by an unregistered individual for change to original design documents for nonexempt projects.

10. MAY A REGISTRANT PREPARE PARTS OF A SET OF PLANS THAT ARE OUTSIDE HIS/HER CATEGORY OF REGISTRATION?

A registrant may prepare parts of a set of non-public works project plans that are outside his/her category ONLY IF those parts are necessary and incidental to the work of the registrant's profession on that project AND the registrant is personally qualified to perform the work (A.R.S. 32-143).

A.R.S. 32-143 does not apply if the project is a public works project (funded with public monies.) A.R.S. 32-142 requires professional work on a public works project in each covered discipline to be performed by a registrant in that discipline or an employee working under the direct supervision of the registrant.

11. WHAT IS MEANT BY "NECESSARY AND INCIDENTAL" IN A.R.S. 32-143?

Something is "Necessary" in a set of plans if it is needed to fully complete the project and it is "Incidental" if it is related to the registrant's professional practice, but not a recognized part of the registrant's area of registration.

12. IS IT PERMISSIBLE FOR A REGISTRANT TO "SECOND SEAL" A SET OF PLANS ORIGINALLY PREPARED BY AN OUT OF STATE REGISTRANT?

Plans that were originally prepared by an out of state registrant may be second sealed by an Arizona registrant ONLY AFTER the Arizona registrant has thoroughly reviewed the plans and all the conditions of rule R4-30-301.A(3) have been met.

NOTE: The Arizona registrant will be held fully responsible for the quality of the plans.

13. SHOULD A BUILDING OFFICIAL ACCEPT A SET OF PLANS WHEN THE SIGNATURE SUPERIMPOSED OVER THE SEAL IS ONE MADE WITH A SIGNATURE STAMP?

No. The signature has to be an original signing.

14. MAY AN ENGINEER PREPARE PLANS THAT ARE OUTSIDE HIS/HER BRANCH OF ENGINEERING SPECIALTY?

Yes, (with one notable exception) as long as an engineer has the personal competency to perform engineering work in a specialty area other than the one designated on the seal.

EXCEPTIONS - design of structural members by those registered after the adoption date of December 18, 1991, for rule section R4-30-224(E), approved by the Attorney General.

15. MAY A BUILDING OFFICIAL REJECT PLANS THAT DO NOT MEET LISTED CODES?

Yes. A registrant shall comply with State, municipal and county laws, codes, ordinances, or regulations pertaining to the registrant's professional practice. (Rule R4-30-301.A(5))

16. DO DOCUMENTS SUBMITTED TO A GOVERNMENT AGENCY FOR REVIEW PURPOSES HAVE TO BE SEALED IF THEY ARE SUBMITTED AS PRELIMINARY OR CONCEPTUAL PLANS AND NOT AS COMPLETE FOR CONSTRUCTION

DOCUMENTS?

The board has determined that any document submitted to a government review agency which is the product of the registrant's professional knowledge, and is required by the agency before approval of a project, must be sealed and signed when submitted.

NOTE: It is suggested that the registrant stamp and seal the plans and also mark them "Preliminary - Not for Construction or Recording."

17. MUST TENANT IMPROVEMENT PLANS REQUIRING THE ISSUANCE OF A BUILDING PERMIT BE PREPARED BY A REGISTRANT?

Yes. If the work constitutes the practice of one of the covered professions, the plans must be sealed and signed before submittal.

18. MAY BUILDING OFFICIALS MAKE CHANGES TO A REGISTRANT'S PLANS?

Modifying plans that must be prepared by a registrant constitutes the practice of the profession and any modification of the plans by a non-registrant building official would constitute unlawful practice.

Modification of professional plans by a building official who is registered would constitute professional practice and all modifications must be sealed and signed by the registrant building official.

NOTE: The building official would then become responsible for the impact of the change on the design.

19. DO "PRE-ENGINEERED" STRUCTURAL COMPONENTS OR STRUCTURES (I.E. TRUSSES, BUILDINGS, ETC.) HAVE TO BE SEALED AND SIGNED BY AN ARIZONA REGISTRANT?

Yes, unless specifically exempted by law.

 - B. Mr. Hal Erickson addressed the Board regarding the land surveyor examination and the importance of passing the exam.
 - C. Mr. Roy Redmond addressed the Board regarding control system engineering. Mr. Elshoff asked him to define control system engineering, in the format of the Board's rules, and to submit it to the Board for consideration in the rules package.
 - D. Mr. Hugh Pace addressed the Board regarding continuing education.

OPEN SESSION MINUTES

ARIZONA STATE BOARD OF TECHNICAL REGISTRATION

FEBRUARY 26, 1993

1. CALL TO ORDER

The regular quarter annual meeting of the State Board of Technical Registration held at Rodeway Inn, 1365 W. Grant Road, Tucson, Arizona, was called to order by Elizabeth Wheat, Chairperson at 9:00 AM.

2. ROLL CALL

Ms. Gayle took roll call.

- PRESENT:
- Elizabeth Wheat, Chairperson
 - David L. Eberhart, Secretary
 - Stewart R. Palmer, Member, 11:05 AM
 - Michael J. Miller, Member
 - Irvin E. Finical, Member
 - Robin E. Parke, Member
 - Frank S. Turek, Member
 - Julianne C. Wheeler, Public Member
 - Ronald W. Dalrymple, Executive Director

6. Certificate of Experience Record and Reference Form

- a. Verify that engagement dates between this form and application are the same.
- b. Is supervisor registered in the same discipline as the applicant?

NOTE: Up to one year of experience under a registrant in another discipline is allowed under A.R.S. § 32-122.01.1.

