Board Staff: Ron Dalrymple, LaVern Douglas, Kathryn Fuller, Melinda Baughman, Julie Ruff. Assistant Attorney General: Elizabeth (Lisa) Burns. Absent: Richard Pawelko, Gary Nelson. Absent for all but agenda items 12, 14 – 16: William Greenslade.
3. CALL TO THE PUBLIC – No members of the public addressed the Board under this agenda item.
4. ADOPTION OF MINUTES – Mr. Starling moved to accept the November 9, 2004 minutes with the following correction: Clarification of the agenda item numbers during which Mr. Pawelko and Mr. Nelson were absent as reflected on page 3. Seconded by Mr. Lane. MOTION CARRIED.
5. ENFORCEMENT MATTERS
 - A. Proposed Dismissals
 1. M05-111 / MIR03-250 Raymond S. Famas, R.L.S. #12005. Mr. Lane moved that the allegations be dismissed. Seconded by Ms. Cornelio. After discussion, MOTION CARRIED.
 2. M05-183 / MIR03-048 James Christian, P.E. (Civil) #22858. Mr. Starling moved to agree with the assessor's findings and recommendations and dismiss the case against Mr. Christian. Seconded by Mr. Lane. MOTION CARRIED.
 - B. Proposed Letters of Concern
 1. M05-160 / MIR03-285 William F. Brown, Certified Home Inspector #38549. Mr. Lane moved that a Letter of Concern be issued for failure to fully comply with the Arizona Standards of Professional Practice for Arizona Home Inspectors. Seconded by Mr. Starling. MOTION CARRIED.
 - C. Proposed Consent Agreements
 1. M05-013 / MIR02-075 Alexander J. Kory, P.E. (Civil) #10219. Mr. Roos moved to approve the consent agreement and order attached as attachment #6, for this agenda item. Seconded by Mr. Starling. After discussion, Mr. Roos withdrew his original motion. Mr. Roos then moved to not approve the consent agreement as drafted and instead seek the respondent's agreement to the following additions or changes to what has been presented, as follows:

a) Mr. Kory will successfully complete an appropriate 300 Level College Course in the area of Soil Mechanics within one year, with the curriculum of the course taken being pre-approved by one member of the Board.

b) The peer review will be modified to five retaining wall projects, with two projects being braced or anchored retaining walls.

Seconded by Mr. Starling. MOTION CARRIED.

2. M05-048 John Singer, Non-registrant. Mr. Lane moved to offer a consent agreement with an assurance of discontinuance, payment of a civil penalty of \$150.00 and payment of \$24.00 for the cost of investigation and not to approve the consent agreement in the Board materials. Seconded by Mr. Roos. After discussion, MOTION CARRIED.

3. M05-153 / MIR04-213 Brian T. Sauro, Non-registrant. 4. Recommendation for closure of professional registration or in-training designation.

Mr. Lane moved to accept the Evaluation Committee and staff recommendations #1 - #4. Seconded by Ms. Lyndes. MOTION CARRIED.

8. EXPIRED REGISTRATIONS TO BE LAPSED (List available at Board's office). Mr. Lane moved to accept the lapsed list. Seconded by Ms. Lyndes. MOTION CARRIED.

9. DIRECTOR'S REPORT

1) Geological Engineering Exam

The Board conducted a geological engineering examination workshop on December 11 at the Board office. Dr. Jack Warner guided the participants through the processes to validate the geological engineering examination that was administered in October and to expand the pool of items. Arizona and Idaho administered the examination in October. The State of Mississippi has indicated an interest in participating in the future development of the examination and the utilization of the examination.

2) Staff Training

Susan Skrzycki completed mediation training presented through South Mountain Community College this month. The training is a Maricopa County Justice Court training program and the presenter was a former Arizona Assistant Attorney General. Susan will start on the next phase of the program after the holidays. She will provide pro bono mediation services in sixteen Justice Court cases to complete her certification requirements. All investigators will be attending a class on Managing Multiple Priorities in the next month.

3) Rule Package Status Report

A. A Notice of Termination of Rulemaking regarding the Land Surveyor Rule R4-30-307, proposing the requirement for a written scope of services contract, was filed with the Secretary of State's office December 8, 2004.

B. The Notice of Rulemaking Docket Opening for proposed rule change R4-30-208, regarding work experience for an owner or co-owner of a business, was filed with the Secretary of State's office December 1, 2004.

C. Substantive Policy Statement, #9, regarding Monumenting Public Land Survey System Section or Quarter Section Corners, was filed with the Secretary of State's office on December 1, 2004.

D. The paperwork for amending Rules R4-30-201, R4-30-204 and R4-30-214, dealing with work experience for architect registration and examination qualifications is currently at the Governor's Regulatory Review Council (GRRRC) for an informal review.

10. BOARD CHAIR'S REPORT

No report was given.

11. STANDING COMMITTEE REPORTS

1. Legislation and Rules Committee – Mr. Tuttle explained that at the December 10, 2004 meeting, Mr. Starling and Scott Grainger spoke regarding researching a rule for full disclosure of accepting contingency fees as part of expert witness testimony. Mr. Pearson spoke regarding electronic seals and signatures. Both topics will be continuing agenda items. And there was an update of the rules packages.
2. Budget Committee – In process of negotiating with the budget analyst for the next two year budget to be acted upon by the next legislative session. The budget is a zero-growth budget, per the legislature. The Committee is waiting for a recommendation from the legislature to pass on to the Board.
3. Home Inspector Rules and Standards Committee – Tentative meeting is set for January 5, 2005.
4. Environmental Remediation Rules and Standards Committee – This Committee has not met as they are waiting for the Legislative Committee to convene.

12. BOARD MEMBER REPORTS ON OUTSIDE ACTIVITIES

1. National Council of Examiners for Engineering and Surveying (NCEES) – The next meeting for NCEES is in February 2005. The Western Zone Meeting, yearly meeting, May 19 – 21, 2005 in Anchorage, Alaska.
2. National Council of Architectural Registration Boards (NCARB) – No report.
3. Council of Landscape Architectural Registration Boards (CLARB) – Ms. Lyndes explained the problems associated with the computerization and validity of the (LARE) exam, re-taking and financial impact of tests. The recent CLARB report states that between the three different exams there was a 60% - 81% rate of passing the exam.
4. National Association of State Boards of Geology (ASBOG) – Mr. Greenslade provided a report to the Board. In the consideration of time, there was no discussion.

5. Geological Engineer Examination – Mr. Greenslade provided information regarding how the cut score was decided, based on only three people taking the exam. Each question is given a difficulty score. Because a Psychometrician is involved with the process, the exam and scores are defensible.
13. PROPOSED CHANGE TO RULE R4-30-208 (B)(6) - "The Board shall not credit as work experience more than one years' experience gained by an applicant who is a majority owner of the business entity that employs or contracts with the individual supervising the applicant's work."

Mr. Roos moved to terminate this rulemaking. Seconded by Ms. Cornelio. After discussion, MOTION CARRIED. Ms. Lyndes and Mr. Greenslade voted nay.

14. FUTURE BOARD MEETINGS – Approval of next meeting for Tuesday, January 18, 2005. Explore moving the December 2005 meeting to an earlier date.

15. FUTURE AGENDA ITEMS

- Discuss whether the Board wants to continue to review EIT applications for moral character.
- The practice of making firms responsible for renewing registration.
- The use of electronic seals and signatures.

16. ADJOURNMENT – Mr. Lane moved to adjourn at 12:08 p.m. Seconded by Ms. Lyndes. MOTION CARRIED.

D. Review of Administrative Law Judge Recommended Decision and Order

1. M05-055 Mojtaba Mir Mosallai, P.E. (Civil) #34671 – Scheduled for 9:30 a.m.

Ms. Burns spoke regarding the Board adopting the Administrative Law Judge's recommendation containing Findings of Fact and Conclusions of Law and a recommended order for revocation and assessment of all costs and attorneys fees expended as a result of the Administrative Hearing.

Mr. Mosalli spoke regarding issues other than the Recommended Decision and Order before the Board. He requested that the Board have the underlying matter reviewed by additional registrants. Ms. Burns objected to Mr. Mosalli's collateral attack of the underlying order, rather than the issues present in the case before the Board. Further statements were made by Ms. Burns and Mr. Mosalli, which was followed by Board discussion.

Mr. Starling moved to adopt the Finding of Facts and Conclusion of Law as written by the Administrative Hearing Board recommending revocation. Mr. Nelson seconded. Further discussion was held and questions were asked of Ms. Burns and Mr. Mosalli. Mr. Pearson called for a vote on the current motion. MOTION CARRIED.

Mr. Starling moved for the Board to accept the recommended decision and Order of the Administrative Law Judge as written. Mr. Nelson seconded. MOTION CARRIED.

Mr. Mosalli questioned the effect of the Board's decision. Mr. Pearson asked Ms. Mangiapane to explain this and the process of the case from this point, which she did.

6. EVALUATION OF APPLICATIONS FOR EXAMINATION AND/OR POSSIBLE GRANTING OF REGISTRATION OR CERTIFICATION

A. Home Inspector Certification

1. Rod Phipps, Application #041485. Mr. Lane moved to grant certification upon payment of applicable fees within 30 days, which if not paid will result in denial of certification. Seconded by Mr. Greenslade. After a brief statement by Mr. Phipps, MOTION CARRIED.
2. William Maher, Application #041464. Mr. Roos moved to grant certification upon payment of applicable fees within 30 days, which if not paid will result in denial of certification. Seconded by Mr. Greenslade. MOTION CARRIED.
(Mr. Pawelko not present for vote.)
3. Jason Dunlock, Application #041436. Mr. Pawelko moved to grant certification upon payment of applicable fees within 30 days, which if not paid will result in denial of certification. Seconded by Mr. Roos. After a brief statement from Mr. Dunlock, MOTION CARRIED.
4. Joseph Mendosch, Application #041701. Mr. Greenslade moved to grant certification upon payment of applicable fees within 30 days, which if not paid will result in denial of certification. Mr. Pawelko seconded. After a brief statement from Mr. Mendosch, MOTION CARRIED.

**Director's Report
February 2005**

Staff Training

Lori Evans is be attending the Arizona Basic Regulatory Investigation Course that started on February 9.

All investigators attended a class on Managing Multiple Priorities last month.

Rule Package Status Report

R4-30-201, 204, & 214. The GRRC courtesy review has been completed by the GRRC attorney and the package was sent to the Secretary of State for publication on 3-21-05.

The GRRC attorney advised that a public hearing date be set at the time of the publication. The public hearing date was set for 0900, 5-17-05 which is the date and time of the May Board meeting. If no challenge is heard at that meeting, the package will be sent to GRRC and a public hearing before GRRC will be scheduled.

R4-30-208. A docket has been opened and will remain open for one year from the date of opening (12-27-04). If the Board has not filed a notice of proposed rule making by that date the docket will automatically terminate.

Legislation

HB2223 [Contractor Licensing Exemption] Scheduled to be heard by the Senate Committee on Rules 3-28-05. No amendments.

HB2225 [P.E. designation and As-Built plans] Scheduled to be heard by the Senate Committee on Rules 3-28-05. No amendments.

HB2367 (Home Inspector Referral Fees) was heard by the House Commerce Committee Wednesday February 16th. The committee by a 5-3-1 vote chose not to move the bill forward. The bill does not appear to have been resurrected as of 3-28-05.

Budget

The appropriation bill has been passed by the legislature. It was vetoed by the governor and negotiations are being conducted. A copy of the agency budget request synopsis and the appropriation bill board appropriation are attached.

AGENCY DESCRIPTION — The agency licenses, investigates, and conducts examinations of architects, assayers (assessors of mineral value), engineers, geologists, home inspectors, land surveyors, and landscape architects.

PERFORMANCE MEASURES	FY 2003	FY 2004	FY 2005	FY 2006
	Actual	Actual	Estimate	JLBC
• Average calendar days to resolve a complaint	301	259	180	180
• Average calendar days to process an initial application (NEW)	--	--	--	90
• Average calendar days to renew a license	NA	NA	1	--
• Administration as a % of total cost	15.3	NA	11.8	--
• Customer satisfaction rating (Scale 1-8)	NA	NA	NA	8.0

Comments: The agency did not submit information for any measure labeled as "NA." The board reports that in 2004 it was able to reduce the number of days needed to resolve a complaint from the previous year by 42, due to the filling of vacant positions and additional training provided for investigators. The JLBC Staff recommends adding a new measure on application processing time for an initial license. Information provided by the agency regarding customer satisfaction was not considered reliable and was not included in this report.

8. REPORT ON NCEES (NATIONAL COUNCIL OF EXAMINERS FOR ENGINEERING AND SURVEYING) MEETING

Mr. Starling gave a review of the significant topics discussed at this meeting:

- The elimination of two exams: Naval Architecture and Nuclear Engineering.
- Identifying "cheaters" and compiling a short list of approved calculators to be allowed for examinations (to alleviate scanning or transmitting test questions).
- Raising the amount of questions available for testing to 1200 to create a computer-based exam where test questions will be published (less cheating).
- Allowing a minimal amount of reference materials during examinations due to the high cost of reference materials and space availability during exams.
- Working on changing cut scores and raising pass rate percentages.
- Nationalizing Continuing Education Requirements rather than having them be state specific.

9. DIRECTOR'S REPORT

Mr. Dalrymple provided a written report to Board Members.

10. FUTURE BOARD MEETINGS

Tuesday, March 29, 2005.

11. FUTURE AGENDA ITEMS

2005 Registration Boards Forum
Las Vegas, Nevada
March 19, 2005

Hosted by the
National Society of Professional Surveyors (NSPS)
A member of the
American Congress on Surveying and Mapping (ACSM)

I have not yet received a copy of the minutes and attendance information but there were approximately twenty Board members present, a representative from the American Society of Photogrammetry and Remote Sensing (ASPRM) and several private surveyors

The following subjects were discussed:

1. Model Law for Surveying – Status of photogrammetry and GIS in various jurisdictions: Several states currently license photogrammetrists as a separate discipline and the representative from ASPRM expressed the desire for more states to either license photogrammetrists separately or as a separate category of land surveying. This led to more discussion on possible categories of land surveying but no consensus was reached. NCEES has developed a photogrammetry exam but they do not yet have the necessary ten states requesting the exam.

2. Status of photogrammetry and GIS in various jurisdictions. A few states license photogrammetrists but most, like Arizona, require photogrammetry to be performed under the direction of a Land Surveyor. There was a lot of discussion as to whether the states should consider separate registration for photogrammetrist and GIS people or to create sub-categories of land surveying, similar the branches of engineering now licensed. No consensus was reached.

3. State Specific exams: This was a lively topic for the private surveyors. The different ways that the states deal with the exam ranged from Wyoming, (they mail the exam to out of state applicants and the pass rate is a surprising 100 %!) to California (taken on-site with a pass rate of less than 10%).

The consensus was that state specific exams are necessary due to the different state laws but the states should make the exam more accessible and not, like certain states, use the exam as a barrier to out-of-state registrants. Suggestions ranged from mailing the exam to applicants to providing an online method for out of state applicants to take the exam.

4. Calculator policy: Ms. Rita M. Lumos, from the NCEES, presented an update on the calculator policy and mentioned that the fall LSIT exam will be a new test. As of April 2004 the NCEES restricted the calculator type to “no text editing or communication abilities”. Beginning with the fall exam only the following calculators may be used: HP 33's, HP 9's, Casio – FX 115 MS & FX 115 MS + (“SR” ok), TI 30X IIS & TI 30X IIB, and TI 36X Solar.

5. Four Year Degree Requirements: Various states continue to push for a requirement that only graduates from an accredited four year degree survey program be allowed to apply for registration as Land Surveyors. No consensus was reached on this but representatives from the NCEES did state that the LSIT exam continues to be modified so that a non-college educated surveyor will have a difficult time passing the exam. It was interesting to note that while graduates of the (few) four year programs did much better on the LSIT exam, the differences between those taking the Professional exam were negligible.

6. Responsible charge issues: I missed part of this as I had to leave early due to another commitment and will have more information when I receive a copy of the meeting minutes. There is a growing concern over how an out-of-state survey firm can ensure the quality of a local survey. Some states have addressed this by having requirements that the firm have an in-state office, manned by a local registrant. Another concern was that of how a registrant can supervise work that is outsourced to another country or state. This is a bigger issue with the photogrammetry industry but is getting to be an issue with GPS data processing. No clear cut answers here but something the boards need to be thinking about.

7. Online Processor User Service (OPUS): This is a service provided by the National Geodetic Survey. It allows a GPS user to occupy a point, record data, and send the data (via email) to NGS for processing. The results are usually returned within an hour. The results are not "survey grade" but do allow one to get a Latitude and Longitude of a point in a remote area without differential processing. The results are generally in the sub-meter range depending upon how long the station is occupied. I am not sure why this was being discussed as it has not been a problem in Arizona and is generally used only by surveyors.

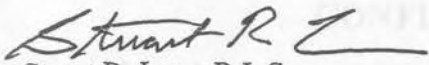

8. Board Consolidation: The pressure to consolidate boards (see California's attempt) was discussed. Again, I was not present for this discussion but am sure that Ron is well aware of what the other states and Arizona are doing.

9. E & O Requirements: Some states are looking at adding rules which would require the registrant to carry E & O insurance. I don't think that this is something that the boards want to get involved with unless a specific problem or public protection need can be identified.

Other notes: Study guides for the new LSIT exam will be available in May on the NCEES website.

If any board members would like a copy of the meeting minutes, let me know and I will forward them to you when I receive a copy.

Respectfully submitted,

Stuart R. Lane, R.L.S.
Land Surveyor Member of the Board

Director's Report
APRIL 2005

Staff Training

Lori Evans completed the Arizona Basic Regulatory Investigation Course that finished on March 30.

Rule Package Status Report

R4-30-201, 204, & 214. The GRRC courtesy review has been completed by the GRRC attorney and the package was sent on 3-21-05 to the Secretary of State for publication. The publication date will be 4-15-05.

The GRRC attorney advised that a public hearing date be set at the time of the publication. The public hearing date was set for 0900, 5-17-05 which is the date and time of the May Board meeting. If no challenge is heard at that meeting, the package will be sent to GRRC and a public hearing before GRRC will be scheduled.

R4-30-208. A docket has been opened and will remain open for one year from the date of opening (12-27-04). If the Board has not filed a notice of proposed rule making by that date the docket will automatically terminate.

Legislation

HB2223 [Contractor Licensing Exemption] To the governor for signature.

HB2225 [P.E. designation and As-Built plans] To the governor for signature.

HB2367 (Home Inspector Referral Fees) was heard by the House Commerce Committee Wednesday February 16th. The committee by a 5-3-1 vote chose not to move the bill forward. The bill does not appear to have been resurrected as of 3-28-05.

Budget

The appropriation bill has been passed by the legislature. It was vetoed by the governor and negotiations are being conducted.

NOTICE OF FINAL RULEMAKING

TITLE 4. PROFESSIONS AND OCCUPATIONS

CHAPTER 30. ARIZONA STATE BOARD OF TECHNICAL REGISTRATION

PREAMBLE

1. Sections Affected Rulemaking Action

R4-30-201	Amended
R4-30-204	Amended
R4-30-214	Amended

2. The statutory authority for the rulemaking, including both the authorizing statutes (general) and implementing the statutes (specific):

Authorizing statute: A.R.S. §§ 32-106 (A)(1), 32-106 (A)(3), and 32-106(A)(4)

Implementing statute: A.R.S. §§ 32-122.01(A)(2), 32-122.01(A)(3), 32-122.01(B)(2), 32-122.01(B)(3)

3. The effective date of the rules:

4. A list of all previous notices appearing in the Register addressing the proposed rules:

Notice of Rulemaking Docket Opening: 10 A.A.R 4271, October 22, 2004

Notice of Proposed Rulemaking: 11 A.A.R. 1403, April 15, 2005

5. The name and address of agency personnel with whom persons may communicate regarding the rulemaking:

Name: Julie Ruff

Address: Arizona State Board of Technical Registration
1110 W. Washington Street, Suite 240
Phoenix, AZ 85007

Telephone: (602) 364-4940

Fax: (602) 364-4931

E-mail: julie.ruff@btr.state.az.us

6. An explanation of the rules, including the agency's reasons for initiating the rulemaking:

Current statutes permit licensure for architects, engineers, geologists, and landscape architects after eight years of education, experience, and completion of required examinations.

Current rules require completion of eight years of education and experience before an applicant is considered qualified to take the required examinations.

The rule changes:

- Permit application and approval to take the required examination for architect, engineer, geologist, and landscape architect applicants after 72 months of education and experience;
- Separate applications for examination from applications for licensure;
- Make it possible for an applicant to meet all requirements for registration at the eight year level without waiting to take the examination;
- Clarify the Board's ability to recognize national exam scores not administered by the Board;
- Clarify that communication between applicants and national councils about exams administered by outside agencies is between the applicant and the examining agency;
- Clarify that Home Inspectors are not included in those groups using multi-division exams and division scoring;
- Clarify the review process for Board administered exams;
- Clarify that non-board administered exams are controlled by the exam administrators;
- Add minimum hourly requirements for education areas for architect registration.

7. A reference to any study relevant to the rules that the agency reviewed and proposes either to

rely on or not to rely on in its evaluation of or justification for the rules, where the public may obtain or review each study, all data underlying each study, and any analysis of each study and other supporting material:

N/A

8. A showing of good cause why the rules are necessary to promote a statewide interest if the rules will diminish a previous grant of authority of a political subdivision of this state:

N/A

9. The preliminary summary of the economic, small business, and consumer impact:

There are significant positive economic impacts for applicants who complete required testing before reaching the required eight years of education and experience. By beginning the testing process at the 72 month education and experience level, the applicant has an opportunity to determine whether there is a need for additional education or experience in specific areas by an evaluation of his or her

examination results and may take steps to gain additional knowledge in areas of weakness and still complete the examination before reaching the 96 month and experience level required for registration. Early completion of the examination process allows the applicant to meet all registration requirements at the eight year level rather than begin the examination process at that education and experience level. The positive economic impact is the difference in the applicant's salary for the period of time that it takes the applicant to complete the examination process.

There are moderate positive impacts on small businesses and consumers due to a larger pool of qualified registrants.

There are no significant impacts on other government agencies.

10. A description of the changes between the proposed rules, including supplemental notices, and final rules (if applicable):

N/A

11. A summary of the comments made regarding the rule and the agency response to them:

12. Any other matters prescribed by statute that are applicable to the specific agency or to any specific rule or class of rules:

None.

13. Any material incorporated by reference and its location in the rules:

Not Applicable

14. Was this rule previously made as an emergency rule?

No

15. The full text of the rules follows:

e. Any revocation of the applicant for a felony or misdemeanor, other than a minor traffic violation;

ARTICLE 2. REGISTRATION PROVISIONS

R4-30-201. Professional Registration as an Architect, Assayer, Engineer, Geologist, Landscape Architect, or Land Surveyor.

A. An applicant for professional registration as an architect, assayer, engineer, geologist, landscape architect, or land surveyor shall submit an original and one copy of a completed application package for professional registration that contains the following:

1. Evidence of successful completion of the current national professional examination or waiver of the examination pursuant to A.R.S. § 32-126 and R4-30-203 in the category, and branch if applicable, for which registration is sought. Applicants shall arrange to have their examination results sent directly to the Board from the applicable testing agency holding the examination results;
2. ~~The information set forth in subsections (B)(1) through (15);~~ Name, residence address, mailing address if different from residence, and telephone number, of the applicant;
3. ~~The applicable fee.~~ Date of birth and social security number of the applicant;
4. Citizenship or legal residence of the applicant;
5. Category, and branch of engineering if applicable, for which the applicant is seeking registration;
6. A detailed explanatory statement and documentation, regarding:
 - a. Any disciplinary action, including suspension and revocation, taken by any state or jurisdiction on any professional or occupational registration, certification, or license held by the applicant in any state or jurisdiction;
 - b. Refusal of any professional or occupational registration, certification, or license to the applicant by any state or jurisdiction;
 - c. Any pending disciplinary action in any state or jurisdiction on any professional or occupational registration, certification, or license held by the applicant;
 - d. Any alias or other name used by the applicant; and
 - e. Any conviction of the applicant for a felony or misdemeanor, other than a minor traffic violation.

7. State or jurisdiction in which the applicant holds any other professional or occupational registration, certification, or license, type of registration, certification, or license number, year granted, how registration, certification, or license was granted (by examination, education, experience, or reciprocity), and the number of examination hours taken by the applicant;
8. State or jurisdiction in which the applicant has pending an application for any type of professional or occupational license, registration, or certification, type of license, registration, or certification being sought, and the status of the application;
9. Name, mailing address, years attended, graduation date, major, and type of degree received from each college, university, or educational institution the applicant attended;
10. Certified transcripts sent directly to the Board from the registrar of each college, university, or educational institution the applicant attended, unless previously provided to the Board pursuant to R4-30-204;
11. Name, current address, and telephone number of the applicant's current and former employers in the category for which registration is sought; dates of employment; applicant's title; description of the work performed; and number of hours worked per week, unless previously provided to the Board pursuant to R4-30-204;
12. Names and addresses of immediate supervisors in past and present employment in the category for which registration is sought. An applicant who has been working in the category for which registration is sought for 10 or more years shall provide the names and address of all immediate supervisors during the most recent 10-year period. If an applicant cannot supply the names and addresses of supervisors for at least three engagements, the applicant shall provide to the Board a written, sworn statement explaining the inability to provide this information, and the names and addresses of three references, unrelated to the applicant, at least two of whom are registered in the category for which registration is sought, unless previously provided to the Board pursuant to R4-30-204;
13. A release authorizing the Board to investigate the applicant's education, experience, moral character, and repute;

14. Certificate of Experience Record and Reference Forms from the applicant's present and past immediate supervisors, unless previously provided to the Board pursuant to R4-30-204. The applicant shall also provide Certificate of Experience Record and Reference Forms from additional references as required by the Board. The applicant shall provide the name, address, and telephone numbers of all references. The applicant shall ensure that completed reference forms are provided to the Board;

15. Evidence of successful completion, or waiver by the Board, of the applicable in-training examination, unless previously provided to the Board pursuant to R4-30-204. An applicant for registration who has successfully completed an in-training examination in another jurisdiction in the category for which registration is sought equivalent to the examination for that category administered in Arizona shall submit proof of examination directly from the authority that administered the original examination. An applicant seeking professional registration as an architect or landscape architect may take the in-training examination at the same time as the professional examination. An applicant seeking professional registration as an assayer, engineer, geologist or land surveyor shall pass the applicable in-training examination before admission to the professional examination;

16. Certification that the information provided to the Board is accurate, true and complete; and

3.17. The applicable fee.

~~B. An applicant who wishes to sit for professional examination shall submit an original and one copy of a completed application for professional examination, and provide the following:~~

~~1. Name, residence address, mailing address if different from residence, and telephone number of the applicant;~~

~~2. Date of birth and social security number of the applicant;~~

~~3. Citizenship or legal residence;~~

~~4. Category, and branch of engineering if applicable, for which the applicant is seeking registration;~~

~~5. A detailed explanatory statement, regarding:~~

~~a. Any disciplinary action, including suspension and revocation, taken by any state or~~

- jurisdiction on any professional or occupational registration, certification, or license held by the applicant in any state or jurisdiction;
- b. Refusal of any professional or occupational registration, certification, or license by any state or jurisdiction;
- c. Any pending disciplinary action in any state or jurisdiction on any professional or occupational registration, certification, or license held by the applicant;
- d. Any alias or other name used by the applicant; and
- e. Any conviction for a felony or misdemeanor, other than a minor traffic violation.
6. State or jurisdiction in which any other professional or occupational registration, certification, or license is held, type of registration, certification, or license number, year granted, how registration, certification, or licensure was granted (that is, by examination, education, experience, or reciprocity), and the number of examination hours taken by the applicant;
7. Name of the state or jurisdiction, the type of professional or occupational registration, certification, or license the applicant is seeking, and the current status of any professional or occupational application for registration, certification, or license pending in any state or jurisdiction;
8. Name, mailing address, years attended, graduation date, major, and type of degree received from each college, university, or educational institution the applicant attended.
9. Certified transcripts sent directly to the Board from the registrar of each college, university, or educational institution the applicant attended.
10. Name, current address, and telephone number of the applicant's current and former employers in the category for which registration is sought; dates of employment; applicant's title; description of the work performed, and number of hours worked per week;
11. Names and addresses of immediate supervisors in past and present employment in the category for which registration is sought. Applicants who have been working in the category for which registration is sought for ten or more years shall provide the names and addresses of all immediate supervisors during the most recent ten-year period. If an applicant cannot supply the names and addresses of supervisors for at least three engagements, the applicant shall provide to

~~the Board a written, sworn statement explaining the inability to provide this information, and the names and addresses of three additional references, unrelated to the applicant, at least two of whom are registered in the category for which registration is sought;~~

~~12. A release authorizing the Board to investigate the applicant's education, experience, moral character and repute;~~

~~13. Certificate of Experience Record and Reference Forms from the applicant's present and past immediate supervisors. The applicant shall also provide Certificate of Experience Record and Reference Forms to additional references as required by the Board. The applicant shall provide the name, address, and telephone numbers of all references. The applicant shall ensure that completed reference forms are provided to the Board;~~

~~14. Evidence of successful completion, or waiver by the Board, of the applicable in-training examination. An applicant for professional registration, who has successfully completed an in-training examination in another jurisdiction in the category for which registration is sought equivalent to the examination for that category administered in Arizona, shall submit proof of examination directly from the authority that administered the original examination. An applicant seeking professional registration as an architect or landscape architect may take the in-training examination at the same time as the professional examination. An applicant seeking professional registration as an assayer, engineer, geologist, or land surveyor shall pass the applicable in-training examination before admission to the professional examination;~~

~~15. Certification that the information provided to the Board is accurate, true, and complete.~~

B. If an applicant does not have the required education and experience for registration, the Board may, upon request of the applicant, hold the application for a period of time that does not exceed one year from the date the application is filed with the Board. All time-frames adopted pursuant to Title 41, Chapter 6, Article 7.1 are suspended during the above-referenced time.

C. An applicant holding a certificate of qualification issued by one of the national registration bodies recognized in R4-30-203(B) shall arrange to have the record forwarded to the Board by the national registration body. If the forms provided by the national registration body contain all the information described in A.R.S. § 32-122.01 and subsection ~~(B)~~ (A), the Board may accept the forms in lieu of

requiring the applicant to furnish the information directly to the Board.

D. The Board staff shall review all applications and, if necessary, refer completed applications to an advisory committee for evaluation. If the application for registration is complete and in the proper form and the Board staff or committee is satisfied that all statements on the application are true and that the applicant is eligible in all other aspects to be registered in the field for which the application was filed, the Board staff or committee shall recommend that the Board certify the applicant as eligible ~~to take the examination or if exempt from examination pursuant to statute or rule, as eligible for registration~~. If for any reason the Board staff or committee is not satisfied that all of the statements on the application are true or that the applicant is eligible in all respects for ~~examination or~~ registration, the ~~board~~ Board staff shall make a further investigation of the applicant. The Board staff and committee shall submit recommendations to the Board for approval. The Board may also require an applicant to submit additional oral or written information if the applicant has not furnished satisfactory evidence of qualifications for ~~examination or~~ registration.

E. The Board may ~~permit an applicant who has successfully satisfied the requirements of an intern development program approved by the Board to qualify for an appropriate examination, accept~~ documentation that an applicant has passed a written national examination in the area for which registration is sought from a national council of which the Board is a member or a professional association approved by the Board.

F. The Board shall not accept an application for registration renewal unless the applicant has responded to the questions on the application relating to good moral character and other misconduct and signed the application for renewal. The Board shall return an incomplete application to the applicant which may result in assessment of a delinquent renewal fee ~~under R4-30-106~~.

G. An applicant may withdraw an application for registration by written request to the Board. Any fee paid by the applicant is non-refundable. If an applicant withdraws an application, the Board shall close the file. An applicant whose file has been closed and who later wishes to apply for professional registration shall submit a new application package to the Board pursuant to R4-30-201 and R4-30-202.

R4-30-204 Examinations

A. An applicant with at least 72 but less than 96 months of required education and experience who wishes to sit for the professional examination for architecture, assaying, engineering, geology, landscape architecture or land surveying shall submit an original and one copy of a completed application package for professional examination that contains the following:

1. Name, residence address, mailing address if different from residence, and telephone number, of the applicant;
2. Date of birth and social security number of the applicant;
3. Citizenship or legal residence;
4. Category, and branch of engineering if applicable, for which the applicant is seeking registration;
5. Name, mailing address, years attended, graduation date, major, and type of degree received from each college, university, or educational institution the applicant attended;
6. Certified transcripts sent directly to the Board from the registrar of each college, university, or educational institution the applicant attended;
7. Evidence of 72 months of required education or experience in the category for which registration is sought. 8. Names and addresses of immediate supervisors in past and present employment in the category for which registration is sought. If an applicant cannot supply the names and addresses of supervisors for at least three engagements, the applicant shall provide to the Board a written, sworn statement explaining the inability to provide this information, and the names and addresses of three additional references, unrelated to the applicant, at least two of whom are registered in the category for which registration is sought;
9. A release authorizing the Board to investigate the applicant's education and experience;
10. Certificate of Experience Record and Reference Forms from the applicant's present and past

immediate supervisors. The applicant shall also provide Certificate of Experience Record and Reference Forms from additional references as required by the Board. The applicant shall provide the name, address, and telephone numbers of all references. The applicant shall ensure that completed reference forms are provided to the Board;

11. Evidence of successful completion, or waiver by the Board, of the applicable in-training examination. An applicant who has successfully completed an in-training examination in another jurisdiction in the category for which registration is sought equivalent to the examination for that category administered in Arizona shall submit proof of examination directly from the authority that administered the original examination. An applicant seeking professional registration as an architect, or landscape architect may take the in-training examination at the same time as the professional examination. An applicant seeking professional registration as an assayer, engineer, geologist, or land surveyor shall pass the applicable in-training examination before admission to the professional examination;

12. Certification that the information provided to the Board is accurate, true, and complete; and

13. The applicable fees.

B. An applicant with at least 96 months of required education and experience who wishes to sit for the professional examination for architecture, assaying, engineering, geology, landscape architecture or land surveying may submit a combined application for examination and registration that contains the information required in subsection (A) and R4-30-201, and shall pay the applicable fee.