- c. Was supervisor registered when applicant was employed?
- d. Is reference actually a supervisor or a co-worker, client or other? Supervisor must be a person who actually supervised the work during the work day. "Direct Supervision" means a registrant's critical examination, and evaluation, of the work product for purposes of compliance with applicable laws, codes, ordinances and regulations pertaining to the registrant's professional practice. Co-worker reference will only be acceptable when the supervisor cannot be located.
- e. If supervisor is not registered, the experience cannot be credited.
- f. Supervision by clients, or others is not acceptable.
- g. Review Work Description. Work must be acceptable as work in the discipline in which registration is sought.
- h. Work experience should be credited in Sub-Professional, Professional, Responsible Charge and Design.
- i. Check job title to verify the supervisor did, in fact, supervise the applicant.
- j. Some references indicate they supervised the work but, in fact, they were clients, co-workers or others and did not supervise on a daily basis during the full employment time.
- k. Rating Factors. Any rating adequate or higher will be acceptable as qualifying experience. Any single item below adequate should have been clarified by a staff request for additional written information from the supervisor/reference. If you are not satisfied with the response then a personal interview with the applicant may be considered.

7. Experience Satisfactory to the Board

- a. Architecture, must show experience in at least 4 of the 9 items listed in R4-30-212.B.

- b. Actively engaged as a professional registrant in another state, jurisdiction, territory or foreign country in the profession in which registration is sought for at least ten years (A.R.S. § 32-126.A.3.) Also see R4-30-207.A.2. except "recent" does not conform to the code A.R.S. § 32-126.A.3. and should not be considered.
 - c. Certification from a foreign country must be from a department of the government authorized to issue registration and registration was received as required by Arizona law.
 - d. Code A.R.S. § 32-126.A.1. requires that original registration requirements were "substantially identical to that of this state". Substantially identical should mean education, experience and testing was equal to what Arizona required at the time or original registration.
9. Registration that has lapsed in original state of registration. Person may be registered providing they meet Arizona requirements for registration.
10. Applicant has not been actively practicing for the last several years and wants registration in Arizona and is registered in another state. Evaluate applicant's current knowledge through review of additional information, obtain from supervisor or references through written or verbal information or through an oral interview.
11. Immediate supervisor is no longer at the company and applicant is unable to locate supervisor. Co-worker may be used as a reference if reasonable effort has been made to locate supervisor.
12. Company policy will not allow present-past supervisor to respond. Request information from other employment, if possible and/or request information from supervisor or co-worker by by-passing company and sending form directly to residence.
13. Applicant not practicing in original registration state, practiced in a state that does not require registration, become registered in another state and is currently practicing in that state.
- a. If passed National exam, person may be registered.
 - b. Practice over 10 years and registered in another state, person may be registered.
 - c. If registered by a local exam, exam may be evaluated and, if acceptable, person may be registered. Evaluation should be acceptable to a National organization responsible for writing similar examination.

LAND SURVEYOR APPLICATION REVIEW

Following are specifics for items not covered by General Comments regarding Land Surveyor:

A. Education

1. Use American Congress on Surveying and Mapping model surveying program and the NCEES proposed model surveying program as a base for comparison to the college transcripts.
2. Accept associate degree in science and technology fields as two years experience.
3. Two year liberal arts degrees are evaluated on semester hours.
4. For non-engineering or a non-surveying degree, 36 months credit may be possible.
5. Civil engineering degree, awarded 36 months, regardless of surveying courses.
6. Surveying course at American Institute/Lamson with proof - 6 months credit.
7. Sub-Professional, work as survey aide, instrument technician, drafter, or other similar position.
8. Experience as party chief or instrument technician credit time to professional survey if working as a two-man crew.
9. Determine the amount of construction staking. If difference in time from the same firm, time should be averaged.
10. Limited on no experience under military service unless doing land surveying. Artillery surveying is not land surveying.

Based on the scoring submitted by the two graders, appellant is entitled to passing scores on Sections 5 and 6.

This matter came on for hearing on May 5, 1993 in Phoenix, Arizona. The purpose of the hearing was to hear appellant's appeal from his failure to obtain a passing score on the CLARB landscape architect's examination given in June 1992. Appellant was present in person and represented himself. The Board was represented by William Albright, Assistant Attorney General.

During the testimony of the Board's expert witness' presentation regarding the candidate's examination, it appeared that appellant was not accorded the opportunity to have the relevant sections (Sections 5 and 6) of the examination re-graded, a procedure to which he was entitled.

The hearing was then recessed in order to allow Master Grader Don Campbell and grader David Brant, to review Sections 5 and 6 with a view towards whether those sections should receive passing scores.

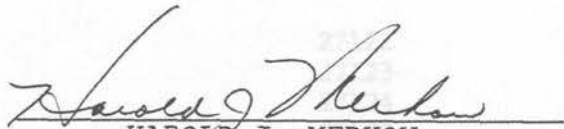

On May 13, 1993, Master Grader Campbell wrote to the Board and informed the Board that, after review, "we have found that the candidate has adequately presented sound

technical knowledge. He has, however, missed several critical points in different vignettes by overlooking key items of information which the grading criteria has weighed heavily". The two graders also submitted their scores to the Board.

Based on the scoring submitted by the two graders, appellant is entitled to passing scores on Sections 5 and 6 of the CLARB exam given in June 1992.

Accordingly, your undersigned recommends that the Board grant Timothy J. McQueen's appeal and register Timothy J. McQueen as a Landscape Architect in this State.

Respectfully submitted this 25th day of May 1993.