C. The Board staff shall review all applications and, if necessary, refer completed applications to an advisory committee for evaluation. If the application for examination is complete and in the proper form and the Board staff or committee is satisfied that all statements on the application are true and that the applicant is eligible to take the examination, the Board staff or committee shall recommend that the Board certify the applicant as eligible to take the examination or exempt from the examination requirement. If for any reason the Board staff or committee is not satisfied that all of the statements on the application are true or that the applicant is eligible in all respects for examination, the Board staff shall make a further investigation of the applicant.

A- D. All examinations An examination administered by the Board shall be given at the times and places

determined by the Board. Once the Board approves an applicant to sit for ~~any a~~ Board-administered examination, the applicant shall communicate all questions and concerns regarding extensions and refunds to the ~~applicable testing agency~~ Board. The applicant shall make any request for additional time or other special examination accommodation to the Board within a reasonable time before the examination date. ~~The Board shall not refund any examination fee paid to a testing agency.~~

~~B. E.~~ An applicant who fails to achieve a passing grade on any division of any examination administered by the Board may request re-examination by notifying the Board in writing of the applicant's desire to re-take the examination and paying the applicable examination fee. An applicant who re-takes any examination shall advise the Board of any changes in the information provided under ~~R4-30-201(B)~~ subsection A of this Section and R4-30-202(B) within 30 days from the date of the change. The Board shall close an applicant's file if the Board does not receive written confirmation from the applicant of the applicant's desire to re-take the Board-administered examination within one year from the request for re-examination. An applicant whose file has been closed and who later wishes to apply ~~for professional registration~~ examination shall submit a new examination application package to the Board ~~pursuant to R4-30-201 and R4-30-202.~~

~~C. F.~~ An applicant, ~~except for a home inspector applicant,~~ who has failed any division of a multi-divisional examination shall be re-examined only on the division failed. ~~The Board shall deny an application if the applicant fails to pass all divisions of an examination within five years after first taking any division of an examination.~~ The applicant shall submit a new application for examination, and retake and pass any division of the examination, except the in-training examination, with results that are five or more years old.

~~D. G.~~ An applicant for a Board-administered examination who wishes to review the applicant's examination scores shall file a written request with the Board within 30 days after receiving notification of the failing grade. The applicant may review an examination by making prior arrangements with the staff and paying the applicable fee. The applicant shall complete any review within 60 days of the request for a review. In reviewing multiple choice questions, an applicant may review only those questions that were incorrect.

~~E. H.~~ An applicant who desires a re-grade of an examination and, where applicable, has exhausted all remedies for regarding with the applicable testing agency, shall file a written request with the Board within

30 days after receiving notification of the failing grade or within 30 days after reviewing the examination, whichever is applicable, and pay the applicable fee. The applicant shall identify the questions to be reviewed. The applicant shall state why a review of the item is justified. The applicant shall provide specific facts, data, and references to support any assertion that the solution deserves more credit. The Board shall determine whether it will re-grade the examination ~~or whether it will send the examination to the applicable testing agency for re-grading.~~

~~F. If an applicant does not have the required education and experience, the Board may hold the application for a period of time not exceeding one year upon request of the applicant. All time frames adopted pursuant to Title 41, Chapter 6, Article 7.1 are suspended during the above referenced time.~~

~~G. An applicant may withdraw an application for registration or designation by written request to the Board. Any fee paid by the applicant is non refundable. 1. Granting of professional or in-training registration.
2. Approval to sit for the professional or in-training examination.
3. Recommendation for closure of professional registration or in-training designation.

Mr. Lane moved to accept the Evaluation Committee and staff recommendations #1 - #3. Mr. Starling seconded. Motion Carried.

8. DIRECTOR'S REPORT

Mr. Dalrymple informed the Board of current proposed Legislation and Rule Packages as per the report in their packets.

9. POSSIBLE REVISION OF RULES REGARDING DISCIPLINARY ACTION FOR CONTINGENCY FEES

Mr. Roos explained that the Legislative and Rules Committee discussed the revision of this rule. The Committee, based on Assistant Attorney General, Lisa Burns' research that it is against public policy for a professional to be paid on a contingency when serving as an expert witness, decided not to take any action or propose any recommendations to the Board regarding this item. Any contingency fee contract is void, and unenforceable. After discussion, Mr. Starling moved to have the Board adopt a rule change to A.A.C. R4-30-301 (21) to read, "Registrant shall not enter into a contract for expert witness services on a contingency fee basis, or other such arrangement, where a Registrant's fee is directly related to the outcome of such dispute resolution." Mr. Lane seconded.

Mr. Roos stated that he feels that it is not unethical to receive a fee, as a professional, for expert witness testimony. Therefore, he states that the Board should not discipline someone who does so. Mr. Greenslade stated that since the Board has never had issues of this type come before them, there is no need to change the rule. However, he sees some need to protect the public.

necessary
contingency
adopt a rule prohibiting such a fee.

After further discussion, Motion Carried. (Mr. Roos voted nay.)

10. THE REVIEW OF IN-TRAINING APPLICATIONS FOR MORAL CHARACTER, A.A.C. R4-30-202 (B) (8)

After discussion, it was determined that since this is a Statute, it is in the Board's best interest to continue to do this review. No Action Taken.

11. CLARIFICATION OF PROVISIONS A.R.S. § 32-145

Per Assistant Attorney General, Terrie Zanoff, an individual may use the title ARCHITECT or ARCHITECTURAL and it would not be a violation because these terms are not protected. The Board came to a consensus not to change A.R.S. § 32-145. No Action Taken.

12. SEALING, STORAGE AND MARKING OF ELECTRONICALLY TRANSMITTED PLANS A.A.C. R4-30-304 (C)

After discussion, Mr. Pearson directed staff to adopt proposed language for a modification of rule R4-30-304 similar to the following:

If a professional document is ~~stored, filed, or~~ provided to a client, contractor, regulatory body or any other person for any reason by computer disk, tape, CD, or any other electronic form, the registrant shall mark each professional document, "electronic copy of final document, original sealed document with" and identify the registrant's name and registration number unless it is sealed or marked as required by sub-section (D).

(Mr. Roos has left the Meeting.)

13. DISCUSS GRANTING NCEES (National Council of Examiners for Engineering and Surveying) THE ABILITY TO MAIL EXAM RESULTS TO CANDIDATES
Deputy Director, La Vern Douglas, requested the Board to approve having NCEES (National Council of Examiners for Engineering and Surveying) mail exam results directly to the Candidates. After discussion, the Board came to a consensus and directed Staff to go forward.

14. FUTURE BOARD MEETINGS
Tuesday, May 17, 2005

15. FUTURE AGENDA ITEMS

- As built - Do they need to be signed and sealed

Director's Report
MAY 2005

Rule Package Status Report
R4-30-201, 204, & 214.

The public hearing date is set for 0900, 5-17-05 during the Board meeting. If no challenge is heard at the meeting, the package will be sent to GRRC and a public hearing before GRRC will be scheduled.

R4-30-208. A docket has been opened and will remain open for one year from the date of opening (12-27-04). If the Board has not filed a notice of proposed rule making by that date the docket will automatically terminate.

Legislation

HB2223 Signed by the Governor [Contractor Licensing Exemption].

HB2225 Signed by the Governor [P.E. designation and As-Built plans].

HB2367 (Home Inspector Referral Fees) was heard by the House Commerce Committee Wednesday February 16th. The committee by a 5-3-1 vote chose not to move the bill forward. The bill appears to have died.

Budget

The appropriation bill has been passed by the legislature. It was sent to the governor for her signature.

	FY2005	FY2006	FY2007
Appropriation	\$1,370,000	\$1,388,000	\$1,387,700

The governor has not yet signed the appropriation bill.

REPORT TO BOARD
LEGISLATIVE AND RULES COMMITTEE

April 29, 2005

Please refer to the attached agenda.

ITEM 2. ROLL CALL: In attendance were Mr. Tuttle, Mr. Pawelko and Mr. Greenslade. Mr. Greenslade served as Acting Chair.

ITEM 4. ADOPTION OF MINUTES: Minutes of the March 3, 2005 meeting were adopted.

ITEM 5. UPDATE ON STATUS OF VARIOUS RULE PACKAGES: Mr. Dalrymple was absent. No update on the various rule packages was presented.

ITEM 6. SUBSTANTIVE POLICY STATEMENT/RULE: Mr. Pawelko presented information regarding requirements by the School Facilities Board that all sheets in a set of plans must be sealed by an architect even if a sheet was prepared by a non-registered discipline (e.g. food service consultants). Mr. Scolaro was in attendance and provided support to Mr. Pawelko's arguments that either a substantive policy statement or a change in Board rules is required to address this situation. After significant discussion it was agreed that Mr. Pawelko would attempt to draft a statement or rule change that would address the situation.

Staff was directed to contact the School Facilities Board to collect data on their policies and practices in this area. The topic was continued to the next meeting.

ITEM 7. SEALING AND MARKING OF ELECTRONICALLY TRANSMITTED PLANS:

The following changes to R30-304 (C) are proposed (*deleted*):

"If a professional document is *stored, filed, or* provided to a client, regulatory body or any other person for any reason by computer disk, tape, CD, or any other electronic form, the registrant shall mark each professional document "electronic copy of final document, original sealed document with" and identify the registrant's name and registration number."

Staff was also directed to review the "any other person" language in the statutes and rules to assess if any changes to this language were desirable.

ITEM 8. CONTINGENCY FEE ARRANGEMENTS USE BY REGISTRANT: The Committee directed Staff to review the language used in the motion made at the April 19, 2005 Board Meeting. No action was taken on this item.

ITEM 9. NEW ITEMS: Deleted

ITEM 10. FUTURE AGENDA ITEMS: Item 6, Item 7 and AZ Surveyors Minimum Standards section 13 (C).

ITEM 11. FUTURE MEETINGS: Next meeting tentatively scheduled for the first two weeks in June.

The Board shall review the minutes of the previous meeting for any public questions. Following with a meeting may require a reasonable amount of time such as a sign language interpreter by contacting the Board at (602) 455-4787. Requests should be made as early as possible to allow time for a reasonable arrangement.

The Board may consider or take action on any item on the agenda at the discretion of the Board. Agenda items may be added with or without notice.

All correspondence, including requests, proposals, letters and applications and any other information to A.R.S. 1-22-123.

The Board may consider or take action on any item on the agenda at the discretion of the Board. Agenda items may be added with or without notice.

2. M05-091 / MIR03-316 Kirt D. Klingerman, Certified Home Inspector #38958. Mr. Lane moved to accept the signed Consent Agreement for Kirt D. Klingerman, Certified Home Inspector, encompassing the following Order: Letter of Reprimand; Peer Review of the next three home inspection reports, after approval of peer reviewers; Take and successfully complete an open book test on the Board's Statutes and Rules; Pay cost of investigation in the amount of \$270.00. Mr. Starling seconded. Motion Carried. (Mr. Roos was unavailable at the time of the vote.)

3. M05-116 / MIR01-161 David Hall, Land Surveyor #13562. Mr. Starling stated that his firm has worked with this registrant. Assistant Attorney General, Terrie Zenoff, stated there is no conflict of interest. Mr. Lane moved to accept the signed consent agreement for David Hall, Land Surveyor, encompassing the following Order: Probation. Respondent's Land Surveyor Registration No. 13562 shall be placed on probation until the following requirement is met: Revision of Survey. Within sixty (60) days of the effective date of this Consent Agreement, Respondent shall make a reasonable attempt to contact Mr. Lemon and/or Landmark Engineering in connection with the double monumentation and submit a copy of his revised survey to the Board for review and approval by a representative appointed by the Executive Director. After review and approval, Respondent shall record the revised survey and provide evidence of recordation to the Board. Pay the cost of investigation in the amount of \$600.00 within thirty (30) days. Mr. Nelson seconded. Motion Carried. (Mr. Roos abstained.)

D. Enforcement Advisory Committee Candidate

1. Traci Bangor, P.E. (Fire Protection) #36964. Mr. Greenslade moved to accept Traci Bangor as an EAC Member. Mr. Lane seconded. Motion Carried. (Ms. Lyndes was unavailable at the time of the vote.)

6. EVALUATION OF APPLICATIONS FOR EXAMINATION AND/OR POSSIBLE GRANTING OF REGISTRATION OR CERTIFICATION

A. Registration

1. James Parrish - Electrical #050363. Mr. Greenslade moved to grant James Parrish registration. Mr. Starling seconded. After discussion, Motion Carried. (Ms. Lyndes not available at the time of the vote.)

7. EVALUATION COMMITTEE AND STAFF RECOMMENDATIONS AND POSSIBLE GRANTING OF REGISTRATION OR CERTIFICATION (LIST AVAILABLE AT BOARD OFFICE)

1. Granting of professional or in-training registration.
2. Approval to sit for the professional or in-training examination.
3. Recommendation for closure of professional registration or in-training designation.

Mr. Lane moved to accept the Evaluation Committee and staff recommendations #1 - #3. Mr. Starling seconded. Motion Carried.

8. DIRECTOR'S REPORT

Mr. Dalrymple informed the Board of current proposed Legislation and Rule Packages as per the report in their packets.

9. POSSIBLE REVISION OF RULES REGARDING DISCIPLINARY ACTION FOR CONTINGENCY FEES

Mr. Roos explained that the Legislative and Rules Committee discussed the revision of this rule. The Committee, based on Assistant Attorney General, Lisa Burns' research that it is against public policy for a professional to be paid on a contingency when serving as an expert witness, decided not to take any action or propose any recommendations to the Board regarding this item. Any contingency fee contract is void, and unenforceable. After discussion, Mr. Starling moved to have the Board adopt a rule change to A.A.C. R4-30-301 (21) to read, "A registrant shall not enter into a contract for expert witness services on a contingency fee basis, or other such arrangement, where a Registrant's fee is directly related to the outcome of such dispute resolution." Mr. Lane seconded.

Mr. Roos stated that he feels that it is not necessarily unethical to receive a contingency fee, as a professional, for expert witness testimony. Therefore, he states that the Board should not adopt a rule prohibiting such fees. Mr. Greenslade stated while the Board has not had specific complaints regarding the acceptance by registrants of contingency fees for expert witness work, research by Board staff has found that Arizona courts have determined that contingency fees for expert witnesses are not in the public interest. Therefore, it is proper for the Board to develop a rule prohibiting or limiting the acceptance of contingency fees for expert witness services by registrants. After further discussion, Motion Carried. (Mr. Roos voted nay.)

10. THE REVIEW OF IN-TRAINING APPLICATIONS FOR MORAL CHARACTER, A.A.C. R4-30-202 (B) (8)

After discussion, it was determined that since this is a Statute, it is in the Board's best interest to continue to do this review. No Action Taken.

11. CLARIFICATION OF PROVISIONS A.R.S. § 32-145

Per Assistant Attorney General, Terrie Zenoff, an individual may use the title ARCHITECT or ARCHITECTURAL and it would not be a violation because these terms are not protected. The Board came to a consensus not to change A.R.S. § 32-145. No Action Taken.

12. SEALING, STORAGE AND MARKING OF ELECTRONICALLY TRANSMITTED PLANS A.A.C. R4-30-304 (C)

After discussion, Mr. Pearson directed staff to adopt proposed language for a modification of rule R4-30-304 similar to the following:

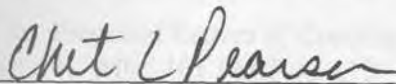

"If a professional document is provided to a client, contractor, regulatory body or any other person for any reason by computer disk, tape, CD, or any other electronic form, the registrant shall mark each professional document, "electronic copy of final document, original signed and sealed document with" and identify the registrant's name and registration number unless it is sealed or marked as required by sub-section (D)."

(Mr. Roos has left the Meeting.)

13. DISCUSS GRANTING NCEES (National Council of Examiners for Engineering and Surveying) THE ABILITY TO MAIL EXAM RESULTS TO CANDIDATES
Deputy Director, La Vern Douglas, requested the Board to approve having NCEES (National Council of Examiners for Engineering and Surveying) mail exam results directly to the Candidates. After discussion, the Board came to a consensus and directed Staff to go forward.
14. FUTURE BOARD MEETINGS
Tuesday, May 17, 2005
15. FUTURE AGENDA ITEMS
- As built - Do they need to be signed and sealed
 - Sealing, storage and marking of electronically transmitted plans A.A.C. R4-30-304 (C) - draft of language for Board
 - Possible revision of rules regarding disciplinary action for contingency fees - draft of language for Board
 - Clarification of "Conflict of Interest" for Board Members
16. ADJOURNMENT

Mr. Greenslade moved to adjourn. Ms. Lyndes seconded. The meeting was adjourned at 11:50 a.m.

**Director's Report
July 2005**

Staff Changes

Julie Ruff has been appointed to the Administrative Services Officer position. She will have the following responsibilities:

Purchasing	Accounting	Inventory Control
Travel Arrangements	Computer Operation Coordination	
Budget Monitoring	Legislation and Rules Committee Coordination	
Rule Monitoring		

Susan Skrzycki has been appointed to the Program and Project Specialist position. Her position title will be Home Inspector and Drug Laboratory Remediation Coordinator. She will have the following responsibilities:

Home Inspector Program Coordinator
Drug Laboratory Remediation Program Coordinator

Her duties will include coordinating investigations and the work of the committees for the two programs.

Lisa Lawhorn will start as an investigator on Aug 1. She has been working investigations for the medical board and will be conducting investigations under Susan's supervision.

Sunset Review

We received notice from the legislature that we will be undergoing sunset review sometime after September 1. I have provided each of you with a copy of the letter containing the questions we have to respond to in order to complete the preliminary part of the review.

A copy of the draft response was completed yesterday and is provided to each of you for review and comment. As you will see when you read the letter, the Board's response has to be back to the legislature no later than Sept 1.

I would like the full Board to review the response at the August meeting. We will be working on the response until the meeting date. If any of you have comments before the meeting date, please get them to me and I will attempt to address all of your concerns in the next draft.

Two months is not a lot of time for a Board to respond to this type of a letter. We have done the initial research and created a starting point: something for you to work with.

I would also ask the Board to reschedule the August meeting. The meeting is scheduled for the 23rd. I am scheduled to leave for the NCEES annual meeting on the 23rd..

I would like to request the Board meeting be moved up to the 16th or the 18th. (A home inspector meeting is scheduled for the 17th.) This would leave a minimum of 13 days to finalize the response and get it to the legislature. The 23rd. only leaves eight days before we have to turn it in and Mr. Lane and I are scheduled to be out of state until the 28th.. I can work on it out of state, if necessary, but it is far from ideal. I can also cancel my NCEES trip if it becomes necessary.

3. Recommendation for closure of professional registration or in-training designation

Mr. Pawelko moved to accept the Evaluation Committee and staff recommendations for items #1 - #3. Seconded by Mr. Lane. Motion Carried.

7. **ARIZONA PROPOSAL FOR DETERMINING EXAMINATION ELIGIBILITY FOR THE NATIONAL ENGINEERS LICENSING EXAMINATION**

Mr. Dalrymple provided an overview, stating the proposal allows NCEES to accept applications for engineering and land surveying examinations directly from applicants, eliminating the need for approval from the Board for a license application. This mirrors what is already being done with landscape architects and architects, where the national council reviews their applications, authorizes them to complete their examinations, then submits exam and support documents to the individual state the registrant designates to be registered in. This proposal gives the applicants the option of filing directly with the Board, or they can go to the national council, designating Arizona as their state of choice. After discussion, Mr. Starling moved to have Mr. Dalrymple to apply Arizona to this program, and endorse the examination eligibility for national engineers licensing examinations.

Mr. Lane seconded. Motion Carried.

8. SUNSET AUDIT RESPONSE

Ms. Garcia moved to approve the Sunset Audit Response for submission to the Legislature upon Mr. Dalrymple's declaration of completion. Mr. Nelson seconded. After discussion. Motion Carried.

9. POLICY REGARDING FEES FOR FIRM REGISTRATION RENEWALS

Mr. Starling moved to implement the mailing of annual firm renewal fee notices along with an increase in the fee from \$10.00 to \$20.00, which will cover the cost of administrative and postal costs. Mr. Pawelko seconded. Motion Carried.

10. ELECTION OF OFFICERS

Mr. Pearson announced the results of the nomination committee for new Board officers: Chairman: Robert Roos, Vice-Chairman: Stuart Lane, and Secretary: Richard Pawelko. Mr. Starling moved to accept the nominations. Mr. Lane seconded. Motion Carried.

11. DIRECTOR'S REPORT - None

12. FUTURE BOARD MEETINGS - Tuesday, September 27, 2005 at 9:00 am

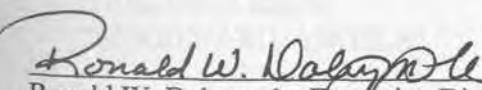

13. FUTURE AGENDA ITEMS

- Start times for future meetings

14. ADJOURNMENT - Mr. Pawelko moved to adjourn. Ms. Garcia seconded. Meeting adjourned at 10:43 am.

Firm registration

The Board directed staff to develop a program for the issuance of annual notices of re-application for firm registration. Staff has worked with a vendor to develop a computerized notice to be mailed to firms. We will test the program in November and December by pulling up the list of firms expiring in each month and comparing the list to the notices to be mailed to ensure that all firms expiring in each month are on the list. All firm registrations will expire on the last day of the specified month.

The program will consist of a query that lists all firms expiring in the specified month. A second query will be initiated of the computer database which will consist of instructions to create an application form for all firms expiring in the specified month. The printed forms will be cross checked to the list and then the forms will be mailed out no later than 45 days prior to expiration.

Staff will be asking for a fee of \$25 to cover costs of the program at the November meeting.

Firm registration

The Board directed staff to develop a program for the issuance of annual notices of re-application for firm registration. Staff has worked with a vendor to develop a computerized notice to be mailed to firms. We will test the program in November and December by pulling up the list of firms expiring in each month and comparing the list to the notices to be mailed to ensure that all firms expiring in each month are on the list. All firm registrations will expire on the last day of the specified month.

The program will consist of a query that lists all firms expiring in the specified month. A second query will be initiated of the computer database which will consist of instructions to create an application form for all firms expiring in the specified month. The printed forms will be cross checked to the list and then the forms will be mailed out no later than 45 days prior to expiration.

Staff will be asking for a fee of \$25 to cover costs of the program at the November meeting.

Once the program starts, any firm not filing a completed application and submitting the proper fee by the last day of the expiring registration month will be deemed to not be registered and any practice or advertising after the end of the month without a proper registration will subject both the firm, and its responsible registrant, to a civil penalty for unlicensed practice and investigation costs. Applications will be deemed to have been timely filed if the application is postmarked on, or before, the last day of the month of expiration.

On-line renewal of individual registrations

Staff has been working with the Government Information Technology Agency and IBM to develop the ability to accept renewal of individual registrations over the internet utilizing credit cards. It is anticipated that this program will become operational by the end of March. The technology is already in use by the Department of Motor Vehicles and the Real Estate Department. The Board of Technical Registration and the Pharmacy Board are the next two agencies to attempt to convert their systems to allow this feature.

7. Jakeima Robinson #051484 - Ms. Garcia moved to grant registration upon payment of applicable fees within 30 days, which if not paid will result in denial of certification. Mr. Nelson seconded. Motion Carried.
8. Charles Lindeen #050866 - Ms. Garcia moved to grant registration upon payment of applicable fees within 30 days, which if not paid will result in denial of certification. Mr. Starling seconded. Motion Carried.
9. Christopher Stichter #051487 - Ms. Garcia moved to grant registration upon payment of applicable fees within 30 days, which if not paid will result in denial of certification. Mr. Pawelko seconded. Motion Carried.

B. Applicant for waiver of the Fundamentals of Engineer Examination

1. Sandy Straus – Environmental - Mr. Pearson moved to wave the Fundamentals of Engineer Examination for Ms. Straus. Mr. Pawelko seconded. After discussion, Motion Carried.

C. Applicant for Registration

1. Eudjen Savu- Electrical - The Board sent this agenda item back to staff for further review.

8. EVALUATION COMMITTEE AND STAFF RECOMMENDATIONS AND POSSIBLE GRANTING OF REGISTRATION OR CERTIFICATION (LIST AVAILABLE AT BOARD OFFICE)

1. Granting of professional or in-training registration.
2. Approval to sit for the professional or in-training examination.
3. Recommendation for denial of professional registration or in-training designation

Mr. Starling moved to accept the committee and staff recommendations listed in items 1 - 3. Ms. Garcia seconded. Motion carried.

9. DIRECTOR'S REPORT - Mr. Dalrymple reported that Rules A.A.C. R4-30-201, 204 and 214 were final on October 1, 2005. Rules A.A. C. R4-30-221 (20) and A.A.C. R4-30-301 (21) is at GRRC for a courtesy review.

The new re-application for firm registration will be tested in November and December with the new fee of \$20.00. All firm registrations have been configured to expire on the last day of each specified month.

Staff is working with the Government Information Technology Agency (GITA) and IBM to develop an online renewal program. Registrants may pay utilizing a credit card. The program is scheduled to be operational in early 2006.

The committee of reference reviewed the Board's written reply to the sunset review questions, received an oral report from the Director, and voted to recommend to the full legislature, when they convene in January 2006, the continuance of the Board for ten years.

Board staff will be providing support at the Western Region meeting of the NCARB in Tucson in March 2006.

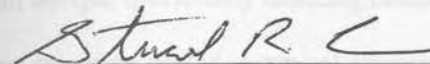

10. FUTURE BOARD MEETINGS - Tuesday, December 20, 2005 at 9:30 a.m.

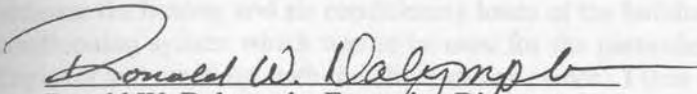

11. FUTURE AGENDA ITEMS

- Assistant Attorney General, Terrie Sanders, to develop memo regarding de minimis and Letters of Concern.

12. ADJOURNMENT - Ms. Garcia moved to adjourn, Mr. Pawelko seconded. The meeting adjourned at 11:03 a.m.

CERTIFICATE EXPERIENCE RECORD

I have been employed continuously by Fanning, Fanning and Agnew, Inc., Consulting Engineers, since April 29, 1976. From that date to September 1, 1978, I worked as a part time employee during the school year and as a full time employee during three summers. My duties during that period of time included drafting contract drawings under the direct supervision of Registered Professional Engineers. I was given sketches of heating, ventilating, air conditioning, plumbing, lighting and power designs for commercial and institutional buildings and transcribed them into scaled engineering drawings.

From the dates of September 1, 1978 to August 20, 1982 I attended Texas Tech University in Mechanical Engineering. I worked as a part time employee while attending classes in the fall and spring semesters of this time period. I worked full time during the summers of 1979, 1980 and 1981. As I better interpreted instructions from my supervisors during this time period, I was given increasingly more responsibility in system design, specifically in sizing components of heating, ventilating and air conditioning systems.

During this time period, a typical assignment included meeting with the Project Engineer and receiving instructions with the specific requirements of a job, including the necessary information required to estimate the heating and air conditioning loads of the building. I was also told the type of heating and air conditioning system which was to be used for the particular job, based on the judgement of the Project Engineer and meetings with the client and/or owner. I then calculated the load of the building, sized and laid out the components of the system, and drafted the drawings. At the end of each project, the Project Engineer then checked all calculations and selections and critiqued the project design. I made the necessary corrections and the job was delivered to the architect or the owner.

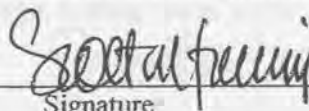

My experience during this time period was valuable to me because I concurrently attended college and was able to relate the theoretical knowledge I was gaining to each project assignment. My mentor during this period was Jack F. Roberts, P.E., Texas # 9325. I worked on several jobs which were built in New Mexico.

I graduated from the College of Engineering at Texas Tech University on August 20, 1982. I received a Bachelor of Science in Mechanical Engineering. From that time until February 20, 1987, I was employed continuously as a Project Engineer. My duties under this engagement consisted of selecting the heating and air conditioning system for the job based on my judgement and input from the client or owner, coordinating the design with the architect, owner, structural engineer, electrical engineer, utility company, building official and code requirements, producing contract documents (drawings and specifications), presiding at bid openings, reviewing submittals and shop drawings for compliance with the contract documents, reviewing pay requests by the contractor, and performing site inspections concluding with the final inspection.

During this period of my employment at Fanning, Fanning & Associates, Inc., my direct supervisors were Registered Professional Engineers in Texas and other states. At the end of a project, a registered principal Engineer in the firm performed a quality control review of my work and sealed the contract documents.

During the course of my duties, on a typical job, I performed the following engineering activities:

1. I met with the architect and owner's representative to discuss appropriate heating, ventilating and air conditioning systems for the specific job. I gathered pertinent information about the construction budget, the building occupancy, the building components and the site. Based on this information, I recommended the appropriate system(s).
2. I performed heating and air conditioning load calculations using ASHRAE methods.

3. I designed and sized the duct and piping system(s) and performed pressure loss calculations for pump and fan selections.
4. I selected and layed out HVAC system components to meet the requirements of the load and space conditions.
5. I performed plumbing calculations for domestic hot and cold water, sewer, vents, and any other plumbing systems involved and designed the plumbing system.
6. I designed fire protection systems.
7. I wrote technical specifications describing all aspects of the installation and performance of the HVAC and Plumbing systems which I designed.
8. I estimated the cost of the systems I designed.

I received my license to practice as a Professional Engineer in the State of Texas on February 3, 1987. My Texas Registration number is 61441. Since that time, my duties have been similar to those listed in the previous engagement, with the addition of being the Engineer of Record on numerous jobs. As supervising Project Engineer, my additional responsibilities include the coordination of all involved disciplines for a project which the firm designs: Mechanical, Electrical and Plumbing. Typically, I supervise a Project Electrical Engineer and a Project Plumbing Engineer and design the Mechanical portion of the work myself. On October 31, 1987, I took the eight-hour written Principles and Practice Examine administered by the National Council of Engineering Examiners. The test was administered in Dallas, Texas. I was tested under the category of Electrical Engineering. I passed this exam. I have previously taken and passed the eight hour Fundamental (EIT) exam administered by NCEE at Texas Tech University on April 17, 1982. Results of these exams are attached. I have been a Project Engineer in responsible charge of my projects since 1988.

Some of the most recent jobs I have been in responsible charge of are listed below:

1. Project: Health Department BSL-3 Lab
Location: City of Lubbock, Lubbock, Texas
Date of Service: 2005
Client: City of Lubbock, Lubbock, Texas
Reference: Parkhill, Smith & Cooper, Inc., Lubbock, Texas, (806) 473-2200
M/E Cost: \$630,000

Description: This laboratory, located at the Health Department building at 19th and Texas Avenue in Lubbock, Texas serves as the south plains' bioterrorism response lab. The facility was constructed under a grant from the Centers for Disease Control and meets CDC Laboratory guidelines as well as NIH Lab requirements for a BSL-3 lab. The project was designed in 2004 and construction was complete in May 2005. The total project cost was approximately \$1 Million. MPE cost was approximately \$630,000.

The HVAC system includes one-pass (100% outside air) constant volume ventilation. All air entering and leaving the lab is HEPA filtered. All major components of the exhaust systems are fully redundant. Pressure relationships in the lab are controlled with lab airflow control valves for both supply and exhaust. Pressure relationships are monitored and alarmed with room pressure monitors. A modular boiler provides heating water to the reheat coils. An air cooled

CERTIFICATE EXPERIENCE RECORD

packaged chiller provides chilled water for the HVAC system. An RO system feeds a gas-fired humidifier to maintain humidity levels in the lab. Controls include a full web-based DDC system capable of offsite notification and alarming, with auto-paging.

Electrical systems include an emergency generator that serves all critical lab functions. Existing labs in the main building were added to the generator. Multiple transfer switches have been provided for reliable electric service to the lab. Security system included video surveillance of the lab, and security cameras for adjacent corridors. Proximity card readers provide access control. The fire alarm system for the building is fully addressable.

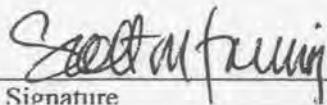

All MPE components were integrated into the air-tight lab space. All HVAC and electrical system components are accessible from outside the lab space for added security.

2. Project: Experimental Sciences Research Laboratory Building
Location: Texas Tech University, Lubbock, Texas
Date of Service: 2002-2005
Client: Texas Tech University, Lubbock, Texas
Reference: Paulo Peres, Texas Tech University, (806) 742-2116
M/E Construction Cost: \$38,000,000

Description: This project included the design of the HVAC, Plumbing, Fire Protection, Life Safety, Electrical: Lighting, Power and Communications systems for the Experimental Sciences Research Lab Building. The new building provides needed state-of-the-art support and analytical research facilities to support the mission of this project and the larger campus science community. It also provides essential research laboratory space characterized by an open "Institute" environment that emphasizes an interdisciplinary approach to research. This 110,000 square foot project includes research lab, support, and office space. The lab spaces include specialized design of a lab airflow control system, which ensures negative pressure relationships in contaminated or laboratory areas. Controls are installed that allow the staff to individually monitor and control the temperature in each animal space. Also included in the design was a seminar room equipped for computer connections and designed for quiet NC25 sound criteria. Planning for a virtual reality cave was included in the project. The data is continuously monitored and trended for quality control purposes, and is alarmed to an attended location.

3. Project: Animal Food Science Lab
Location: Texas Tech University, Lubbock, Texas
Date of Service: 2002-2005
Client: Texas Tech University, Lubbock, Texas
Reference: Michael Knight, Texas Tech University, (806) 742-2761
M/E Construction Cost: \$4,400,000

Description: The Laboratory houses research laboratories, laboratory support space, classrooms, academic offices and "core" facilities. Cold storage facilities are provided. Energy recovery systems are utilized.

4. Project: School of Medicine, Medical Education Building
Location: Texas Tech University, Health Sciences Center, El Paso, Texas
Date of Service: In Process
Client: Texas Tech University, Health Sciences Center, El Paso, Texas
Reference: Bill Ward, Texas Tech University, Lubbock, Texas, (806) 742-3311
M/P/E Construction Cost: \$9,000,000

Description: 126,184 sq.ft., 4-story Medical Education Building consisting of classrooms, conference rooms, multi-purpose laboratories, gross anatomy, morgue, clinical skills center, simulation center, student-staff-faculty, administration offices, building support..

5. Project: Outreach and Extended Studies Building
Location: Texas Tech University, Lubbock, Texas
Date of Service: In Process
Client: Texas Tech University, Lubbock, Texas
Reference: Jean Carlton, Lubbock, Texas, (806) 742-2116
Total Construction Cost: \$7,500,000

Description: A 30,000 sq.ft. single story Spanish Renaissance Building containing offices, workrooms and meeting spaces for the office of extended studies. M/P/E services.

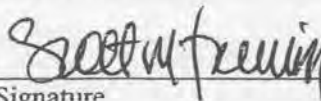

6. Project: Surgery-Emergency-Radiology
Location: Covenant Health System, Lubbock, Texas
Date of Service: 2003
Client: Covenant Health System, Lubbock, Texas
Reference: Jim Price, Lubbock, Texas, (806) 793-4235
Total Construction Cost: \$21,000,000

Description: This project is currently under construction. It consists of building additions for Emergency Suites and Surgery Suites along with remodeled areas for Radiology, additional surgery suites and holding/recovery areas. This is the ultimate Life Safety upgrade.

7. Project: School of Pharmacy, Animal Renovations
Location: Texas Tech University, Lubbock, Texas
Date of Service: 2005
Client: Texas Tech University, Health Sciences Center, Lubbock, Texas
Reference: Bill Ward, Texas Tech University, (806) 742-3311
M/E Upgrades Cost: \$400,000

Description: Texas Tech University Amarillo Campus, Health Sciences Center School of Pharmacy Animal Rooms HVAC study. TAB reports were obtained and other required information. Performed field verification of existing HVAC system. Recommendations were made to upgrade the HVAC system.

8. Project: Institute of Environmental and Human Health
Location: Texas Tech University, Lubbock, Texas
Date of Service: 1999
Client: Texas Tech University, Health Sciences Center, Lubbock, Texas
Reference: Paulo Peres, Texas Tech University, (806) 742-2116

Description: The Institute project involved the conversion of the Reese AFB Civil Engineering Squadron building to a first rate laboratory facility for the newly formed Institute for Environmental and Human Health at Texas Tech. The Scientists who work at the lab are world renowned in the fields of plant, animal and aquatic toxicology. The facility is primarily for research, but its mission includes some teaching. The site includes a supercomputer and a virtual reality theater.

The mechanical system serving the building consists of individual double wall, single zone, constant volume rooftop air handling units for each of ten laboratories. The space temperature and humidity is controlled in each laboratory. The project includes close to one hundred fume hoods. Each hood is served by a single exhaust fan, controlled by a switch on the hood. Negative pressure was required at every laboratory. The pressure control system consists of TSI pressure sensors that control outside and return dampers at the air unit to maintain negative pressure.

The project included three hydronic boilers, three 225 ton air cooled packaged chillers, acid waste piping system, and a 8,000 liter/day central 18 megohm-cm RO water system to serve all labs. The environmental requirements for most lab spaces are 72 degrees F. +/- 1 deg. F.

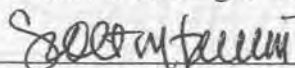

Electrical features of the building include diesel emergency generator sets to provide emergency power for the facility. Laboratory quality power is delivered by the electrical distribution system, which includes a transient suppression system. The supercomputer is served by a UPS system.

9. Project: USDA, AMS, Cotton Division, Headquarters
Location: Memphis, Tennessee
Date of Service: 1996
Client: United States Department of Agriculture, Memphis, TN
Reference: Steve Grantham, USDA, (901) 384-3041
Total Construction Cost: \$6,600,000

Description: Office for Cotton Division HQ, Two Cotton Classing Laboratories for Memphis area, Quality Control Cotton Classing Laboratory, a Research Laboratory with a warehouse for Cotton Samples. Engineering Services for Environmental System Design or facility including Cotton Classing Laboratories to meet the rigid ASTM conditions, temperature 70 deg. F. +/- 1 deg. F. with 65% relative humidity +/- 2% RH, continuously.

10. Project: Chemistry Building Addition
Location: Texas Tech University, Lubbock, Texas
Date of Service: 1979
Client: Texas Tech University, Lubbock, Texas
Reference: Paulo Peres, Texas Tech University, (806) 742-2116
Total Construction Cost: \$8,900,000

Description: In 1968, the Chemistry Building Addition was designed to provide laboratories for Chemistry majors and graduate students. A study was made of laboratory facilities in other universities, medical schools, refineries and manufacturing plants. The Department desired 100% outside air supply for all fume hoods individually controlled outside air supply, exhaust air fan with duct to a vertical discharge stack on the roof. Each room was air conditioned with high velocity double duct individual room control. The outside air for ventilation introduced at ground level was cooled with the chilled water return from the building to the central plant.

11. Project: Southwest Collections/Special Collections Library
Location: Texas Tech University, Lubbock, Texas
Date of Service: 1995
Client: Texas Tech University, Lubbock, Texas
Reference: Preston Lewis, Director, (806) 742-1348
M/E Cost: \$6,450,000

Description: The team designed a new facility to house five distinct collections of material such as photographs, manuscripts, records, maps, ledgers and objects. Major considerations of this project included: locating this facility on a tight spot; creating its own identity yet being compatible with university structures; while providing a setting conducive to research and study, as well as, document and collection preservation.

The 75,850 square foot, two-story facility, incorporated many MPE Design features: including a chilled water/steam HVAC system to meet the close temperature and humidity tolerances for the storage of historical archives. Special equipment included a backup chiller to provide additional dehumidification beyond the capability of the campus chilled water system, packaged desiccant dehumidifiers, variable chilled water flow, and a building automation system.

Some additional projects for which I am the Engineer of Record are listed below:

1. Project: Heart Institute
Location: Midland Memorial Hospital, Midland, Texas
Date: 1993-1995
Duties: Project Engineer
2. Project: Deficiency and Utility Usage Project Report
Location: Texas Tech University, Health Sciences Center, Lubbock, Texas
Date: 1990-1991
Duties: Project Engineer
3. Project: Veterans Administration Hospital, Dental Facilities
Location: Amarillo, Texas
Date: 1987-1989
Duties: Project Engineer
4. Project: Biology Building, Mechanical Renovations
Location: Texas Tech University, Lubbock, Texas
Date: 1992-1994
Duties: Project Engineer
5. Project: Education Facility Renovations
Location: Dept. of Defense: Ft. Benning, GA; Ft. Rucker, AL; Ft. Knox, KY; Robins AFB, GA
Date: 1997-2005
Duties: Project Engineer
6. Project: Survey & Report on Indoor Air Quality Deficiencies (Implemented)
Location: Texas Tech University, Health Sciences Center, El Paso, Texas
Date: 2003-2004
Duties: Project Engineer

RE: Home Inspector Certification

Mr. Robinson:

The Board of Technical Registration was in error in granting you certification as a Home Inspector at its meeting held on November 15, 2005.

Pursuant to ARS 32-122.02 (A)(7) the Board is prohibited from granting certification to an applicant who has a felony conviction that occurred within five years of application. The statute reads as follows:

- A. An applicant for certification as a home inspector shall:
7. Have received an absolute discharge from sentence at least five years before the application if the person has been convicted on one or more felonies, provided the Board determines the applicant is of good moral character and repute.

The Board will be advised of this error at its next meeting on December 20, 2005 and will further be advised to vote and rescind its prior action. By law, the Board has no discretion to grant you certification.

I sincerely apologize for any inconvenience this error in procedure has caused you. You will find attached the check you submitted as application fee.

Sincerely,

Ronald Dalrymple

As Manager of Engineering for NORESKO's Western Region, Mr. Herman was responsible for providing technical and design oversight, cost estimation of projects, and financial consultation.

Mr. Herman was recognized nationally for the 2002 Energy User News Efficient Building Award in the "Best Multi-Site Project" for the County of Los Angeles and in 2003 and for Hawaii Healthcare Systems in the "Best Healthcare Project" category in 2004. Both projects consisted of efficiency measures ranging from water conservation to large lighting and mechanical retrofits.

Mr. Herman recently performed a cost estimation and engineering analysis for the North Orange County Community College District totaling approximately \$9,000,000 in efficiency measures on two campuses. Efficiency measures consist of mechanical retrofits, lighting retrofits, on-site generation, energy management systems, solar window film, pool retrofits, water treatment, and water conservation.

Mr. Herman started in the HVAC industry 23 years ago working in the field. He has held positions as a field mechanic, draftsman, Machinist Mate in the Navy, designer of HVAC and plumbing systems, and mechanical estimator. He has engineered mechanical systems ranging from high-rise buildings to universities in Saudi Arabia.

Re: Resume of Fred Wolf

I earned a degree in Economics from Queens College in 1962, although taking many courses in Physics and other science subjects.

1959 thru 1978, I worked as a Sales Engineer at Honeywell, Inc. where I was responsible for the design and sale of environmental control systems in commercial buildings in NYC.

The control systems required an understanding of Electrical and Mechanical systems in commercial buildings, as well as estimating and cost control.

During 1977, I was "loaned out" to the NYC Mayor's Office to help plan and implement Energy Conservation measures.

In 1979, I started my own company, "Energy Management Control Co." to design and install energy conservation systems.

I managed this company from 1979 thru 2001, where we installed and serviced environmental control systems for many locally and nationally known companies, including:

CBS
NY City College
Various hospitals .. Bellevue Hosp., NY Hosp., Lenox Hill Hosp., Cornell Univ.
Columbia University
Yale University
United Nations building
Numerous office buildings

The systems included, central data networks, distributed micro processors, which required knowledge of electric power and signaling technology, mechanical heating and cooling systems, hydraulics, ventilation systems, codes, etc.

I sold the company in 2001, and I still maintain some contact with the present management.

Should you have any questions, please feel free to call me at 303 942 9435

Send your exam scheduling form and the letter to the examination vendor at the address indicated on the exam scheduling form.

Sabbath Observers

If you would normally observe the Sabbath on the scheduled date of the examination and, therefore, will need alternative testing accommodations, attach a letter from clergy in support of your request to the exam scheduling form sent to you.

Applicants Licensed in Another State (Endorsement)

You may be eligible for licensure in New York State if you:

- meet all requirements for licensure in New York State, except having completed the examination, and
- have been issued a license or a certificate to practice professional engineering upon written examination by a board of examiners in another state or political subdivision of the United States.

The examination for the license or certificate must be equivalent to the examination required in this state at the time it was issued.

You must submit full documentation of compliance with all other New York State licensure requirements including professional education and satisfactory professional experience, among other requirements, as part of your application for licensure by endorsement.

Education/Experience Credits for NYS Licensure

Degree:	Field of Study:	Accreditation:	Credits based on Education:	Work Experience Credits Required for Part A, Fundamentals Exam:	Additional Work Experience Credits Required for Part B, Principles & Practice Exam and for Licensure:
Bachelor	Engineering	ABET/EAC	8	0	4

Bachelor	Engineering	Regional	6	0	6
Bachelor	Technology	Regional	4	2	6
Bachelor	Architecture	Regional	4	2	6
Bachelor	Science related to	Regional	3	3	6

***Please Note:** Payment submitted from outside the United States should be made by check or draft on a United States bank and in United States currency; payments submitted in any other form will not be accepted and will be returned.

Partial Refunds

Individuals who withdraw their licensure application may be entitled to a partial refund.

- For the procedure to withdraw your application, contact the Professional Engineering Unit at opunit1@mail.nysed.gov or by calling (518) 474-3817 ext. 250 or by fax at (518) 402-5354.
- The State Education Department is not responsible for any fees paid to an outside testing or credentials verification agency.

If you withdraw your application, obtain a refund, and then decide to seek New York State licensure at a later date, you will be considered a new applicant, and you will be required to pay the licensure and registration fees and meet the licensure requirements in place at the time you reapply.

Education and Experience Requirements

To become licensed as a professional engineer in New York State you must complete a combination of education and experience for which years of credit are awarded. The credit awarded for your education determines the required number of years of experience you need:

- A total of 6 years of credit is required for admission to the Fundamentals of Engineering examination (Part A)
- A total of 12 years of credit is required for admission to the Principles and Practice examination (Part B) for licensure.

The **table below** and a **PDF chart** are provided to help you determine your eligibility and the number of years of experience you need to take Part A or Part B of the examination.

Experience acceptable for licensure must be of a scope and nature satisfactory to the Department and must be appropriately verified by the Department. The experience must:

- a. demonstrate the intensive application of engineering principles in the practical solution of engineering problems;
- b. demonstrate a knowledge of engineering mathematics, physical and applied sciences, properties of materials, and the fundamental principles of engineering design;
- c. be broad in scope;
- d. develop and mature the applicant's engineering knowledge and judgment; and
- e. include at least two years of experience working on projects requiring knowledge and use of codes and practices commonly used in the United States.

All the experience you wish to have evaluated must be described on **Forms 4 and 4A** and should be accounted for chronologically. Experience descriptions must include specific duties you personally performed, the complexity of the work, and make clear the extent of your responsibility for the work. Please list your experience in a comprehensive, detailed, and explicit manner. The Department will consider only experience that you have completed by the date the application is signed. The quality of the experience, not merely the calendar time, will be evaluated. Time claimed on the forms cannot exceed actual calendar time.

My general engineering duties as an electrical engineer during my employment with "Energy Management" consisted of field surveying, energy management designs, selection and programming of digital controllers, preparation of specifications and drawings, all as applied to commercial, institutional and industrial projects for new constructions, alterations and renovations.

I independently surveyed, established design concepts, developed system schematics, specified equipment and prepared contract documents. My work was reviewed by the project manager before release for construction.

Projects:

La Guardia Community College
Long Island City, NY

The design project was for an upgrade to the College's existing automation system for HVAC control. My personal responsibilities included a field survey of the existing building automation system and design for the upgrade to the system.

I prepared drawings showing all the connections and locations of sensors and controllers for the control of air handling units, fans and reheat coils.

I also sized and specified all the controllers, relays, transformers, temperature and pressure sensors and other miscellaneous equipment for the system.

I prepared the sequences of operation and configured the software application programs for the controllers to be used in the various applications.

I participated in the start-up of the system and followed the operation to meet the building's requirements for the operation of the system.

Lenox Hill Hospital
New York, NY

This project was for the replacement of the Hospital's existing HVAC pneumatic temperature controls with a new state of the art direct digital control (DDC) system. This project also included installation of a new 5000KVA emergency generator, new air handling units and chillers all tied in to the DDC control system.

The project also included the installation of new temperature and humidity controls for operating and patient rooms.

My responsibilities included the selection, sizing and specification of the new digital controllers with all the required sensors, relays, transformers, etc.

I prepared HVAC system schematic drawings illustrating the air handling units, chillers cooling towers and pumps along with DDC controllers, temperature and pressure sensors, automatic dampers and control valves.

From the HVAC system schematics, I developed and wrote the control sequences and selected the application programs to program the controllers to be used in the system and participated in the start-up to ensure the proper operation of the systems.

5 Penn Plaza
New York, NY

The design project was for an upgrade to the existing building automation system for HVAC control in this high-rise office building. The project included replacement of controllers, redesign of the sequences of operation, replacement of sensors, motors and starters.

My responsibilities included the design for the upgrade to the system. I selected, sized and specified all the new digital controllers, panels, relays, transformers, temperature and pressure sensors and other miscellaneous equipment required for proper operation.

I prepared drawings showing all the connections of the sensors and controllers for the control of air handling units, chillers, fans, boilers and pumps.

I prepared the sequences of operation and configured the software application programs for the controllers to be used in the various applications.

CBS Black Building
New York, NY

This project was for installation of additional direct digital controllers to the existing energy management control system for the new and existing mechanical system components, monitoring of refrigerants, flooding of mechanical rooms, domestic water heaters, air handlers and chillers.

My responsibilities included the design for the upgrade to the system. I selected, sized and specified all the new digital controllers, relays, transformers, temperature and pressure sensors, leak detectors and other miscellaneous equipment.

I prepared drawings showing all the connections of the sensors and controllers for the control of air handling units, chillers, reheat coils, fans, boilers and pumps.

I developed and wrote the control sequences and selected the application programs to program the controllers to be used in the system.

IBM Headquarters
Long Island, NY

The design project was for the installation of additional direct digital controllers to the existing building automation system for HVAC control in the computer rooms.

The controllers were for monitoring the critical temperature and humidity in the computer rooms and also to provide alarms to the building management personnel for the various abnormal conditions. My responsibilities included the design for the upgrade to the

system. I selected, sized and specified all the new digital controllers, panels, relays, transformers, temperature sensors and other miscellaneous equipment.

I prepared drawings showing all the connections of the sensors and controllers for the control of AC units.

I prepared the sequences of operation and configured the software application programs for the controllers to be used in the system.

FedEx
New York, NY

This project was for the new building automation system for HVAC control. The HVAC system of this shipping facility consisted of various supply and exhaust fans, air handling units chillers and other mechanical equipment.

My responsibilities included the design for this new system. I selected, sized and specified all the new digital controllers, relays, transformers, temperature, pressure and status sensors, and other miscellaneous equipment.

I prepared drawings showing all the connections of the sensors and controllers for the control of air handling units, chillers and fans.

I developed and wrote the control sequences and selected the application programs to program the controllers to be used in the system.

UN Building
New York, NY

The design project was for the installation of new building automation system to the building to control the new and existing HVAC equipment on five floors of this office building.

My responsibilities included the selection, sizing and specification of the new digital controllers with all the required sensors, relays, transformers, etc.

I prepared HVAC system schematic drawings illustrating the air handling units, reheat coils, compressors, boilers and pumps along with DDC controllers, temperature and pressure sensors, automatic dampers, VAV boxes and control valves. From the HVAC system schematics, I developed and wrote the control sequences and selected the application programs to program the controllers to be used in the system and participated in the start-up to ensure the proper operation of the systems.

My general engineering duties as an electrical engineer during my employment with my former firm consisted of field surveying, preparing general electrical engineering calculations, lighting, power and miscellaneous designs and drawings, equipment selection and preparation of specifications, all as applied to commercial, institutional and industrial projects for new constructions, alterations and renovations.

I surveyed, developed system schematics, specified equipment and prepared contract documents. I coordinated electrical requirements with the mechanical, plumbing and fire protection engineers, assigning work to the CAD operators and assuring quality control of the Contract Drawing. I was also answering bid and construction questions from contractors, reviewing and approving shop drawings, visiting the construction sites and preparing punch lists.

Projects:

Electrical design engineer for the Air Train terminal at Long Island Railroad's Jamaica station.

This project consisted of the following:

- a) Design of a new VCB/JCC (Vertical Circulation Building/Jamaica Control Center) 7-story building for passenger interconnection with the Air Train station.
- b) Renovation of existing New York City Transit Authority subway mezzanine at Jamaica subway station.
- c) Design of new street concourse, for interconnection to the platforms, lobbies, and redesign of the Sutphin Boulevard underpass street area.
- d) Renovation and preservation of the existing five (5) Long Island Railroad (LIRR) platforms, each 1,000 ft. long and a new electrical service for the LIRR platforms.
- e) Design of a new portal-mezzanine bridge structure that interconnects the Air Train terminal building (VCB/JCC) with each of the LIRR platform and with the subway mezzanine area.
- f) New westerly bridge structure for LIRR platform interconnection.

I was a member of a three-person design team and my responsibilities included numerous field surveys of existing conditions and investigations for various power, telephone, data/communication and signal systems at the project site. I recorded the field conditions via sketches, drawings and diagrams.

- Prepared drawings for the demolition of the existing electrical equipment to be removed with associated feeders and conduits. Designed the temporary normal and emergency power distribution system to be used during the construction phase.

- Designed the new temporary lighting, power, data/communication and signal systems and the removal, relocation and protection of the existing systems throughout the construction site. Power provision and circuitry for the temporary information and illuminated patron signs throughout the construction site.

- Designed the new lighting circuitry for all of the areas mentioned above, including the lighting controls via local switches or electronically programmable panelboards and power provisions to the fixtures

- Designed the emergency egress lighting layout using general building fixtures and exit lighting fixtures as per NFPA 101, Life Safety Code and the New York City Building Code. The emergency egress lighting in the subway mezzanine was designed with DC lighting fixtures, to be fed from the third rail. Sized and specified the DC fuse box, panel and feeders based on New York City Electrical Code and on New York City Transit Authority's recommendations.

- Designed the branch circuit requirements for the lighting and power systems based on actual loads of the equipment or using the allowances contained in the New York City Electrical Code.

- Coordinated electrical, data/communication and telephone requirements for the advertisement, information, and patron signs throughout the project, such as the airport flight and LIRR information monitors and flat plasma screen display boards.

- Coordinated and designed electrical, power, low voltage and fiber optic lines such as data/communication and telephone systems for offices, rooms, waiting rooms and miscellaneous areas and freestanding Air Train and LIRR passenger, information, police, guard and ticket booths, interconnection of the systems and connections to the central communication, solar and security rooms.

- Designed and coordinated the connections of the new systems with the existing ones. Coordinated and designed the power and data/communication for the airline ticket and baggage check-in counters, and the power provisions for a baggage conveyor belt, access doors and access gates in the fare zone.

- Designed the CCTV security system throughout the project including cameras, monitors, head end equipment control consoles, etc., with power provisions and data/communication connections using fiber-optic cables to eliminate the noise that exists on the project site from the third rail and other systems. As part of the security systems, also provided power and for the delta barriers and anti-ram and retractable gates.

- Coordinated and designed the equipment location in various data/communication, telephone, mechanical and elevator machine rooms, and located all the electrical equipment in the electrical rooms
- Designed the power and miscellaneous data/communication systems for the replacement of the platforms and platform canopies, for the entire length of the platforms. Also, designed conduit ductbanks and conduit in the platform canopies and along each side of the platform, to accommodate feeders for the normal and emergency power and various data/communication and railroad signal systems.
- Also, I designed the routing of empty conduits, wireways and cable trays for the telephone, signal, communication, etc., systems as well as the underground duct-bank layouts.
- Coordinated the above routings, transitions and penetrations thru structural members, beams, girders, the foundation, pile caps with pull boxes, manholes and equipment locations. Sized and specified all of the equipment mentioned above using the National Electrical Code, the New York City Electrical Code and the Port Authority and LIRR specifications and guidance.
- Performed various load calculations and voltage drop calculations for branch circuits and feeders
- Designed a layout of fire alarm system devices and fire alarm system control panels complying with NFPA72-National Fire Alarm Code, the New York City Building Code, and the Americans with Disabilities Act (ADA), throughout the project.
- Selected, sized and routed conduit and feeders, selected, sized and specified panelboards. Developed drawings for the demolition and new work, reviewed submittals of progress design drawings and supervised the drafting manpower to meet the project deadlines.
- Designed the one line, riser and block diagrams for the lighting control, fire alarm, public address, solari and CCTV camera systems.
- Reviewed shop drawings, attended clarification meetings with the contractor, prepared sketches and diagrams for the contractor. Responded to contractor's request for information (RFI's) and attended field and construction meetings.

St. Nicholas Russian Orthodox Cathedral
New York, NY

This project was for installation of new lighting and dimming system for these lights in the Cathedral and for power provision for the new lighting and new air conditioning units.

I was personally responsible for the electrical design and my work included:

- Field surveyed existing electrical distribution system and panelboards to determine from where to feed the new air conditioning, fan coiled units and the lighting panel.
- Routed feeders with minimal disruptions to the architecture of the Cathedral.
- Calculated the new lighting loads and feeders, sized and specified the panels, dimming system, disconnect switches and miscellaneous equipment.
- Coordination meetings with the lighting consultant, and the architect to achieve the intended lighting design.
- Prepared drawings for the new and demolition work showing panels, risers lighting controls and the new lighting, and designed the branch circuit requirements for the lighting and power systems all in accordance with the New York City Electrical Code.

North Shore University Hospital – MFM 3rd Floor Renovation
Manhasset, NY

The design project was for the renovation of test rooms, doctor office's, reception area and a new waiting room. I was a member of two-person design team for the electrical design and my responsibilities included lighting, power, telephone, nursing call and fire alarm design for the renovated portion of the building as described below:

- Designed the branch circuit requirements for the lighting and power systems using the actual loads of the equipment or using the allowances contained in the National Electrical Code.
- Coordinated electrical requirements for the service in the test (ultrasound) rooms
- Designed a layout of fire alarm devices complying with the NFPA 72 – National Fire Alarm Code, the New York City Building Code and the Americans with Disabilities Act (ADA).
- Designed the new nursing call and telephone systems.

- Sized and specified new panelloads, feeders and miscellaneous equipment.
- Prepared specifications and drawings for the demolition and new work and supervised the drafting manpower.

The James W. Pihos Cultural Center
Wauwatosa, Wisconsin

The design project was for the installation of a new electrical and fire alarm systems to this new Cultural Center building at Annunciation Greek Orthodox Church. I was a member of a two-person design team for the electrical design and my responsibilities included:

- Designed the new dimming lighting control for several rooms and for the gym/hall combination.
- Designed and specified an emergency egress lighting using the general building fixtures and exit lighting fixtures as per NFPA 101.
- Designed the branch circuit requirements for the kitchen, for mixers, freezers, dishwashers, boilers, exhaust fans, disposer, ovens, heaters, etc.
- Calculated the loads and designed the branch circuit requirements for the lighting and power systems using the actual loads of the equipment or using the allowances contained in the National Electrical Code.
- Arranged the layout of the electric service room with the switchboard, panelboards, transformers and a motor control center, maintaining the required clearances.
- Coordinated the location of electrical equipment with the Architect, Mechanical and Plumbing designers and specified the electrical equipment.
- Designed the layout of the fire alarm system devices in compliance with the NFPA 72 – National Fire Alarm Code, and the Americans with Disabilities Act and local jurisdiction requirements.
- Prepared drawings and specifications for the contract documents and supervised the drafting manpower.

Public Park "Kalemegdan"
Belgrade, Yugoslavia

The design project was for the installation of new lighting in one area of the park. I was personally responsible for the electrical design of this project and my responsibilities included:

1. Field surveying of the existing lighting, feeders and panels feeding the lights.
2. Designed the new lighting for the area of the park, using the foot-candle level recommended, for this application and specified the new lighting fixtures.
3. Calculated the new load, sized and specified the new feeders and provided a voltage drop calculation.
4. Designed the locations of the lighting poles and routing of new feeders to the lighting poles. I also sized and specified a new panel board and controls for the lights.
5. Prepared the contract documents and drawings and checked final installation.

Recreational Center "Partizan"
Belgrade, Yugoslavia

This design project was for a new athletic facility at this recreational center. I was the sole electrical designer for the project working directly for a project manager and the work I personally performed for this project included:

1. Design of new electrical distribution system
2. Load calculations.
3. Panel selection and specification.
4. Routing of new feeders.
5. Lighting layout design.
6. Selection and specification of lighting fixtures.
7. Development of contract documents for construction.

3. Locating all new equipment and generating demolition and new work plans for installation of the new equipment.

Private Residence "Jovanovic"
Belgrade, Yugoslavia

The design project was for the installation of electrical system to this private house. I was a member of a 3-person design team for the electrical design and my responsibilities included:

1. Calculated the loads for the new electrical devices to be used in the house and lighting load calculations.
2. Sized and specified new panel boards, feeders and the new service to the building.
3. Prepared drawings and specifications for the contract documents.
4. Checked shop drawings and installation.
- 5.

College Cafeteria "Veterinarski Fakultet"
Belgrade, Yugoslavia

The design project was for upgrade of the existing electrical service to the cafeteria kitchen. I was the primary designer under a project manager. My responsibilities for the project included:

1. Field surveying existing electrical distribution for the kitchen area.
2. Locating new electrical outlets for the equipment (provided by architect) and coordinating with architectural plans.
3. Generating demolition and new work plans for new installations.
4. Calculating the new loads, sizing and specifying the new panel and feeders accordingly.
5. Inspection of final installation for conformance to design drawings.

Library "SANU"
Belgrade, Yugoslavia

This project was for the rehabilitation of existing electrical service to the library building. I was a member of a 2-person design team working under the supervision of a project manager. My personal responsibilities for this project included:

1. Load calculations, new lighting layout and circuiting redistribution of electrical power.
2. Field surveying existing/new work.
3. Specifying and sizing new panels and feeders.
4. Preparation of Contract Documents.
5. Coordination with the building engineer.

My general engineering duties as an electrical engineer during my employment with "IP Group" consisted of field surveying, preparing general electrical engineering calculations, lighting, power and miscellaneous designs and drawings, equipment selection and preparation of specifications, all as applied to commercial, institutional, residential and industrial projects for new constructions, alterations and renovations.

I independently surveyed, established design concepts, developed system schematics, specified equipment and prepared contract documents. My work was reviewed by the project manager before release for construction. For the aspects of the designed I had detailed, I was coordinating electrical requirements with the mechanical, plumbing and fire protection engineers. I was also answering bid and construction questions from contractors, reviewing and approving shop drawings, visiting the construction sites and preparing punch lists.

Projects:

65 Bleecker St.
New York, NY

The design project was for an upgrade to the existing power distribution to the building, elimination of DC power and provision for additional passenger elevator, at this office building in New York City. I was personally responsible for the electrical design and my work included:

- Field surveying of existing electrical distribution systems.
- Calculated the existing loads, the capacity of the existing service and the requirements for the new distribution system.
- Provided analysis on the existing conditions of the two systems (AC and DC) and the impact based on elimination of the existing DC system.
- Performed load calculations to determine if the existing distribution system, panel boards and feeders could accommodate the new loads.
- Sized and specified new panelloads and feeders for the existing and new elevators and the rectifiers for the existing elevators, using the appropriate sections of the Electrical Code of the City of New York.
- Located all the new equipment and generated demolition and new work plans, for installation of the new equipment.

NYCHA Amsterdam Addition
New York, NY

This project was for installation of new theatrical lighting and dimming system of these lights in the theater of the Amsterdam Addition and for power provision for the new lighting.

I was personally responsible for the electrical design and my work included:

- Field surveying of existing electrical distribution system and panel boards to determine from where to feed the new lighting panel and routing of the feeders to the control booth with minimal disruptions to the Architecture of the building.
- Calculated the new lighting loads and feeders, sized and specified the panel, dimming system and miscellaneous equipment.
- Coordination meetings with the lighting consultant, architect and NYCHA representative to achieve the intended lighting design.
- Prepared drawings for the new panel, riser and for the theatrical lighting, circuited lights for the desired scenery, all in accordance with the New York City Electrical Code.

The first Presbyterian Church New York, NY

This project was for installation of new outdoor decorative lighting for the Church and power provision for the new lights. I was personally responsible for the electrical design and my work included:

- Field surveying of existing electrical distribution system to determine the available capacity for the new lighting load, and the routing of the feeders from the existing panel to the outdoor lights with minimal disruptions to the Architecture of the Church.
- Calculated the new lighting loads and sized and specified the feeders.
- Prepared drawings for the outdoor lighting and circuited the lights, all in accordance with the New York City Electrical Code.

Saint Vincent Hospital Westchester, NY

The design project was for the renovation of patient rooms, cafeteria and nursing rooms. I was a member of two-person design team for the electrical design and my responsibilities included lighting, power and fire alarm design for the renovated portion of the building as described below:

- Designed the branch circuit requirements for the lighting and power systems using the actual loads of the equipment or using the allowances contained in the National Electrical Code.
- Designed a layout of fire alarm devices complying with the NFPA 72 – National Fire Alarm Code, the New York City Building Code and the Americans with Disabilities Act (ADA).
- Designed the new nursing call and telephonic systems.
- Sized and specified new panel loads, feeders and miscellaneous equipment.

Fisher Mills Building
New York, NY

The design project was for the installation of electrical and fire alarm systems to this new apartment building. I was a member of a two-person design team for the electrical design and my responsibilities included:

- Calculated the loads for the new electrical devices to be used in the apartment and lighting load calculations based on Architect's lighting fixture selection and New York City electrical code requirements.
- Sized and specified new panel boards and feeders with risers for each apartment and panels for miscellaneous house loads such as exhaust fans, and air-handling units, new distribution board and the new service to the building.
- Coordinated the location with the Architect, Mechanical and Plumbing designers and specified the electrical equipment.
- Performed the voltage drop calculations conforming to the New York City Electrical Code.
- Prepared drawings and specifications for the contract documents.
- Designed and specified an emergency egress lighting and the layout of the fire alarm system devices in compliance with the NFPA 72 – National Fire Alarm Code and local jurisdiction requirements.

173-175 Riverside Drive
New York, NY

The design project was for an upgrade to the existing electrical distribution system, the installation of new meter banks and new riser for all of the apartments in this two building apartment complex. I was personally responsible for the electrical design of this project working under a project manager and my responsibilities included:

- Field surveying of the existing electrical distribution system, calculation of existing loads in conjunction with the New York City Electrical Code recommendations and with the desired upgrades to each apartment.
- Sized and specified the new distribution boards, feeders and new meter banks for both buildings.
- Located the new equipment and generated demolition and new work plans for installation of new equipment, routed the new risers from the electrical rooms in and thru the basement and up to the apartments, coordinating the routes with the Architect and the Building Representative.

Sutton House
New York, NY

This project was for an upgrade to the existing electrical distribution system and the existing meter banks in this three building apartment complex. I was personally responsible for the electrical design of this project and my responsibilities included:

- Field surveying of the existing electrical equipment rooms with associated electrical equipment of the electrical distribution system, starting with the service end boxes, service switches and to the meter banks.
- Calculated the existing loads, the capacity of the existing service and the requirements for the new distribution systems.
- Sized and specified the new distribution system to accommodate existing load requirements and provisions for future upgrades.
- Sized and specified the new feeders and switches, located the new equipment and generated drawings for demolition and new work plans for installation.

5 Tudor Place
New York, NY

The design project was for an upgrade to the existing electrical distribution system and the replacement of the panel boards feeding the apartments in one of the buildings of this apartment complex. I was personally responsible for the electrical design of this project and my responsibilities included:

- Field surveying of the existing electrical rooms and the associated electrical distribution system.
- Calculated the existing loads, and the load requirements, based on the New York City Electrical Code and the actual power demand for the apartments.
- Sized and specified new panel boards and new feeders to the panels to eliminate the old panel boards with oil filled circuit breakers, which liked and were hard to maintain.
- Suggested couple of other upgrades to eliminate code violations and hazardous conditions.
- Designed new routings for the feeders from the distribution boards to the new panels.
- Prepared the contract documents and drawings for the demolition and new work to be performed.

95 Madison Avenue
New York, NY

This project was for the elimination of the DC service for the two service elevators, DC panel distribution board and upgrade to the AC distribution to accommodate the elevator loads to be fed via rectifiers from the existing AC distribution board in this office building. I was personally responsible for the electrical design of this project and my responsibilities included:

- Calculated the loads for the existing service elevators to ensure that the existing AC distribution board and service has the capacity to accommodate the new loads.
- Sized and specified the new rectifiers and disconnect switches in the switchboard and feeders to the rectifiers and provided volt drop calculations for the feeders to the rectifiers and to the elevator machine room.
- Prepared the contract documents and drawings for the demolition and new work to be performed.

Linwood Plaza,
Fort Lee, NJ

The design project was for the installation of new lighting in the parking lot of this shopping center. I was personally responsible for the electrical design of this project and my responsibilities included:

- Field surveying of the existing lighting, feeders and panels feeding the lights.
- Designed the new lighting for the parking lot, using the foot-candle level recommended in the National Electrical Code, for this application and specified the new high efficiency high pressure sodium lighting fixtures with the help of the lighting manufacturer representative.
- Calculated the new load sized and specified the new feeders and provided a voltage drop calculation.
- Designed the locations of the lighting poles and routing of new feeders to the lighting poles. I also sized and specified a new panel board and controls for the lights.
- Prepared the contract documents and drawings for the demolition and new work to be performed.

Sokol Warehouse
Forest Hills, NY

The design project was for the renovation of these 40,000 sq feet of warehouse. This project included new lighting layouts, circuiting and redistribution of electrical power and design of new fire alarm and telecommunication systems. I was personally responsible for the electrical design of this project and my responsibilities included:

- Field surveying of existing electrical distribution system with preparation of demolition drawings for removal of existing electrical equipment with associated wiring up to the service end box.
- Designed the branch circuiting for the new lighting and power systems using the allowances contained in the New York City Electrical Code.
- Sized and specified all the panels and the main distribution board.
- Prepared the contract documents and drawings for the demolition and new work to be performed.

Marymount Manhattan College
New York, NY

This project was for the new data center and renovation of the existing computer rooms. The technology infrastructure consisted of personal computers, monitors and associated peripheral equipment such as printers, etc. in the computer rooms and servers and monitors in the data center. I was personally responsible for the electrical design of this project and my responsibilities included:

- Designed a new computer power distribution system and various miscellaneous loads in the data center and the computer rooms such as new lighting and HVAC and general receptacles.
- Designed the backup power system for the computers in the data center and coordinated with the vendor the branch circuit requirements for the electrified furniture system.
- Designed the lighting layout and circuitry for the miscellaneous loads and sized and specified the new panel boards.
- Calculated the feeders from the panel boards to the existing distribution panels and designed the routing.
- Sized and specified the computer panel boards for the number of branch circuits required by the technology infrastructure.
- Performed voltage drop calculations and prepared the plans for the demolition work and new installation of electrical equipment.

Projects:

Electrical design engineer for the Air Train terminal at Long Island Railroad's Jamaica station.

This project consisted of the following:

- a) Design of a new VCB/JCC (Vertical Circulation Building/Jamaica Control Center) 7-story building for passenger interconnection with the Air Train station.
- b) Renovation of existing New York City Transit Authority subway mezzanine at Jamaica subway station.
- c) Design of new street concourse, for interconnection to the platforms, lobbies, and redesign of the Sutphin Boulevard underpass street area.
- d) Renovation and preservation of the existing five (5) Long Island Railroad (LIRR) platforms, each 1,000 ft. long and a new electrical service for the LIRR platforms.
- e) Design of a new portal-mezzanine bridge structure that interconnects the Air Train terminal building (VCB/JCC) with each of the LIRR platform and with the subway mezzanine area.
- f) New westerly bridge structure for LIRR platform interconnection.

I was a member of a three-person design team and my responsibilities included numerous field surveys of existing conditions and investigations for various power, telephone, data/communication and signal systems at the project site. I recorded the field conditions via sketches, drawings and diagrams.

- Prepared drawings for the demolition of the existing electrical equipment to be removed with associated feeders and conduits. Designed the temporary normal and emergency power distribution system to be used during the construction phase.

- Designed the new temporary lighting, power, data/communication and signal systems and the removal, relocation and protection of the existing systems throughout the construction site. Power provision and circuitry for the temporary information and illuminated patron signs throughout the construction site.

- Designed the new lighting circuitry for all of the areas mentioned above, including the lighting controls via local switches or electronically programmable panelboards and power provisions to the fixtures

- Designed the emergency egress lighting layout using general building fixtures and exit lighting fixtures as per NFPA 101, Life Safety Code and the New York City Building Code. The emergency egress lighting in the subway mezzanine was designed with DC lighting fixtures, to be fed from the third rail. Sized and specified the DC fuse box, panel and feeders based on New York City Electrical Code and on New York City Transit Authority's recommendations.

- Designed the branch circuit requirements for the lighting and power systems based on actual loads of the equipment or using the allowances contained in the New York City Electrical Code.

- Coordinated electrical, data/communication and telephone requirements for the advertisement, information, and patron signs throughout the project, such as the airport flight and LIRR information monitors and flat plasma screen display boards.

- Coordinated and designed electrical, power, low voltage and fiber optic lines such as data/communication and telephone systems for offices, rooms, waiting rooms and miscellaneous areas and freestanding Air Train and LIRR passenger, information, police, guard and ticket booths, interconnection of the systems and connections to the central communication, solar and security rooms.

- Designed and coordinated the connections of the new systems with the existing ones. Coordinated and designed the power and data/communication for the airline ticket and baggage check-in counters, and the power provisions for a baggage conveyor belt, access doors and access gates in the fare zone.

- Designed the CCTV security system throughout the project including cameras, monitors, head end equipment control consoles, etc., with power provisions and data/communication connections using fiber-optic cables to eliminate the noise that exists on the project site from the third rail and other systems. As part of the security systems, also provided power and for the delta barriers and anti-ram and retractable gates.

- Coordinated and designed the equipment location in various data/communication, telephone, mechanical and elevator machine rooms, and located all the electrical equipment in the electrical rooms

- Designed the power and miscellaneous data/communication systems for the replacement of the platforms and platform canopies, for the entire length of the platforms. Also, designed conduit ductbanks and conduit in the platform canopies and along each side of the platform, to accommodate feeders for the normal and emergency power and various data/communication and railroad signal systems.

- Also, I designed the routing of empty conduits, wireways and cable trays for the telephone, signal, communication, etc., systems as well as the underground duct-bank layouts.

- Coordinated the above routings, transitions and penetrations thru structural members, beams, girders, the foundation, pile caps with pull boxes, manholes and equipment locations. Sized and specified all of the equipment mentioned above using the National Electrical Code, the New York City Electrical Code and the Port Authority and LIRR specifications and guidance.

- Performed various load calculations and voltage drop calculations for branch circuits and feeders

- Designed a layout of fire alarm system devices and fire alarm system control panels complying with NFPA72-National Fire Alarm Code, the New York City Building Code, and the Americans with Disabilities Act (ADA), throughout the project.

- Selected, sized and routed conduit and feeders, selected, sized and specified panelboards. Developed drawings for the demolition and new work, reviewed submittals of progress design drawings and supervised the drafting manpower to meet the project deadlines.

- Designed the one line, riser and block diagrams for the lighting control, fire alarm, public address, solar and CCTV camera systems.

- Reviewed shop drawings, attended clarification meetings with the contractor, prepared sketches and diagrams for the contractor. Responded to contractor's request for information (RFI's) and attended field and construction meetings.

St. Nicholas Russian Orthodox Cathedral
New York, NY

This project was for installation of new lighting and dimming system for these lights in the Cathedral and for power provision for the new lighting and new air conditioning units.

I was personally responsible for the electrical design and my work included:

- Field surveyed existing electrical distribution system and panelboards to determine from where to feed the new air conditioning, fan coiled units and the lighting panel.
- Routed feeders with minimal disruptions to the architecture of the Cathedral.
- Calculated the new lighting loads and feeders, sized and specified the panels, dimming system, disconnect switches and miscellaneous equipment.
- Coordination meetings with the lighting consultant, and the architect to achieve the intended lighting design.
- Prepared drawings for the new and demolition work showing panels, risers lighting controls and the new lighting, and designed the branch circuit requirements for the lighting and power systems all in accordance with the New York City Electrical Code.

North Shore University Hospital – MFM 3rd Floor Renovation
Manhasset, NY

The design project was for the renovation of test rooms, doctor office's, reception area and a new waiting room. I was a member of two-person design team for the electrical design and my responsibilities included lighting, power, telephone, nursing call and fire alarm design for the renovated portion of the building as described below:

- Designed the branch circuit requirements for the lighting and power systems using the actual loads of the equipment or using the allowances contained in the National Electrical Code.
- Coordinated electrical requirements for the service in the test (ultrasound) rooms
- Designed a layout of fire alarm devices complying with the NFPA 72 – National Fire Alarm Code, the New York City Building Code and the Americans with Disabilities Act (ADA).
- Designed the new nursing call and telephone systems.

- Sized and specified new panelloads, feeders and miscellaneous equipment.
- Prepared specifications and drawings for the demolition and new work and supervised the drafting manpower.

The James W. Pihos Cultural Center
Wauwatosa, Wisconsin

The design project was for the installation of a new electrical and fire alarm systems to this new Cultural Center building at Annunciation Greek Orthodox Church. I was a member of a two-person design team for the electrical design and my responsibilities included:

- Designed the new dimming lighting control for several rooms and for the gym/hall combination.
- Designed and specified an emergency egress lighting using the general building fixtures and exit lighting fixtures as per NFPA 101.
- Designed the branch circuit requirements for the kitchen, for mixers, freezers, dishwashers, boilers, exhaust fans, disposer, ovens, heaters, etc.
- Calculated the loads and designed the branch circuit requirements for the lighting and power systems using the actual loads of the equipment or using the allowances contained in the National Electrical Code.
- Arranged the layout of the electric service room with the switchboard, panelboards, transformers and a motor control center, maintaining the required clearances.
- Coordinated the location of electrical equipment with the Architect, Mechanical and Plumbing designers and specified the electrical equipment.
- Designed the layout of the fire alarm system devices in compliance with the NFPA 72 – National Fire Alarm Code, and the Americans with Disabilities Act and local jurisdiction requirements.

My general engineering duties as an electrical engineer during my employment with "IP Group" consisted of field surveying, preparing general electrical engineering calculations, lighting, power and miscellaneous designs and drawings, equipment selection and preparation of specifications, all as applied to commercial, institutional, residential and industrial projects for new constructions, alterations and renovations.

I independently surveyed, established design concepts, developed system schematics, specified equipment and prepared contract documents. My work was reviewed by the project manager before release for construction. For the aspects of the designed I had detailed, I was coordinating electrical requirements with the mechanical, plumbing and fire protection engineers. I was also answering bid and construction questions from contractors, reviewing and approving shop drawings, visiting the construction sites and preparing punch lists.

Projects:

65 Bleecker St.
New York, NY

The design project was for an upgrade to the existing power distribution to the building, elimination of DC power and provision for additional passenger elevator, at this office building in New York City. I was personally responsible for the electrical design and my work included:

- Field surveying of existing electrical distribution systems.
- Calculated the existing loads, the capacity of the existing service and the requirements for the new distribution system.
- Provided analysis on the existing conditions of the two systems (AC and DC) and the impact based on elimination of the existing DC system.
- Performed load calculations to determine if the existing distribution system, panel boards and feeders could accommodate the new loads.
- Sized and specified new panelloads and feeders for the existing and new elevators and the rectifiers for the existing elevators, using the appropriate sections of the Electrical Code of the City of New York.
- Located all the new equipment and generated demolition and new work plans, for installation of the new equipment.

NYCHA Amsterdam Addition
New York, NY

This project was for installation of new theatrical lighting and dimming system of these lights in the theater of the Amsterdam Addition and for power provision for the new lighting.

I was personally responsible for the electrical design and my work included:

- Field surveying of existing electrical distribution system and panel boards to determine from where to feed the new lighting panel and routing of the feeders to the control booth with minimal disruptions to the Architecture of the building.
- Calculated the new lighting loads and feeders, sized and specified the panel, dimming system and miscellaneous equipment.
- Coordination meetings with the lighting consultant, architect and NYCHA representative to achieve the intended lighting design.
- Prepared drawings for the new panel, riser and for the theatrical lighting, circuited lights for the desired scenery, all in accordance with the New York City Electrical Code.

The first Presbyterian Church
New York, NY

This project was for installation of new outdoor decorative lighting for the Church and power provision for the new lights. I was personally responsible for the electrical design and my work included:

- Field surveying of existing electrical distribution system to determine the available capacity for the new lighting load, and the routing of the feeders from the existing panel to the outdoor lights with minimal disruptions to the Architecture of the Church.
- Calculated the new lighting loads and sized and specified the feeders.
- Prepared drawings for the outdoor lighting and circuited the lights, all in accordance with the New York City Electrical Code.

Saint Vincent Hospital
Westchester, NY

The design project was for the renovation of patient rooms, cafeteria and nursing rooms. I was a member of two-person design team for the electrical design and my responsibilities included lighting, power and fire alarm design for the renovated portion of the building as described below:

- Designed the branch circuit requirements for the lighting and power systems using the actual loads of the equipment or using the allowances contained in the National Electrical Code.
- Designed a layout of fire alarm devices complying with the NFPA 72 – National Fire Alarm Code, the New York City Building Code and the Americans with Disabilities Act (ADA).
- Designed the new nursing call and telephone systems.
- Sized and specified new panel loads, feeders and miscellaneous equipment.

Fisher Mills Building
New York, NY

The design project was for the installation of electrical and fire alarm systems to this new apartment building. I was a member of a two-person design team for the electrical design and my responsibilities included:

- Calculated the loads for the new electrical devices to be used in the apartment and lighting load calculations based on Architect's lighting fixture selection and New York City electrical code requirements.
- Sized and specified new panel boards and feeders with risers for each apartment and panels for miscellaneous house loads such as exhaust fans, and air-handling units, new distribution board and the new service to the building.
- Coordinated the location with the Architect, Mechanical and Plumbing designers and specified the electrical equipment.
- Performed the voltage drop calculations conforming to the New York City Electrical Code.
- Prepared drawings and specifications for the contract documents.
- Designed and specified an emergency egress lighting and the layout of the fire alarm system devices in compliance with the NFPA 72 – National Fire Alarm Code and local jurisdiction requirements.

173-175 Riverside Drive
New York, NY

The design project was for an upgrade to the existing electrical distribution system, the installation of new meter banks and new riser for all of the apartments in this two building apartment complex. I was personally responsible for the electrical design of this project working under a project manager and my responsibilities included:

- Field surveying of the existing electrical distribution system, calculation of existing loads in conjunction with the New York City Electrical Code recommendations and with the desired upgrades to each apartment.
- Sized and specified the new distribution boards, feeders and new meter banks for both buildings.
- Located the new equipment and generated demolition and new work plans for installation of new equipment, routed the new risers from the electrical rooms in and thru the basement and up to the apartments, coordinating the routes with the Architect and the Building Representative.

Sutton House
New York, NY

This project was for an upgrade to the existing electrical distribution system and the existing meter banks in this three building apartment complex. I was personally responsible for the electrical design of this project and my responsibilities included:

- Field surveying of the existing electrical equipment rooms with associated electrical equipment of the electrical distribution system, starting with the service end boxes, service switches and to the meter banks.
- Calculated the existing loads, the capacity of the existing service and the requirements for the new distribution systems.
- Sized and specified the new distribution system to accommodate existing load requirements and provisions for future upgrades.
- Sized and specified the new feeders and switches, located the new equipment and generated drawings for demolition and new work plans for installation.

5 Tudor Place
New York, NY

The design project was for an upgrade to the existing electrical distribution system and the replacement of the panel boards feeding the apartments in one of the buildings of this apartment complex. I was personally responsible for the electrical design of this project and my responsibilities included:

- Field surveying of the existing electrical rooms and the associated electrical distribution system.
- Calculated the existing loads, and the load requirements, based on the New York City Electrical Code and the actual power demand for the apartments.
- Sized and specified new panel boards and new feeders to the panels to eliminate the old panel boards with oil filled circuit breakers, which liked and were hard to maintain.
- Suggested couple of other upgrades to eliminate code violations and hazardous conditions.
- Designed new routings for the feeders from the distribution boards to the new panels.
- Prepared the contract documents and drawings for the demolition and new work to be performed.

95 Madison Avenue
New York, NY

This project was for the elimination of the DC service for the two service elevators, DC panel distribution board and upgrade to the AC distribution to accommodate the elevator loads to be fed via rectifiers from the existing AC distribution board in this office building. I was personally responsible for the electrical design of this project and my responsibilities included:

- Calculated the loads for the existing service elevators to ensure that the existing AC distribution board and service has the capacity to accommodate the new loads.
- Sized and specified the new rectifiers and disconnect switches in the switchboard and feeders to the rectifiers and provided volt drop calculations for the feeders to the rectifiers and to the elevator machine room.
- Prepared the contract documents and drawings for the demolition and new work to be performed.

Linwood Plaza,
Fort Lee, NJ

The design project was for the installation of new lighting in the parking lot of this shopping center. I was personally responsible for the electrical design of this project and my responsibilities included:

- Field surveying of the existing lighting, feeders and panels feeding the lights.
- Designed the new lighting for the parking lot, using the foot-candle level recommended in the National Electrical Code, for this application and specified the new high efficiency high pressure sodium lighting fixtures with the help of the lighting manufacturer representative.
- Calculated the new load sized and specified the new feeders and provided a voltage drop calculation.
- Designed the locations of the lighting poles and routing of new feeders to the lighting poles. I also sized and specified a new panel board and controls for the lights.
- Prepared the contract documents and drawings for the demolition and new work to be performed.

Sokol Warehouse
Forest Hills, NY

The design project was for the renovation of these 40,000 sq feet of warehouse. This project included new lighting layouts, circuiting and redistribution of electrical power and design of new fire alarm and telecommunication systems. I was personally responsible for the electrical design of this project and my responsibilities included:

- Field surveying of existing electrical distribution system with preparation of demolition drawings for removal of existing electrical equipment with associated wiring up to the service end box.
- Designed the branch circuiting for the new lighting and power systems using the allowances contained in the New York City Electrical Code.
- Sized and specified all the panels and the main distribution board.
- Prepared the contract documents and drawings for the demolition and new work to be performed.

Marymount Manhattan College
New York, NY

This project was for the new data center and renovation of the existing computer rooms. The technology infrastructure consisted of personal computers, monitors and associated peripheral equipment such as printers, etc. in the computer rooms and servers and monitors in the data center. I was personally responsible for the electrical design of this project and my responsibilities included:

- Designed a new computer power distribution system and various miscellaneous loads in the data center and the computer rooms such as new lighting and HVAC and general receptacles.
- Designed the backup power system for the computers in the data center and coordinated with the vendor the branch circuit requirements for the electrified furniture system.
- Designed the lighting layout and circuitry for the miscellaneous loads and sized and specified the new panel boards.
- Calculated the feeders from the panel boards to the existing distribution panels and designed the routing.
- Sized and specified the computer panel boards for the number of branch circuits required by the technology infrastructure.
- Performed voltage drop calculations and prepared the plans for the demolition work and new installation of electrical equipment.

Firm registration

The Board directed staff to develop a program for the issuance of annual notices of re-application for firm registration. Staff has worked with a vendor to develop a computerized system to be mailed to firms. We started testing the program in November. The program is expected to be fully implemented 1-1-05.

The program will consist of a query that lists all firms expiring in the specified month. A second query will be initiated of the computer database which will consist of instructions to create an application form for all firms expiring in the specified month. The printed forms will be cross checked to the list and then the forms will be mailed not less than 45 days prior to expiration.

The printed forms will be cross checked to the list and then the forms will be mailed out no later than 45 days prior to expiration.

Any firm not filing a completed application and submitting the proper fee by the last day of the expiring registration month will be deemed to not be registered and any practice or advertising after the end of the month without a proper registration will subject both the firm, and its responsible registrant, to a civil penalty for unlicensed practice and investigation costs. Applications will be deemed to have been timely filed if the application is postmarked on, or before, the last day of the month of expiration.

On-line renewal of individual registrations

Staff is working with the Government Information Technology Agency and IBM to develop the ability to accept renewal of individual registrations over the internet utilizing credit cards. It is anticipated that this program will become operational by the end of March. The technology is already in use by the Department of Motor Vehicles, the Real Estate Department and the Pharmacy Board. The Board of Technical Registration is the next agency to attempt to convert their system to allow this feature.

The test electronic renewal page was reviewed by the development team on 12-12-05 and appears to have all necessary elements for renewal. An operational test will take place in early January.

Sunset Review

On September 9, the committee of reference reviewed the Board's written reply to the sunset review questions, and received an oral report from me on the regulation of the regulated groups and accepted public input relating to the Board's efficiency and effectiveness.

The committee then voted 8-0 to recommend to the full legislature the continuance of the Board for 10 years. This recommendation will be received and acted upon by the legislature in the next legislative session after committee meetings in each chamber.

WCARB meeting

The western region meeting of the NCARB will be meeting in Tucson in March of 2006. Some of the Board staff will be providing support at the meeting.

RE: Home Inspector Certification

Mr. Robinson:

The Board of Technical Registration was in error in granting you certification as a Home Inspector at its meeting held on November 15, 2005.

Pursuant to ARS 32-122.02 (A)(7) the Board is prohibited from granting certification to an applicant who has a felony conviction that occurred within five years of application. The statute reads as follows:

- A. An applicant for certification as a home inspector shall:
7. Have received an absolute discharge from sentence at least five years before the application if the person has been convicted on one or more felonies, provided the Board determines the applicant is of good moral character and repute.

The Board will be advised of this error at its next meeting on December 20, 2005 and will further be advised to vote and rescind its prior action. By law, the Board has no discretion to grant you certification.

I sincerely apologize for any inconvenience this error in procedure has caused you. You will find attached the check you submitted as application fee.

Sincerely,

Ronald Dalrymple
Executive Director

Enclosed please find resume from my past supervisor William F. Cook. Also as of July 11, 2005 my present supervisor has changed to Charles N. Emerson, Manager of Technical Services, and my new job title is Sectionalizing Coordinator. Please find Certificate of Experience Record / Supervisor Form and resume completed by Mr. Emerson. Please note Mr. Emerson has been my manager for approximately nine years and has been observant of my work for a good portion of that time period.

I have requested, several times, resumes from my past supervisors Ron Brown, Manager of Operations, and Frank Gonzales, Distribution Design Supervisor, however they are unable to furnish them to me. Due to certain time constraints I am submitting information I have without their supporting resumes and request your understanding in this matter.

My past supervisor Larry Schone, Marketing Manager, has moved on from Trico around 1996, I have not been able to locate him and I will not be able to furnish his resume. Again I ask for your understanding.

For further questions or consideration please let me know if a personnel interview, at your convenience, would assist the application process. Along with my mailing address I can be reached by any of the contact numbers below.

Thank you for your time and consideration,

RE: Applicant Scott Mesich

Dear Sir or Madam:

Over the last 26 years that I have been the department manager, responsible for engineering, I have employed the services of consultants John Patterson, P.E., Bill Ellett, P.E. and more recently Mike Gaynor, P.E., of the consulting firm of Patterson, Ellett & Gaynor. In the first 15 years, we had two full system sectionalizing studies done. Within a year they were out dated and getting a P.E.'s approval s documented was disorganized.

Because of the disorganization about 10 years ago, I asked Patterson & Ellett to change the way Trico's sectionalizing studies were being done. Trico was growing very fast and sectionalizing changes were needed monthly, later weekly and then almost daily.

I asked Patterson & Ellett to do a sectionalizing study on each substation as it relates to our power supplier and on each circuit as it relates to each substation and load. I also asked them to keep a dynamic file on each substation and circuit on file, at Trico and at their office. The resulting sectionalizing file on each substation and circuit did not work.

There were several underlying problems:

- The P.E. consultants were not 100% sold on the process.
- The P.E. consultants had never tried to keep up with a utility growing and changing as fast as Trico.
- Requests for sectionalizing changes were not coming from mutual sources inside of Trico, some without the authority to request the changes.
- Changes were being made before Trico's P.E. Consultant's could approve.
- Maps and circuit diagrams were not up-to-date or correct.
- System models not being kept up-to-date and therefore "what if" scenarios were inaccurate and unreliable.

November 17, 2005
RE: Scott Mesich
Page 2

To solve this highly libelous and unethical situation, I brought Scott Mesich directly under my management but under the Trico Professional Engineering Consultants to supervise all the engineering work dealing with sectionalizing system coordinator, system design, voltage drop studies, and "what if" scenarios to evaluate system problems and adding new loads.

Scott has done everything I dreamed of in this area. His sectionalizing file is very organized with changes or additions request defined, solution recommend and approvals documented from Trico's P.E. consultants, Trico Operations and Trico Planning. Scott has done over 109 sectionalizing studies under Patterson, Ellett & Gaynor's supervision with **increasingly greater responsibility for the studies**. Scott keeps Trico's sectionalizing studies, maps, circuit diagrams and computerized system model updated weekly. These engineering tools and studies are as up-to-date if not more up-to-date than any other electric utility in the state. With Scott's work and dedication, Trico has solved its engineer ethic and liability problems. On July 12, 2004, I met with Prem K. Bahl, P.E., before he gave his approval on Trico's last Construction Work Plan and Cost of Service. This Arizona Corporation Commission's Engineer, Trico's audited sectionalizing studies and system models. He found nothing lacking in these areas and said he was very impressed.

I feel it is time for Scott to take another step in responsibility for Trico's engineering work. To do this he needs to be registered as a professional engineer. I think he is ready for this step and recommended the State of Arizona Board of Technical Registration allow his work experience with Patterson, Ellett & Gaynor to count as direct supervision under a Professional Engineer.

If you have any questions please call or email me.

Sincerely,

Charles N. Emerson

RE: Explanation for "yes" answer on Question 6 of Application for Professional Registration.

To Whom It May Concern:

My "yes" answer to the above referenced question stems from two violations. In March of 1998 and February of 2000, I was arrested, charged and convicted of driving under the influence of alcohol. Both incidents occurred in the City of San Diego and San Diego Metropolitan Police were the arresting agency. The San Diego Municipal Court was the convicting agency (Docket No. T195045 for the 1998 DUI and Docket No. M795841 for the 2000 DUI).

The police report for the 1998 DUI has been purged from the records (see attached certification from the SD Police). I have included a certified copy of the original complaint and court documents. Leaving a building industry related function, I was pulled over for speeding, was arrested for driving under the influence of alcohol and convicted of prima facie DUI. The terms of the conviction were as follows: 3-month DUI program (which includes MADD and AA meeting attendance throughout 3-month period), 5-days public work service, payment of fines and restitution, 3-months restricted driver's license, 200 hours of volunteer work, and one year probation. During the course of the court proceedings, the court vacated speeding violation given to me at the time of arrest. I complied with all of these conditions in 1999.

For the 2000 DUI, I have enclosed a certified copy of the police report, the original complaint, the court documents and a letter from my attorney explaining the outcome of the court proceeding. After separating from my now ex-wife, I went through a difficult time of depression. The night of the arrest, I was drinking at a downtown bar with a friend. Approximately 2 blocks from where I parked, I misunderstood a traffic signal and thought that I had the right-of-way for a left turn. The oncoming traffic didn't stop and I clipped the front end of an oncoming car. At the time, I didn't even realize that we had made contact until I was pulled over a block away from the incident. After taking a breath-test, I was arrested for driving under the influence of alcohol. Due to the prior conviction, the terms of this conviction were very harsh: 18-month DUI program (which includes MADD and AA meeting attendance throughout 18-month period), 12-days public service work, payment of fines and restitution, 1-year revoked driver's license, 2-year restricted license, 3 years with ignition interlock device, and five years probation. Also, during the course of the court proceedings, the court vacated additional traffic

violations given to me at the time of arrest. I have complied with all of the court orders as of June of 2003 and I am waiting for my probation period to end in June of 2005.

There is no excuse for these violations. However, at the time of my arrests, I was going through a very difficult period in my personal life. Drinking and driving only exacerbated my personal problems. I have paid a very high price for these mistakes (e.g. financial, humiliation, lost time and opportunity, lost driving privilege, etc.) and will not ever let this happen to me again.

Please do not hesitate to call me if you have any questions related to this matter.

Sincerely,

Mark A. Brencick, P.E., P.L.S., Esq.

RE: CASE NO. M795841

Dear Mark:

I appeared on your behalf and was unable to get the charge reduced to a lesser charge. As such I entered a plea of guilty to VC23152(a)(DUI) and admitted that you have a prior conviction. You were placed on summary probation to the court for a period of five years subject to terms and conditions below.

You are ordered to pay a fine of \$1,100.00 and \$100.00 restitution fine, plus a \$100.00 DUI Assessment fee which you must pay at your DUI Alcohol Monitoring interview. You were given credit for \$ 50.00 for one day your served in custody making it a total fine of \$1,250.00, you must report to court collections officer after my appearance on August 10, 2000, and make arrangements to make monthly payments on this. You are to pay the restitution amount of \$100.00 to K. Naas. You must also attend one MADD class as indicated on the Minute Order.

Further, your driving privileges are restricted for a period of 24 months to driving to and from work during the course of employment and the court ordered programs. As another term of probation you must also install an Ignition Interlock Device in any vehicle that you might own for a period of three years. Further, you must enroll and complete the SB38 program. You should report to the DUI Alcohol Monitoring Unit and complete the assessment process. They will give you guidance and directions on the SB38 program. You are also to serve 96 hours in custody of

the sheriff. Pursuant to the attached you must call Work Release Program as quick as possible to make arrangements in order to avoid further complications. Further, a future court date has been set for August 10, 2000, to review your progress regarding your fine payments.

Should you have any questions regarding the above please do not hesitate to contact me.

Very Truly Yours,

RONALD C. STOUT

RE: Explanation for "yes" answer on Question 1 of Application for Professional Registration.

To Whom It May Concern:

My "yes" answer to the above referenced question stems from my recent application for my Real Estate Broker's License in the State of Arizona. My application was denied based upon my previous two DUI convictions in the State of California (please see the attached explanation related to these convictions). According to the Arizona Department of Real Estate, these two convictions reflect poor moral character which is grounds for denying the application. However, as I have explained to the Department of Real Estate, these two incidents were isolated mistakes during a very difficult period in my personal life and do not reflect the hard work, dedication and honorable life the rest of my accomplishments and past exemplify. I truly am sorry and ashamed of my behavior, however, the convictions are both over 5 years old. I have paid my dues to society and, since the convictions, have consistently demonstrated my good character with my family life and business dealings.

Accordingly, I am currently appealing the Department of Real Estate's decision to deny my broker's license. I have already attended one hearing to appeal their decision. I attended that hearing representing myself since I thought I could adequately convince the hearing officer of my good character. However, I lost the hearing and the Department's denial was affirmed. Since that time, I have hired an attorney to represent me with this situation. My attorney has filed a request for a re-hearing of the case based upon additional information demonstrating my good character and based upon the fact that the hearing officer's decision was based on old law. With this letter, I have included a copy of the correspondence I have had with the Department of Real Estate related to this matter.

There is no excuse for these violations. However, at the time of my arrests, I was going through a very difficult period in my personal life. Drinking and driving only exacerbated my personal problems. I have paid a very high price for these mistakes (e.g. financial, humiliation, lost time and opportunity, lost driving privilege, etc.) and will not ever let this happen to me again.

Please do not let these old mistakes haunt me for the rest of my life. It is my intention to move to Arizona and obtaining my license must occur prior to me making that move.

Sincerely,

Mark A. Brenckick, P.E., P.L.S., Esq.
